POSITION OVERVIEW

Reporting to the Director of Research & Air Service Development, this leader manages efforts aimed at attracting airlines and air cargo carriers to Tampa Bay, as well as increasing flights and capacity levels in existing domestic and international markets. Manages relations with air carrier network planning contacts, including ensuring timely response to inquiries, preparation of analytic assessments on behalf of air service efforts, and the delivery of time sensitive reports to airline representatives. Manages development and delivery of reports for regularly scheduled network planning conferences, as well as ad hoc meetings. Manages consultant relationships, including communicating project specifications and expectations. Manages day-to-day operation of air service incentive program (ASIP), including documentation and communication with airlines and community partners.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Reporting to the Director of Research & Air Service Development, manages the implementation and execution of the strategy to attract airlines to TPA and increase flights in domestic and international markets.
- Performs sophisticated statistical analysis of primary and secondary data sources to synthesize data into comprehensive situational awareness, and an actionable plan.
- Responsible for implementation of Airport's Air Service Incentive Program (ASIP)
- Assists Marketing and other Authority departments on an as needed basis.
- Manages work assignments and ensures the accuracy and adequacy of technical work.
- Collects, organizes, and analyzes research data and develops logical conclusions
- Develops, manages and delivers world-class multi-media presentations and written reports of research results, findings, and recommendations.
- Participates in the quantity and quality control of air service contractors to ensure that services received are of high quality and good value.
- Monitors air service consultants to ensure that project schedules are met.
- Attends events and meetings with community stakeholders relevant to Airport's air service and economic development strategies
- Supports Marketing staff with research needs.
- Stays current on all news relevant to air service development and the financial and operating performance of domestic and international air carriers.
- Assists in preparing budget requests and administering approved budget.
- Generates innovative solutions in work situations and examines all possibilities before making final decision.

MINIMUM QUALIFICATIONS

Master's degree with demonstrated coursework in statistics or data science, and one-three years of experience in airline network planning, air service development or another industry heavily dependent upon data analytics/insights **OR** Bachelor's degree with demonstrated coursework in statistics or data science and four or more years of experience in airline network planning, air service development or another industry heavily dependent upon data analytics/insights.

Department:	Air Service Development
Pos. No:	15671
Pay Grade:	E4: $76,500-$158,000 – **Exempt**
Last update:	8/2018 –Compensation

JOB SPECIFIC COMPENTENCIES

- Experience in an airline network planning, air service development or a position with demonstrated history of translating data into strategic recommendations and insights.
- Knowledge of quantitative modeling or statistical analysis techniques.
- Thorough knowledge of the principles and practices of project management.
- Ability to prepare and present detailed information to management and clients.
- Ability to establish and maintain effective working relationships, both inside and outside the organization.
- Ability to communicate effectively, both orally and in writing.
- Ability to manage specialized work.
- Ability to use substantial reasoning and problem-solving techniques.
- Preference for candidates with foreign language fluency.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Under the general direction of the Executive Vice President of Marketing, directs the execution of strategic and tactical plans to support and increase flights to existing domestic and international markets and attract prospective new airlines and destinations. Provides key leadership for the Airport by developing and exploring real-time business analytics and consumer data to inform short and long-range strategies and strategic initiatives that support all areas of the Airport business.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Directs the implementation and execution of the strategy to attract all airlines to this market and to increase flights in domestic and international markets. Reports on a regular basis on traffic trends globally and domestically. Develops and presents business case presentations to airline staff. Plans and tracks all Air Service Development sales calls
- Represents TPA at airline and industry meetings and trade shows related to Air Service.
- Leads the implementation of TPA's Air Service Incentive Program (ASIP).
- Develops market research to understand demographic and psychographic trends to inform business plans and initiatives.
- Mobilizes research to support Concessions, Parking, Planning & Development, Marketing and other departments to understand internal and external preferences and consumer sentiments by using qualitative and quantitative analysis tools.
- Develops periodic short and long term forecasts for the enterprise budget as well as planning support.
- Directs the preparation of budget requests and business plans and administers approved departmental budget. Directs and oversees contract consulting firms and authorizes expenditures.
- Interviews, selects, supervises, develops, and counsels subordinates in accordance with established policies.
- Develops and maintains survey databases on TPA airport customers, customer needs, and customer satisfaction.
- Coordinates Board approval process for Research and Air Service-related policy changes and contracts for services.
- Develops and manages Customer Relationship Management Systems.
- Performs related duties as assigned.

REQUIRED KNOWLEDGE AND ABILITY:

Knowledge of:

- Domestic and international airline passenger and air cargo operations and network decision-making processes to effectively represent the airport with airlines.
- Research methods and practices and relevant sources to gather data for tracking and analysis.
- Principles of passenger and air cargo carrier route planning to prepare proposals and presentations for current and potential TPA carriers.
- Fundamentals of Airport business operations and related Federal regulations.
- General principles of effective graphic design.
- Aviation regulatory affairs and airport airline use agreements.
- Strong working knowledge of airline route analysis tools (e.g. Diio, Sabre ADI, ARC, OAG)

- International travel and protocol
- Multi-lingual preferred

Ability to:

- Effectively lead teams of direct reports, related departments, and external partners.
- Track and analyze data and prepare presentations using a personal computer, including word processing, spreadsheet, database, and presentation software.
- Analyze a variety of demographic, psychographic, and travel propensity data.
- Communicate effectively in oral and written format to prepare and present presentations to airlines.
- Develop sophisticated cost comparisons using spreadsheets with formulas and lookup tables.
- Prepare visually-pleasing world-class marketing materials that support the Airport's brand strategy.
- Exercise sound independent judgment within general policy guidelines.
- Establish and maintain effective working relationships with those contacted in the performance of duties and to work as a team.
- Work under tight deadlines and coordinate several concurrent assignments.
- Travel, sometimes extensively, to meet with airline executives to deliver presentations and develop long-term partnerships.

MINIMUM QUALIFICATIONS

This classification requires a combination of education and experience reflecting possession of the required knowledge, skills and abilities, to include graduation from an accredited college or university with a Bachelor's Degree in business, marketing, market research, or other related field; plus eight years of demonstrated experience in work directly associated with airline route economics, including route planning experience at an airline, as an airline or airport consultant, or similar experience in the Aviation industry.

Position Title: *Manager, Business & Market Intelligence*

POSITION OVERVIEW

Reporting to the Director of Research & Air Service Development, provides data driven insights in support of the Airport's marketing strategies, air service development efforts and general strategic objectives. This position serves both as an internal consultative role working heavily with senior business leaders throughout the organization as well as an external role working with customers and community stakeholders to develop real-time actionable market intelligence. Position is responsible for ongoing management of the Airport's survey research programs, and oversees business intelligence efforts leveraging existing tools. Research tasks include both ongoing and ad hoc requests, and include both quantitative and qualitative projects.

POSITION ACCOUNTABILITIES

Note: The following job description is not intended to be, nor should it be construed as an all-inclusive list of responsibilities associated with this position. The duties listed are illustrative, not exhaustive and any omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Management may require incumbents to perform job duties other than those contained in this document at any time.

- Develops and conducts market research in support of the Airport Strategic Business Plan; monitors, collects and analyzes market intelligence data; evaluates the dynamics of markets and competitors to devise effective business strategies.
- Performs statistical analyses of primary and secondary data sources, and synthesizes data into easily interpretable strategic recommendations.
- Manages work assignments and ensures the accuracy and adequacy of technical work.
- Develops, manages and presents world-class multi-media presentations and written reports of research results, findings, and recommendations.
- Maintains and organizes all research data files and reports.
- Responsible for the quantity and quality control of research contractors to ensure that services received are of high quality and good value.
- Manages research contractors to ensure that project schedules are met.
- Supports Marketing staff with research and other needs.
- Maintains situational awareness of news relevant to TPA and the Tampa Bay market.
- Develops research methodologies; ensures the soundness of principles used in developing new marketing strategies to address current and emerging business needs.
- Provides direct analytical support to individual business units within the Airport.
- Generates innovative solutions in work situations and examines all possibilities before making final decision.
- Attends events and meetings with community stakeholders & professional associations in support of the Authority's strategic objectives.
- Prepares the Department's budget request and administers *the approved budget.*

Tampa International Airport

Position Title: *Senior Business Analyst*

POSITION OVERVIEW

Reporting to the Director of Research & Air Service Development, provides data driven insights in support of the Airport's marketing strategies, air service development efforts and general strategic objectives. This position will serve an internal consultative role working heavily, under direct management, with senior business leaders throughout the organization. Position will attend to ongoing management of the Airport's survey research programs, as well as overseeing business intelligence efforts leveraging existing tools. Research tasks will include both ongoing and ad hoc requests, and will include both quantitative and qualitative projects.

POSITION ACCOUNTABILITIES

Note: The following job description is not intended to be, nor should it be construed as an all-inclusive list of responsibilities associated with this position. The duties listed are illustrative, not exhaustive and any omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Management may require incumbents to perform job duties other than those contained in this document at any time.

- Assists in the development of market research in support of the Airport Strategic Business Plan; monitors, collects and analyzes market intelligence data; evaluates the dynamics of markets and competitors to devise effective marketing strategies.
- Performs statistical analyses of primary and secondary data sources to synthesize data into easily interpretable strategic recommendations.
- Manages work assignments and ensures the accuracy and adequacy of technical work.
- Collects, organizes, and analyzes research data and develops logical conclusions.
- Develops, manages and delivers world-class multi-media presentations and written reports of research results, findings, and recommendations.
- Maintains and organizes all research data files and reports.
- Participates in the quantity and quality control of research contractors to ensure that services received are of high quality and good value.
- Monitors research contractors to ensure that project schedules are met.
- Supports Marketing staff with research and other needs.
- Stays current on all news relevant to TPA Airport Marketing.
- Assists with the development of research methodologies; ensures the soundness of principles used in developing new marketing strategies to address current and emerging business needs.
- Provides direct analytical/marketing support to individual business units within the Airport.
- Generates innovative solutions in work situations and examines all possibilities before making final decision.

MINIMUM QUALIFICATIONS

The minimum qualifications required to perform successfully in this position are verifiable collegiate level coursework in statistics and/or quantitative research methods, and experience conducting formal research in a business or academic environment.

The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Senior Manager, Airport Concessions, the Authority is seeking a qualified individual to assist in the day to day management of the public parking, rental car, and employee bus operations. The Commercial Parking and Ground Transportation Manager is involved in almost every aspect of the division and will be responsible for a wide and diverse range of assignments. The Commercial Parking and Ground Transportation Manager is responsible for assisting in creating and enforcing selected policies and procedures as promulgated by the Ground Transportation Operations Manual and Authority policies, standard procedures, and operating directives.

The Commercial Parking and Ground Transportation Manager assists the Senior Manager, Airport Concessions in preparing the annual budget for the division and prepares reports related to the parking revenue control system, parking trends, capacity and usage, employee productivity, and other related reports as required by the Senior Manager, Airport Concessions. Ensures all related facilities and operations are fully staffed, clean, and safe, at all times and that tenants are in compliance with their agreements.

Leadership Qualities Required:

- Strong leadership, team-building and consensus-building skills required.
- Problem solver, accountable and decisive with an ability to execute plans that are operationally sound.
- Visible, enthusiastic, and a high energy level.
- Strong interpersonal, oral and written communication skills.
- Exceptional eye for detail and high operational standards.

There are no direct reports that come to this position.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages and monitors the day to day parking operation, rental car operation, employee shuttle operation, and the AVI (Automated Vehicle Identification) program, and is the Commercial Parking and Ground Transportation first point of contact.
- Assists in managing the agreements for rental cars, employee shuttle, and parking, with a particular focus on compliance and standards.
- Assists in preparing the annual fiscal year operating budget and is accountable for monitoring and achieving the expense budget in the employee shuttle and parking operation.
- Makes recommendations for operational improvements and efficiencies.
- Works closely with the parking operator, outside agencies and other tenants and internal teams for inspections of all parking and ground transportation facilities and equipment for cleanliness, safety hazards, preventative maintenance, and any other work required.
- Produces, obtains, and maintains all operational daily, weekly, monthly, and annual reports as required by the Senior Manager, Airport Concessions. This includes, but is not limited to, financial reports, expense reports,

bussing, Parking and Revenue Control System (PARCS), AVI, and other parking and ground transport related reports. It is expected that the Manager, Commercial Parking and Ground Transportation will obtain a working knowledge of these reports.

- Collaborates with other Authority departments, in particular Terminal and Ground Transportation, Operations, and Procurement as needed and maintains excellent relationships.
- Works closely with the Risk Management Department regarding damage claims and/or personal injury reports.
- Handles customer service inquiries and/or complaints related to airport parking and ground transportation including responding to customer service emails and inquiries in a timely manner. This also includes reviews of refund requests to ensure requests meet response guidelines.
- Resolves internal requests, questions, and complaints frequently requiring analysis of situations to determine the best use of resources and proposing corrective actions.
- Position may require working alternate schedules on an as needed basis to support the operation such as nights, weekends, and holidays. Must be available for calls 24/7 including weekends and holidays.
- Performs related work and any other duties as required.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree from an accredited college or university or equivalent experience. The incumbent should possess exceptional leadership, communication and presentation skills. Successful candidate should possess an understanding of airport parking facility operations and ground transportation operations, federal, state and local rules and regulations affecting such operations, and business principles and practices as they relate to management of parking and ground transportation agreements and facilities. The incumbent should have a minimum of three years of progressively responsible experience at a medium or large-hub airport, preferably in public parking and ground transportation or operations fields, or have experience in compliance and agreement management. Must possess a current Florida Driver's License.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

- Research, develop, and make recommendations to retain or generate additional revenue in each of the above-mentioned line of businesses/categories.
- Work with Airlines, Marketing, Customer Service, and other departments to identify customer needs and develop concession opportunities to meet those needs.
- Knowledge of retail marketing, advertising, management and administration, food & beverage sanitation, and/or the principles of concession management.
- Knowledge of advertising and sponsorship industry trends and multiple media opportunities.
- Develop strategic direction and direct the activities to identify trends in the passenger demographics, preferences, and identify opportunities to optimize revenues and enhance customer satisfaction.
- Administer consultant contracts, conduct public meetings, and contribute to the process for selection of concessionaires, recognizing the Procurement Department has the lead role.
- Manage the development of income projections, space planning, space design, selection of operators, capital, as well as financial management analysis, merchandising, product promotions; develop rent structuring to facilitate concession pricing policy.
- Direct, develop, and manage market surveys to determine fair market rates and evaluates concessionaire rates to ensure conformance to negotiated rates; negotiate rates with vendors and service providers based on fair market values for like products and services.
- Work with airline representatives, other airport and ACDBE/DBE liaisons to formulate long-term plans for airport terminal facilities concessions, including overall themes, design guidelines, mix of services,

and appropriate service locations; solicits concession operations through competitive processes; determine criteria for selection processes; review tenant improvement submittals and evaluate potential concession and service opportunities; conduct pro-forma and feasibility studies to ensure new opportunities make financial sense; review feasibility of capital projects that support concession programs.

- Monitor concession program finance and customer service performance; conduct store walk-throughs during store hours to monitor signage, appearance and cleanliness; approve advertisement copy, hours of operation and tenant improvements; conduct contract compliance and security inspections as required.
- Consult with concession operators on business improvement methods, including product selection and merchandising.
- Administer the provisions of the Use Agreement governing the Airport as related to revenue programs.
- Review and approve Letters of Proposal, Requests for Proposal, Invitations for Bid, and Requests for Qualification.
- Review and approve Letters of Proposal, Requests for Proposal, Invitations for Bid, and Requests for Qualification.
- Review the business and financial plans of existing concessions and commercial activities to determine the short- and long-term healthiness of the business and to assist concessionaires in preparing budgets and in determining the impact of changes in product lines, display methods or facilities on financial performance.
- Select, train, supervise, motivate, coach development skills, and evaluate personnel.

MINIMUM QUALIFICATIONS

The minimum qualifications required to perform successfully in this position are a Bachelor's Degree with a major in public or business administration or a closely related field; and eight years of progressively responsible experience in planning, developing, and implementing concession programs and negotiating and administering concession contracts; or an equivalent combination of training and experience. Experience should reflect demonstrated knowledge and a thorough understanding of Airport Concession Programs, administration and management of contracting documents, and compliance with policies and procedures. Related experience may be substituted for education on a year-for-year basis.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Department:	Airport Concessions
Pos. No:	00000
Pay Grade:	E5 ($89,000 – $185,000) – **Exempt**
Last update:	8/2018 Compensation

POSITION OVERVIEW

The Vice President of Concessions and Commercial Parking will provide strategic leadership, manage, plan, organize, integrate, and directly handle the Authority's Concessions Program for all concessions including food & beverage, retail, advertising, sponsorships, passenger services, on-airport and off-airport rental cars, off-airport parking, airport parking, commercial ground transportation, and other ancillary concessions for Tampa International Airport.

The incumbent is responsible for developing a strategic plan including recommendations for building and enhancing the concessions program, the consolidated rental car center program, and developing budgets/pro-forma and subsidiary programs as required. The incumbent is responsible for evaluating, developing, soliciting, negotiating, and managing all airport concession agreements, concession licenses and leases, including determining and negotiating lease rates with concession tenants, researching and developing plans to explore, generate and drive non-aviation revenues, meet the Authority's ACDBE/DBE program objectives and work closely with key internal and external stakeholders, and consultants. The incumbent will also actively monitor and evaluate the concession program's financial and customer service performance, and appearance, to ensure vendors and service providers meet the Aviation Authority's high standards of customer service excellence.

POSITION ACCOUNTABILITIES

- Lead, develop, and manage the negotiation and management of airport concession agreements, including food & beverage, retail, on-airport and off-airport rental cars, off-airport parking, airport parking, commercial ground transportation, advertisement, sponsorships, vending, and passenger services, and other revenue generating non-airline services; negotiates agreement amendments.
- Lead, motivate, coach, develop, and evaluate a team of Airport Concessions Department personnel.
- Research, develop, and make recommendations to retain or generate additional revenue in each of the above-mentioned lines of businesses/categories.
- Work with Airlines, Marketing, Customer Service, and other departments to identify customer needs and develop concession opportunities to meet those needs.
- Develop strategic direction and direct the activities to identify trends in the passenger demographics related to concessions, preferences, and identify opportunities to optimize revenues and enhance customer satisfaction within each line of business.
- Administer consultant contracts, conduct public meetings, and contribute to the process for selection of concessionaires, recognizing the Procurement Department has the lead role.
- Manage the development of income projections, space planning, space design, selection of operators, capital, as well as financial management analysis, merchandising, product promotions; develop rent structuring to facilitate concession-pricing policy.
- Oversee the development and management of market surveys to determine fair market rates and evaluate concessionaire rates to ensure conformance to negotiated rates; negotiate rates with vendors and service providers based on fair market values for like products and services.
- Work with airline representatives, other airport and ACDBE/DBE/WMBE liaisons to formulate long-term plans for airport terminal facilities concessions, including overall themes, design guidelines, mix of services, and appropriate service locations; solicits concession operations through competitive processes; determine criteria for selection processes; review tenant improvement submittals and evaluate potential concession and service opportunities; conduct pro-forma and feasibility studies to ensure new opportunities make financial sense; review feasibility of capital projects that support concession programs.
- Oversee the monitoring of concessions program finance and customer service performance; ensure store walk-throughs are conducted during store hours to monitor signage, appearance and cleanliness; approve advertisement copy, hours of operation and tenant improvements; ensure contract compliance and security inspections are completed as required.

- Administer the provisions of the Use Agreement governing the Airport as related to revenue programs.
- Review and approve Letters of Proposal, Requests for Proposal, Invitations for Bid, and Requests for Qualification.
- Oversee the development of the departmental budget, approves budget requests, business plans, and administer the approved budget.
- Review the business and financial plans of existing concessions and commercial activities to determine the short- and long-term health of the business and work closely with concessionaire partners to implement change as necessary.

Reporting to the Vice President of Concessions (*see optional titles above*) positions:

- Senior Manager, Concessions (3) and Senior Business Analysts (2).
- The Concessions department has a total of eight (8) FTEs.

MINIMUM QUALIFICATIONS

The minimum qualifications for the Vice President of Concessions are a bachelor's degree with a major in public or business administration, management or a closely related field; and ten years of progressively responsible experience in planning, developing, and implementing concessions programs including negotiating and administering concession contracts; or an equivalent combination of training and experience. Experience should reflect demonstrated knowledge and a thorough understanding of Concessions Programs including all lines of businesses referenced in this position description, administration and management of contracting documents, and compliance with policies and procedures. Experience should also reflect knowledge of retail marketing, advertising, management and administration, food & beverage, sanitation, parking, commercial ground transportation and operational management as well as advertising and sponsorship industry trends and multiple media opportunities.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Serves as the Chief Executive Officer of the Hillsborough County Aviation Authority and under the general administrative direction of the Board, the Executive Director is responsible and accountable for the planning, operations, public safety, security, maintenance, legal, development, marketing, community relations, finance and administrative functions for Tampa International Airport, Peter 0. Knight Airport, Vandenberg Airport and the Plant City Airport.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for the creation and implementation of the long-term strategic initiatives, approved by the Board, to guide the ultimate development and direction of the HCAA.
- Responsible for the selection, training and motivation of the staff of the HCAA to create a productive work environment. Implementation of programs to ensure staff career advancement opportunities and provide the resources to accomplish assigned tasks.
- Responsible for the coordination with all agencies within Hillsborough County that have responsibility for Economic Development, Travel, Tourism and Convention activities to ensure the aviation system is positioned to satisfy their requirements for continued growth for the overall benefit of the community.
- Responsible for media relations, developing promotional campaigns, issuing press release, responding to requests for specialized services and maintaining good relations with the general public by being active in the community. Typically, this would include public presentations relating to the Aviation System and its importance in the ultimate development of the Metropolitan Service Area to business and community groups.
- Responsible for compilation, preparation and analysis of quantifiable airport and air service data for use by the Aviation Authority to pursue potential air service opportunities for passengers and cargo to improve the competitive advantage of the air service region and present the results to the identifiable service providers. Provides statistical and economic concepts to support recommendations, and promotes airport oriented activities in the region.
- Monitors all local, state and federal legislative initiatives relating to the aviation industry to protect and promote the interests of the HCAA
- Responsible for lease and contract negotiation and for the coordination with air carriers, concessionaires and tenants of the aviation system to support the ultimate development of services and facilities to provide the highest possible level of service to the users and customers of the airports under the control of the HCAA
- Coordinates the activities and involvement of the HCAA with the Airports Council International, the American Association of Airport Executives, the Air Transport Association and other trade associations in an effort to influence the initiatives these organizations pursue to assure their compatibility with the goals and objectives of HCAA.

- Responsible for compliance with all federal, state and local procurement requirements in the selection of contractors, concessionaires, consultants and individuals providing goods or services to HCAA. Development of programs to ensure equal opportunities for Disadvantaged Business Enterprises in providing services to the general public.

- Responsible for the maximization of revenues and the minimization of expenditures to protect the financial strength of the HCAA.

- Performs other duties as required to ensure the success of the ultimate development of the airports under the control of the HCAA is of the highest quality possible to serve the requirements of the local and national air transportation system.

The specific recitation of the above items shall not be deemed to limit the Executive Director's duties and responsibilities only to those set forth above. The Executive Director's duties and responsibilities shall be subject to the authority of the governing board of HCAA.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: *General Counsel, Executive Vice President Legal Affairs*

POSITION OVERVIEW

Reporting to the CEO and Authority Board Members, this position serves as the principal contact in all legal matters for the Aviation Authority. The incumbent is responsible for the performance of a wide variety of legal duties pertaining to all leases, contracts and agreements for the Authority, representing the Authority's interest in litigation, and rendering legal opinions. The General Counsel will manage all activities of the Department of Legal Affairs and oversee the preparation of all agreements relating to the Master Plan development program, including airline agreements, concession/commercial development agreements, land acquisition and ground leases, construction and consultant agreements and the lease of airport facilities at the Authority's four airports.

The General Counsel will insure the legal sufficiency of contracts and agreements in accordance with federal, State, local and HCAA laws, rules and regulations. The incumbent will also be responsible for ensuring that contracts, leases and agreements clearly define the interests of all the parties involved; are consistent, accurately identify the tenant's obligations, outline concession performance standards and DBE goals and expectancies and represent the current regulatory environment.

The General Counsel will provide legal opinions and advice to the CEO and Board Members on a wide variety of legal matters related to all aspects of the Aviation Authority from its governance to the management and operation of Tampa International, Peter O Knight, Plant City, and Tampa Executive Airports.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Review and approval of all contracts, grant agreements, concession agreements, vendor agreements, labor agreements, user agreements, leases, easements, permits and similar documents.
- Coordination of all legal issues with the Authority's CEO.
- Draft and final preparation of contracts or other legal documents.
- Representation in real estate transactions, including examination of land titles.
- Representation in actual or threatened litigation or in any adversarial proceedings before Administrative agencies.
- Liaison with legislative and executive representatives of County, State or Federal government agencies.
- Provide services that fall in highly specialized areas such as bankruptcy, computer, environmental, public procurement and construction, third party liability claims, collection of delinquent accounts or tax law.
- Oversee all outside legal service contracts.
- Other duties and assignments as may be required.

MINIMUM QUALIFICATIONS

The minimum qualifications required to perform successfully in this position are: a Juris Doctor Degree from an accredited school of law and admission to the Bar of the State of Florida (or have similar credentials from another State that will be reciprocally honored by the Florida State Bar Association), 8+ years' experience as a practicing attorney including extensive professional legal experience involving some branch of local government, experience in the Aviation Industry, or any equivalent combination of experience and training a must.

Experience should reflect demonstrated knowledge and a thorough understanding of the laws as they relate to the sale and purchase of real property; rental and lease agreements; construction and contract administration; procurement; and, compliance with policies and procedures. The General Counsel will perform a wide range of legal services for the Authority and a thorough understanding of the requirements relating to the Public Sector environment is critical.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: *Senior Executive Administrative Assistant to the CEO*

POSITION OVERVIEW

Performs highly independent administrative support duties for the Chief Executive Officer. Duties include having direct knowledge of confidential interactions of the CEO with both internal and external projects.

In addition to the CEO and members of the Authority's board, this position routinely interacts with all levels of the Authority's staff, representatives from the private sector, and state and local governmental officials. Tampa International Airport

Position Title: *Accounting Technician*

POSITION OVERVIEW

Performs technical accounting work in reviewing, processing, and maintaining complex accounting or financial records within the General Ledger and/or related sub-ledgers in a central accounting or comptroller's office. Work includes the processing of accounting and financial transactions that require independent judgment in researching and reconciling discrepancies, assuring compliance with accounting standards and established policies and procedures, and may include considerable customer/client contact. Work is performed under the general supervision of a professional accountant and the incumbent may train or provide procedural information to coworkers and other employees.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Customer Commitment - Proactively seeks to understand the needs of our customers and provide the highest standards of service.
- Dedication to Professionalism and Integrity - Demonstrates and promotes fair, honest, professional and ethical behaviors that establishes trust throughout the organization and with the public we serve.
- Organizational Excellence - Takes ownership for excellence through one's personal effectiveness and dedication to the continuous improvement of our operations.
- Success through Teamwork - Collaborates and builds partnerships through trust and the open exchange of diverse ideas and perspectives to achieve organizational goals.

This classification description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with a particular position. Management may require incumbents to perform job duties other than those contained in this document at any time.

MINIMUM QUALIFICATIONS

An Associate's degree in Accounting, Finance, or related field; and two years of experience in accounting, bookkeeping or financial record keeping in a central accounting office with a direct impact on the general ledger or sub-ledgers.
Or
An equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Knowledge of governmental accounting principles, practices, procedures, financial recordkeeping, and budgeting.
- Knowledge of basic accounts receivable and accounts payable business practices and procedures, accounting systems, expenditure or revenue source documents, as well as general ledger and related accounting procedures.
- Knowledge of laws, rules, and policies governing assigned functional accounting area.
- Ability to use ERP accounting systems and spreadsheet applications.
- Ability to analyze transactions and reports and make appropriate correcting entries.
- Ability to post, balance, and reconcile financial accounts and records.

- Ability to read, comprehend, and apply job related rules, policies, and procedures.
- Ability to prepare financial and statistical reports.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Position Title: Accounts Receivable & Revenue Control Finance Manager

POSITION OVERVIEW

Reporting to the Manager of Business Analysis, Reporting, and Revenue Control, the Accounts Receivable and Collections Manager is responsible for managing most aspects of the accounts receivable billing as well as the oversight of the billing financial system, PROPworks. Manages the entire collections process for all Authority tenants and revenue collection outside of the public parking operation. As a super-user, the Accounts Receivables & Collections Manager provides expertise, leadership and guidance to the Authority's staff; managing, developing, implementing, interpreting, enforcing and explaining the PROPworks billing system. Reviews and analyzes all new and existing tenant agreements for proper audit, compliance, and financial language as well as proper input into our billing system to ensure the Authority is receiving the absolute maximum correct revenue on a daily basis.

The Accounts Receivable and Collections Manager interacts with all levels of Authority staff and management as well as both property management and accounting representatives from all tenants the Authority has agreements with. This position requires fast-paced, independent decision making ability which is needed to resolve various billing and collections issues which arise throughout the day. This position also exercises considerable independent judgment in interpreting all aspects of contracts/agreements and the ability to understand the interaction between the intentions of the contract, the billing system, and proper accounting principles. . In addition, this person exhibits proactive willingness and ability to help integrate new financial system technologies that enhance and streamline all monthly billing processes while maintaining the highest level of customer service and compliance.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages and oversees the $140 million annual accounts receivable billing for the Aviation Authority. Oversees accurate billing of all invoices created by Aviation Authority for areas including but not limited to: Activity/Overage Fees, Employee Parking, FBI/Badging Fees, Monthly Ground/Lease Rent, & Utilities
- Ensures accuracy of monthly activity reports submitted by a variety of tenant partners including but not limited to: Airlines, Concessionaires, Charter Buses, Duty Free Operators, Fixed Base Operators (FBOs), Ground Handlers, Hotels, Off-Airport Parking Operators & Rental Cars
- Manages monthly collections process from start to finish. This requires continuous communication with internal and external partners regarding past due invoices and what is needed to remedy the issues and collect the revenue.
- Oversees proper collection of 34 million dollar annual Passenger Facility Charges to ensure compliance with the Federal guidelines.
- Ensures proper application of all invoice payments coming to Authority and communicates as necessary with tenant partners to resolve incorrect/unapplied payments.
- Oversees annual audit process for all billable tenants to ensure that required external audits are submitted in accordance with terms of their agreement and that all necessary credit/amount due calculations and billings are correct and completed

- Annually provides all necessary schedules in a timely manner to Aviation Authority's external auditors for completion of Interim and Final Financial Audits.
- Has a knowledge and understanding of the billing structure of all types of Authority agreements as well as how the billing system handles these calculations (including application of sales tax).
- Manages, analyzes, & reviews all necessary documents and acts as liaison to Legal Department for all bankruptcies.
- Generate statistical reports used by both internal and external customers for purpose of tracking past, present, and future passenger performance.
- Understands from the root up, the complexities and calculations of the billing rules and basis for the billing system. Easily identifies concerns/issues within billing calculations/invoicing as well as solutions to fix the problems.
- During financial system upgrades, thoroughly tests all aspects of billing system's new functionality and technology improvements to ensure that the authority will still receive both the optimum and maximum Authority after implementation has been completed.
- Serves as functional expert (super-user) for Aviation Authority in regards to the billing system. Interacts with internal IT staff and both external system consultants and system provider to ensure that existing system and future releases meet the needs of the Authority as well as the greater airport revenue management industry.
- Effectively manages workload for all A/R related activities with Accountant II to ensure all monthly closing deadlines are met through an efficient work load for each member of the staff.

Reporting directly to the Accounts Receivable and Revenue Control Manager are the following positions:

- Accountant II

This classification description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with a particular position. Management may require incumbents to perform job duties other than those contained in this document at any time.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor degree from a recognized four-year college or university with a major in accounting, finance/financial planning or closely related field and at least five years of increasingly responsible accounts receivable, accounting and/or financial experience. POSITION OVERVIEW

Performs operational managerial duties for a large functional unit/section or multiple functional units/sections providing related services within an agency, department or division, with responsibility for planning, coordinating and supervising units/sections that includes multiple professional level staff members. Distinctions between class levels in the General Manager series are based on the size, scope and impact of the organizational unit within the agency/department, the nature and number of functions managed, the level of supervision exercised, the nature of positions supervised, the direct budgetary responsibility, and the complexity and scope of assigned job duties and responsibilities.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages the operations of a large functional unit or multiple units, and coordinates and administers assigned programs and resources.
- Integrates the agency's strategic plan into functional and/or operations, programs and practices.
- Supervises and directs the activities of multiple professional level subordinates in achieving established organizational goals and objectives; coordinates functions; assigns, monitors and reviews work; evaluates performance and initiates corrective action as needed, including termination.
- Reviews and proactively acts on operational problems.
- Sets performance standards and operational goals for assigned functional area; implements goals, objectives, policies and procedures for assigned organizational units.
- Interprets, explains and ensures compliance with program requirements, regulations and procedures, and provides consultation to customers on matters relating to functional area.
- Determines funding requirements, monitors status of allocated funds, and controls expenses.
- Assesses staffing needs and identifies shortfalls; interviews, recruits and hires new staff.
- Provides regular communication to subordinate staff, management, executives and external agencies and departments regarding status of operations or programs.
- Serves as department representative on task forces and committees.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university; and
Four years of experience directly related to the position duties, two of which must have been in a supervisory capacity.
Or
An equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the principles and practices of management.
- Considerable knowledge of the functions, services, activities, requirements and objectives of the specific program/functional area to which assigned.

- Knowledge of federal, state and local regulations pertaining to assigned functional area.
- Skill in applying existing guidelines and in creating new approaches to develop and modify work plans, methods and procedures for the work unit or function.
- Ability to establish and maintain constructive and cooperative interpersonal relationships with staff, peers, management and local stakeholder groups to accomplish department's mission.
- Ability to communicate effectively both orally and in writing in order to present information and prepare a variety of reports.
- Ability to identify relationships that explain facts, data or other information, and make correct inferences or draw accurate conclusions.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Position Title: *Director of Financial Planning & Analysis*

POSITION OVERVIEW

Reporting to the Vice President of Finance, the Director of Financial Planning is responsible for the planning, organizing, controlling, integrating and directing of the overall financial planning and budgeting activities for the Authority. Includes the completion of the annual operating budget, budget amendments and 20-year business plans and the calculation of airline rates and charges as a function of the budgeting, annual true-up or business plan process. This position develops and provides input and recommendations to senior management of the Authority regarding all aspects of the budgeting and financial planning activities.

The Manager of Financial Planning provides expertise, leadership and guidance to the Authority's staff, overseeing development and implementation of interpreting, enforcing and explaining the budget process, budget policies and procedures, reviewing, analyzing and developing recommendations regarding budget requests and other issues.

This position manages projections of cash flows for the 30+ bank accounts and 15+ funds of the Authority, which involves forecasting receipt of revenues, grants and passenger facility charges and the estimate of timing of operating and capital expenditures. These cash flow projections lead to recommendations for the timing of new bond or other debt issues, the principal payment of variable debt and the maturity period for the investment of available funds. Administers commercial paper program and other debt related functions. Direct staff support includes two professional Accountants that assist in this position's responsibilities as well as other duties.

POSITION ACCOUNTIBILITIES

Note: The information provided below is not a listing of specific job duties, but rather major areas of responsibility under the direction of the Manager of Financial Planning.

- Coordinates the completion of the annual budget, including operating expenses and equipment expenditures and amendments to same.
- Reviews and provides feedback on the submission of the Capital Budget from the Authority's Development Committee.
- Performs budgeted, business plan and actual calculations of rates and charges to the signatory airlines, determines and establishes airline agreement rates and charges for all airlines.
- Recommends adjustment to current rates and charges during the fiscal year based on operating results and levels of airline activities.
- Provides guidance to Authority management and staff regarding budget procedures and issues.
- Directs and manages preparation of multiple year cash flow projections of all funds of the Authority and makes recommendations regarding length and timing of investments maturities.
- Manages preparation of the financial section of the 20-year business plan.
- Manages / oversees financial plan portion of the master plan.
- Coordinates presentation of budgets, rates and charges and other information to the airlines, prepares budget related documents for presentation to the Authority's Board.
- Provides recommendations to management regarding methodology of calculating rates and charges based on interpretation of the airline lease agreement.
- Provides recommendations and guidance to staff regarding allocation of internal labor, oversees monthly labor allocations, and oversees the computation of hourly labor charge-out rates for Authority's capital projects.
- Provides guidance and recommendation on proposed modifications to the airline agreement based on current business environment.
- Completes complex rate and charges "what-if scenarios".
- Provides guidance on timing of new bond issues or other financing arrangements to meet cash flow needs of the capital development program.

Reporting to the Director of Financial Planning & Analysis, the Financial Planning & Analysis Manager is responsible for managing, planning, organizing and directing certain aspects of the financial planning and budgeting activities for the Authority. Includes the oversight and management of the calculation of airline rates and charges as well as assistance with the completion of the annual operating budget, budget amendments and 20-year business plans. This position develops and provides input and recommendations to management regarding components of the budgeting and financial planning activities. Manages professional and clerical staff in carrying out the responsibilities of this position.

The Financial Planning & Analysis Manager provides expertise, leadership and guidance to the Authority's staff, overseeing development and implementation of interpreting, enforcing and explaining the budget process, budget policies and procedures, reviewing, analyzing and developing recommendations regarding budget requests and other issues. The Financial Planning Manager will need to exercise considerable independent judgment in interpreting technical aspects of the budget process and strategic planning processes.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Performs budgeted, business plan and actual calculations of rates and charges to the signatory airlines, determines and establishes airline agreement rates and charges for all airlines
- Recommends adjustment to current rates and charges during the fiscal year based on operating results and levels of airline activities
- Provides recommendations to management regarding methodology of calculating rates and charges based on interpretation of the airline lease agreement
- Manages complex budgeting "what-if" scenarios regarding all elements of the budgeting process.
- Researches and prepares data for the budgeted, business plan and actual rates and charges to the signatory airlines, including space, activity, and expense and revenue summaries.
- Coordinates presentation of budgets and other information to the airlines, prepares budget related documents for presentation to the Authority's Board.
- Oversees the monthly reporting management reporting process including oversight of proper revenue & expense accounting to ensure accurate annual rates and charges calculations
- Responsible for managing compliance with ongoing reporting and continuing disclosure requirements
- Manages preparation of the financial section of the 20-year business plan
- Review, monitor and prepare reports for the ASIP and CFC programs.
- Supports Authority's Business Intelligence and Analytics development and roll-out
- Supervisory responsibility for Finance Support Staff
- Other responsibilities as necessary and required.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor degree from a recognized four-year college or university with a major in accounting, finance/financial planning or closely related field and at least five years of increasingly responsible budgeting, accounting and/or financial experience. In addition, the incumbent should have working knowledge of generally accepted accounting principles and the Microsoft suite of software products.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: *Senior Planning Coordinator*

POSITION OVERVIEW

Reporting to the Financial Planning & Forecasting Manager, the Senior Planning Coordinator is responsible for supporting the management, planning, organizing and direction of certain aspects of the budgeting and financial planning activities for the Authority. Supports entire annual operating budget process (Enplanement, Expense, Revenue, & Workforce) from providing the budget guidelines and calendar to the executive team to producing the annual budget book and supporting analysis for the Authority's Board. Supports the management of budget amendments and calendar, recommending and implementing reallocation of funds throughout the fiscal year to meet the needs of all levels of upper management.

The Senior Planning Coordinator provides expertise, leadership and guidance to the Authority's staff; supporting the management, development, implementation, interpretation, and enforcement of the forecasting and budgeting process, policies, & procedures. Reviews and analyzes budget requests and financial planning issues to develop recommendations for all levels of Authority's staff. This position exercises considerable independent judgment in interpreting technical aspects of the budgeting and forecasting processes.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supports the management of the completion of the $260+ million revenue and $130+ million annual and monthly operating and amendments to same. Researches, analyzes and prepares data on operating revenues and expenses.
- Supports the development and implementation of the calendar for the annual budget process as well as the monthly and annual forecasting process. Includes operating expenses, revenue budgets, the capital program, equipment requests, personnel requests, interest projections, rate calculations and budget submissions to the airlines and the Authority's Board.
- Provides guidance to staff in analysis of budget variances and monitors accuracy of departmental expenses.
- Supports complex budgeting and forecasting "what-if" scenarios regarding all elements of the budgeting and forecasting processes.
- Supports development and implementation of budgeting and forecasting policies and procedures, providing guidance to Authority management and staff regarding any issues.
- Supports preparation of budgeting and forecasting related documents for presentation to the airlines and the Authority's Board.
- Supports all system administrator functional duties as it relates to all modules of the Hyperion Planning & Budgeting system
- Supports the training development and deployment of Hyperion Planning & Budgeting to the Authority
- Provides monthly oversight to the workforce compensation module to ensure proper tracking of material personnel changes and decisions.
- Supports the maintenance of chart of accounts hierarchy in our Database Relationship Manager (DRM) system to ensure that all planning reports are in sync with the operations of the organization.
- Prepares annual enplanement and passenger facility charge collection projections for Federal Aviation Administration reporting requirements.
- Other responsibilities as necessary and required.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor degree from a recognized four-year college or university with a major in accounting, finance/financial planning or closely related field and at least five years of increasingly responsible budgeting, accounting and/or financial experience. In addition, the incumbent should have working knowledge of generally accepted accounting principles and expertize using the Microsoft suite of software products.

Tampa International Airport

Position Title: Director of General Aviation

POSITION OVERVIEW

Reporting to the Senior Director of Operations and Public Safety, this position is responsible for directing the operations and maintenance of the Authority's General Aviation airports and for coordinating the activities of the fixed base operator tenants at all of its airports.

The Director of General Aviation oversees the maintenance of airfields, buildings, equipment, and utilities at general aviation airports. The position supervises the Authority personnel assigned to General Aviation, to include, administrative, operations and maintenance personnel.

This position is responsible for maintaining a professional & co-operative relationship with tenants, fixed base operators, local community and government groups, and associations with interest in general aviation. Additionally, the position must maintain daily contacts with other department personnel at the Authority to coordinate activities and provide mutual assistance.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Oversees the day-to-day management, operations, and maintenance of the Authority's general aviation airports to safely and professionally operate the general aviation system in accord with all legal guidelines for airport operation.
- Coordinates with the Authority's Planning department and provides key input in administering the Authority's Height Zoning Regulations as they relate to general aviation airports to assure compliance and to protect the air space adjacent to Authority airports.
- Coordinates with the Authority's Maintenance department by reviewing and providing key input on plans for tenant alterations and construction schedule for work at general aviation airports to assure compliance with leases and development standards.
- Coordinates with the Authority's Properties and Contract Administration department by reviewing the preparation of final leases and agreements for general aviation facilities to assure that Authority interests are met.
- Responsible for the department's budgets for personnel, operations, maintenance, equipment and capital projects.
- Maintains a professional and co-operative relationship with individuals, groups and governmental agencies with an interest in general aviation as a whole and specifically the Authority's general aviation airports.
- Coordinates with the Authority's Public Information department to develop, implement and administer marketing and public relations programs and community outreach programs for the general aviation airports. Makes presentations to government, civic, neighborhood and other groups at the direction of the Executive Director on general aviation issues.
- Coordinates with the Authority's Planning department by providing key input on master planning and land use issues at the general aviation airports.
- Coordinates with the Authority's Planning & Development department and provides key input in the design, development and construction of capital improvements at the general aviation airports.

Department:	General Aviation
Pos. No:	00021
Pay Grade:	E6 ($103,700-$215,600) -**Exempt**
Last update:	8/2018 Compensation

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a Bachelor's degree in aviation management or the equivalent and at least five years of experience in airport management, maintenance or operations, including two years in a supervisory capacity. In addition, the incumbent should have knowledge of the features of airport construction, and knowledge of federal and state laws and regulations applying to airports, air traffic control and airport use. Having a current pilot's license would be a benefit to successfully performing in this position.

Tampa International Airport

Position Title: *Assistant General Counsel*

POSITION OVERVIEW

This position assists in legal matters for the Authority and is responsible for the performance of a wide variety of legal duties including researching legal issues, preparing memorandums of law, providing advice to staff and reviewing leases, contracts and agreements for the Authority such as airline agreements, concession/commercial development agreements, land acquisition and ground leases, construction and consultant agreements and the lease of airport facilities at the Authority's four airports.

This position will review the legal sufficiency of contracts and agreements in accordance with federal, State, local and Authority operating directives, rules and regulations. Experience with and knowledge of Florida Public Records Act and Florida Sunshine Law a plus. The incumbent will assist in ensuring that contracts, leases and agreements clearly define the interests of the parties involved; are consistent; accurately identify the parties' obligations; outline performance standards and DBE goals and expectancies; and represent the current regulatory environment.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Review contracts, grant agreements, concession agreements, vendor agreements, user agreements, leases, easements, permits and similar documents.
- Draft and preparation of contracts or other legal documents.
- Provide research services for various legal issues.
- Research and prepare memorandums of law for various legal issues.
- Administrative dispute resolution.
- Overseeing outside counsel litigation.
- Attend depositions, court hearings and other matters on behalf of the Authority.
- Other duties and assignments as may be required.

MINIMUM QUALIFICATIONS

Juris Doctor degree from an accredited school of law; admission to the Florida Bar; and a minimum of 2-3 years' experience in local governmental law (preferred), insurance, construction, finance, or real property.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental

disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Executive Assistant

POSITION OVERVIEW

The Executive Assistant provides administrative support for a Vice President (VP), and is responsible for the overall effective administration of the VP's office and its interactions with internal and external stakeholders. In managing the VP's overall calendar, the Executive Assistant understands priorities and uses good judgment to manage inevitable conflicts in requests for meetings and also is able to screen out or manage lower priority activities. The Executive Assistant to the VP interacts with the Leadership Team, Board members, staff, volunteers and stakeholders.

POSITION ACCOUNTIBILITIES

- Manages VP's calendar (internal and external activities), develop and/or organize materials and coordinate logistics for meetings. Creates contact reports and keeps track of next steps as appropriate.
- Draft and/or proof communications, correspondence, presentations, minutes, agendas and other administrative documents as needed for VP
- Serves as liaison to the Leadership Team (VP's direct reports)
- Manages the overall flow of information and communication about decisions from the VP's office to staff and other members of leadership
- Create and maintain systems and procedures to ensure effective implementation of the VP's directives
- Arranges complex travel plans for the VP and other staff when required
- Prepares and reconciles expense reports (including travel) expenses in electronic system on behalf of VP

MINIMUM QUALIFICATIONS

Qualifications to perform successfully in this position include graduation from an accredited four-year degree granting college or university in Business Administration, Public Administration or a related field and at least five years of extensive experience in an executive administrative support position.

Demonstrated typing and computer related skills and the ability to communicate effectively orally and in writing. Must be able to work in a fast paced environment, work flexible hours, and have a strong attention to detail. Excellent organizational and interpersonal skills are required.

JOB SPECIFIC COMPENTENCIES

- Advanced reasoning abilities are required to perform all essential accountabilities of this position.
- Exceptional verbal, written communication and interpersonal skills
- Excellent organizational skills for handling a variety of details and setting administrative and production priorities.
- Ability to work under pressure and can follow through to completion of assigned projects
- Ability to work in a flexible work environment that may require extra or varied hours
- Advanced knowledge, skill and ability of office management practices, current office technology and related computer programs including but not limited to Microsoft Office

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: Board Services Administrator

POSITION OVERVIEW

Reporting to the Chief Executive Officer, this position performs highly independent and administrative supportive duties for Board Members of the Hillsborough County Aviation Authority. Duties would include having direct knowledge of confidential interactions of Board Members with internal and external projects.

In addition to members of the Authority's Board, this position routinely interacts with the Chief Executive Officer and senior staff, representatives from the private sector, and state and local governmental officials. This position is challenged with projecting a positive image on behalf of the Authority in all such interactions.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Prepares and coordinates all functions related to the monthly meeting of the Authority's Board, to include the agenda, minutes, resolutions, PowerPoint presentations, etc.
- Maintains a calendar of events for Board Members; schedules and provides notice to ensure they are aware of meetings, events and other obligations related to their duties as members of the Board.
- Coordinates and prepares correspondence for the members of the Board and drafts appropriate responses to public inquiries.
- Provides PowerPoint presentations or other informational materials for presentations to or by members of the Board.
- Makes travel arrangements and coordinates submission of travel expenses for payment or reimbursement.
- Performs other related complex and confidential duties as required.

MINIMUM QUALIFICATIONS

The minimum qualifications to perform successfully in this position include graduation from an accredited four-year degree granting college or university in Public Administration or a related field and four years of extensive experience in an administrative support position. Demonstrated typing and computer related skills and the ability to communicate effectively orally and in writing. Experience in high energy firm managing multiple and complex tasks.

OR

Demonstrated and related work experience may be substituted on a year-for-year basis for the educational requirements.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: *Director of Guest Services*

POSITION OVERVIEW

Reporting to the Executive Vice President of Operations and Customer Service, this senior leadership position is crucial to Tampa International Airport's (TPA) overall guest experience. The Director of Guest Services is responsible for the planning, development, and implementation of key programs which enhance the airport guest experience. This position is responsible for the development and supervision of the Guest Services Team, as well as the Airport's Volunteer Ambassador Program, Airport Tour Program, and other community outreach programs that promote Tampa International Airport.

POSITION ACCOUNTABILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Provides strong leadership to all Department employees while promoting and maintaining strong employee morale. Leads by example and establishes strong trust based relationships with direct reports and employees.
- Identify and develop effective front line managers that are capable of engaging their employees, building trust and holding themselves and their direct reports accountable for results.
- Establish and communicate clear performance expectations and standards to all Department employees. Provide timely performance feedback to direct reports and other employees as needed.
- Create and maintain a rewarding and productive work environment.
- Establish leadership and overall direction of the Airport's Guest Services programs.
- Continue to grow and enhance the Volunteer Ambassador Program.
- Must maintain collaborative and productive relationships with internal departments and staff, airlines and tenants, representatives of the business community, civic organizations and other groups relevant to the Authority's business.
- Collaborate with US Customs and Border Protection, Airport Operations, Marketing and IT to enhance the international arrival experience for passengers.
- Ensure an exceptional guest experience for all specialized events within the Tampa Bay Area as the Airport is the guest's first impression and face of the region for many visitors. Previous specialized events in the Tampa Bay Area include Super Bowl, National College Football Championship, Democratic/Republican National Conventions, International Indian Film Academy (IIFA Awards).
- Responsible for tracking, analyzing, reporting, and handling of all guest compliments and complaints.

MINIMUM QUALIFICATIONS

Recommended Bachelor's Degree in Hospitality Management, Aviation Management, Business Administration or other related field. At least seven years of increasingly responsible customer-facing roles. Must be able to pass a pre-employment drug screen as well as complete and successfully pass the TSA badging and background process.

JOB SPECIFIC COMPETENCIES

- A visible and charismatic leader that is able to inspire and motivate employees, and is able to make difficult and sometime unpopular decisions.
- Results driven, possesses solid execution skills with a demonstrated track record of getting things done.
- Team player that is passionate with an ability to inspire others to follow.
- Visionary and forward thinking.
- Must possess a track record with proven results in enhancing guest experience.
- Creative and persuasive with an ability to conceive and implement new and innovative ideas.
- Ability to work in a fast-paced environment and effectively balance multiple competing priorities.
- Ability to make presentations to Executive level leadership and Board of Directors.

Tampa International Airport

Position Title: **Senior Manager of Guest Services**

POSITION OVERVIEW

Reporting to the Director of Guest Services, the Senior Manager of Guest Services is responsible for the implementation of key programs which enhance the airport guest experience. This position is responsible for the supervision, scheduling, and evaluations of the Guest Service Managers. The position will have oversight of the Volunteer Ambassador Program, Airport Tour Program, and temporary Customer Service Representatives (CSR) team. The incumbent will be called upon to assist in other community outreach programs that promote Tampa International Airport.

Reporting directly to the Senior Manager of Guest Services are the following positions:

- Guest Services Manager(s) (GSM)
- Volunteer Services Coordinator

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Provides strong leadership to Department Managers while promoting and maintaining positive employee morale. Leads by example by establishing strong trust based relationships with direct reports and employees.
- Identify and develop effective front line leaders that are capable of engaging their employees, building trust, and holding themselves and their direct reports accountable for results.
- Carry out and communicate clear performance expectations and standards to all Department employees.
- Provide timely performance feedback to direct reports and other employees as needed.
- Work with Director on establishing leadership and overall direction of the Airport's Guest Services program.
- Create and maintain a rewarding and productive work environment
- Research and conduct feasibility studies on additional services to enhance guest experience to include concierge and VIP services. Work collectively with partner airlines and TSA on TPA360 program for autistic travelers.
- Collaborate with US Customs and Border Protection, Airport Operations, Marketing, and IT to enhance the international arrival experience for passengers.
- Ensure exceptional guest experience for all specialized events as requested.

Leadership Qualities:

- Strong leadership, team-building and consensus-building skills required.
- Results driven, accountable and decisive with an ability to execute plans that are operationally sound.
- Visible, enthusiastic, and a high energy level.
- Strong interpersonal, oral and written communication skills.
- Strong analytical and problem resolution skills required.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree in Hospitality Management, Airport Operations/Management, Business Administration, or closely related field from an accredited college or university. The incumbent should possess exceptional leadership, communication and presentation skills. Successful candidate should possess an understanding of the airport customer experience and the ability to anticipate customer's needs in advance.

The incumbent should have a minimum of five years of progressively responsible experience at a medium or large HUB airport in customer experience and terminal operations or a large public facility.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Tampa International Airport

Position Title: Director of Human Resources

POSITION OVERVIEW

Reporting to the Vice President of Human Resources and Administration, this position is responsible for developing and implementing policies, plans, and programs to assure the most effective utilization of human resources to support the Aviation Authority's business objectives. Such programs are aimed at attracting, retaining, motivating and rewarding, and protecting employees within a framework of company philosophy and external laws and regulations.

The Director of Human Resources is responsible for daily Human Resources operations and for implementing the Authority's policies and programs relating to such activities as staffing, training, developing, deploying, compensating, motivating, protecting, communicating with, and releasing employees. The incumbent recommends new policies and programs in accordance with Authority objectives and external regulations, and upon approval of such plans, develops and directs their implementation. The incumbent also serves as an advocate of employee interests in the development of policies and procedures.

The Director of Human Resources maintains ongoing communications with union leadership and other external groups. The incumbent counsels staff and employees on specific personnel and labor relations problems and provides interpretation of the Authority's position on issues affecting them. The Director of Human Resources is an agent of cultural change management and innovation who initiates workforce solutions that reflect the Authority's mission and vision.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Administers the personnel policies and programs of the Authority and develops and recommends new ones to assure the effective utilization of human resources in support of the Authority's business objectives.
- May serve as the Authority's spokesperson with outside agencies in matters related to its employees (e.g. Equal Employment Opportunity Commission, Public Employee Relations Commission, Department of Veterans Affairs, etc.).
- Negotiates within available guidelines collective bargaining agreements.
- Ensures that effective training programs are provided for the development of all employees.
- Ensures that Authority's benefit programs are current and all employees are thoroughly informed of their benefits.
- Assists with preparation of annual HCAA personnel budget.
- Periodically reviews and updates classified and unclassified job descriptions to provide clarity of expectations for the position; establish clear criteria for hiring, evaluation, and promotion; and to reflect the evolving character of work of the position.
- Implements employee engagement programs.
- Manages daily operations of the Human Resources department.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a Bachelor's degree with an emphasis in a related field such as business, human resources, or psychology. The incumbent should have at least eight years' experience in human resources, with at least three years of experience at the Senior Manager level or above, and experience formulating company-wide human resource policy.

Department:	Human Resources and Administration
Pos. No:	00225
Pay Grade:	E6 ($103,700 – $215,600) – **Exempt**
Last update:	2/24/2018 Compensation

Desirable:

A proven record of managing organizational change, certification in the Society of Human Resource Management (SHRM) or other equivalent professional certification, experience negotiating collective bargaining agreements, experience in self-insured programs for employee benefits, knowledge of employee wellness programs, and experience integrating a performance based compensation system

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

POSITION OVERVIEW

The HR Business Partner (Talent Acquisition) serves a key strategic role in evolving and supporting the Authority's Human Resource recruiting process. The HR Business Partner will support the leadership and employees of the Authority business units through ongoing business transformation and growth. This position requires a hands-on, pro-active professional approach to creating and delivering day-to-day Human Resources and talent acquisition services and contributes to ensuring the Authority's culture, business requirements and organizational objectives are aligned. Plays an active role in ensuring the Authority's people strategy is conducive to attracting, developing, engaging and retaining talent at all levels within the organization. The HR Business Partner will provide value added analysis and interpretation of key recruiting and HR data metrics and will play an instrumental role in helping the Authority's business units meet their annual goal and objectives through its people resources.

POSITION ACCOUNTABILITIES

Accountabilities include but are not limited to duties across multiple HR disciplines such as talent acquisition, onboarding, compensation, and employee engagement and programs.

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

Talent Acquisition and Onboarding

- Develops and implements an effective, on-time recruitment and selection plan for assigned business units to fill open positions. Includes the development of a progressive search strategy using a diverse sourcing methodology to include use of social media sites where/when appropriate. Works with business unit managers through hiring process by providing full cycle recruitment support including posting, sourcing, interviewing, assessing and presenting a diversified and high quality pool for candidates to the hiring manager.
- Screens applications/interviews candidates for positions including exempt, non–exempt and temporary staff. Presents a pool of candidates for assigned searches that meet the criteria and qualifications identified by hiring managers and outlined in the job description. Refers qualified candidates to assigned departments for further evaluation and selection for in-office interviews.
- Maintains continuous communication with hiring managers, including organizing and leading "kick-off" meetings for new searches, and initiates regular search progress/updates. Reports communication breakdowns promptly to manager.
- Reviews and verifies recruiting requests from hiring managers and compares requests to department's budgeted headcount (FTE). Requests justification from hiring departments when required.
- Builds applicant sources by researching and contacting community services, staffing agencies, recruiters, and internet sites by providing organization information, opportunities, and information on benefits
- Reviews and updates job descriptions prior to posting to ensure content accurately reflects position responsibilities and requirements.
- Coordinates the job posting system and ensures all positions are properly requisitioned and posted in a timely manner. Ensures posted notices match the job description and reviews relevant posting for eligibility.
- Schedules new hires for processing, new hire orientation and security training.
- Research and identify outside recruiting agencies to assist in searches when required. Builds effective professional networks locally and regionally to leverage in filling positions.
- Conducts research on job descriptions and compensation to make salary recommendations for new hires, promotions, lateral transfers, etc. to assist with recruiting and re-aligning of internal resources.
- Builds relationships with compensation professionals within the community, and other like organizations (i.e., other airports, public agencies, etc.) to assist with research of job and work requirements, structural and functional relationships among job and occupational trends.

- Prepares, reviews and submits job descriptions for creation or reclassification of positions for assigned business units.
- Prepares written communication to new hires and current employees regarding compensation and benefits.

Employee Relations and Labor Relations

- Conducts/oversees timely employee/labor relations investigations, prepares summary documentation and makes recommendations for assigned business units
- Provides consistent interpretation, advice and counsel to managers and employees on interpreting and applying policies and procedures to resolve employee relations concerns related to recruitment, compensation, disciplinary action(s), conflict resolution and grievance responses. Consults with SR. Business HR Partner for more complex cases
- Supports key HR processes for managing the performance evaluation and management process and leadership and employee development.
- Ensures hiring standards are in compliance with Authority standards, state and federal regulatory requirements and employment laws
- Manages Family and Medical Leave Act (FMLA) administrative processing submitted forms and assisting supervisors and payroll tracking FMLA time.

Benefits & Wellness

- Assists with managing the Authority's Benefits programs providing general assistance to employees regarding insurance questions, worker's compensation, wellness and other types of employee reimbursement programs.
- Evaluates, negotiates and administers benefit plans to maximize the quality of Authority offered benefits, including analyzing proposals through the Request For Proposal (RFP) process; provide recommendations to Executive Management and prepare board agenda items.
- Manage Benefits annual open enrollment for all insurance plans, to include rate changes to retirees, and implements all changes.
- Provides assistance to employees regarding insurance appeals. Interacts with physicians, hospitals and billing agents to resolve complex claims issues, while complying with Health Insurance Portability and Accountability Act (HIPAA) requirements as they pertain to highly confidential information.
- Participates in planning of employee recognition programs such as service recognition, employee meetings, health fair, and training and/or information sessions involving HR topics such as FRS, ICMA, deferred compensation, etc.
- Coordinates with payroll to ensure employee data changes (name changes, marital status, removal of dependents, etc.) are accurate for employees and retirees, including billing reconciliations with insurance carriers when needed.
- Explains benefits to new employees through new employee orientation and one-on-one meetings; assists employees as necessary in understanding their benefits.
- Completes mandatory annual insurance surveys as required by the State of Florida and other various surveys (insurance, salary, benefits, etc.) as needed.

Other

- Works actively with HR Business Partner (Employee Engagement) to advise and assist on the coordination of events, employee programs, community service projects and other program(s) and events aimed at maintaining a positive culture with the Authority and Tampa Bay community.

MINIMUM QUALIFICATIONS

- Graduation from an accredited four year degree granting college or university with a Bachelor's degree in Business Administration/Management, Public Administration, or a Social or Behavioral Science.
- Five (5) years previous experience in one or more Human Resource disciplines with at least 3 years of high level project management experience

- Experience using analytics, metrics and reporting to drive success individually and within a mid to large size organization.
- Minimum 5 years experience building effective beginning-to-end, progressive recruiting strategies that use an array of sources that include social media channels.

JOB SPECIFIC COMPENTENCIES

- Ability to conduct research, collect and interpret data and develop logical conclusions.
- Ability to evaluate the effectiveness of sourcing strategies and recruitment processes.
- Demonstrated ability to design and execute an effective candidate screening, evaluation and selection process.
- Demonstrated ability to consult with leadership regarding staffing needs and decisions.
- Excellent oral and written communication skills.
- Must possess strong evaluation, assessment and decision-making skills.
- Must possess a strong computer skills with MS Office Suite (Word, Excel, PowerPoint, Access, Outlook and Publisher)
- Authority may require possession of a valid Driver License.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Tampa International Airport

Position Title: *Vice President, Human Resources & Administration*

POSITION OVERVIEW

The Vice President of Human Resources will provide strategic leadership the Human Resources, Risk Management and Administrative teams for the Aviation Authority. In addition, will provide management, leadership and direction to the HR senior management staff and serve as the senior level advisor to executives regarding human resources trends. The incumbent also helps to ensure the Authority's compliance with the Florida sunshine and public records laws, financial disclosure requirements and voting conflict standards and disclosures.

The Vice President of Human Resources will drive organizational effectiveness by providing leadership in the development and implementation of policies, plans, and employee programs to ensure the most effective utilization of the Authority's human resources to support business objectives. Programs will be aimed at attracting, retaining, motivating and rewarding, and protecting employees within a framework of the Authority's philosophy and external employment laws and regulations. Will be responsible for maintaining ongoing communication with union leadership and other external groups. The incumbent counsel senior level staff and employees on specific personnel and labor relations issues and provides interpretation of the Authority's position. Will serve as an agent of cultural change management who initiates workforce solutions that reflect the Authority's mission and vision.

POSITION ACCOUNTABILITIES

- Administers the personnel policies and programs of the Authority and develops and recommends new ones to assure the effective utilization of human resources in support of the Authority's business objectives.
- Serves as the Authority's chief spokesperson with outside agencies in matters related to its employees (e.g. Equal Employment Opportunity Commission, Public Employee Relations Commission, Department of Veterans Affairs, etc.).
- Negotiates collective bargaining agreements.
- Ensures that effective training and development programs are provided for the development of all employees.
- Ensures that Authority's benefit programs are current and all employees are thoroughly informed of their benefits.
- Prepares annual HCAA personnel budget.
- Periodically reviews job/position descriptions to provide clarity of expectations for the position; establish clear criteria for hiring, evaluation, and promotion; and to reflect the evolving character of work of the position.
- Implements employee engagement programs.
- Acting as a resource for the Central Records department as necessary to ensure compliance with public records laws.
- Participating in the Human Resources department's investigations into allegations of harassment, discrimination and/or retaliation, as necessary.

Reporting to the Vice President of Human Resources & Administration are the following positions:

- Senior Managers – Three (3)
- The Human Resources department has a total of nine (9) FTEs.

MINIMUM QUALIFICATIONS

The Vice President of Human Resources and Administration will need a Bachelor's degree with an emphasis in a related field such as business administration or management, human resources, or psychology. The incumbent should have at least eight (8) to ten (10) years of experience in human resources, including experience formulating company-wide human resource policy.

Desirable:

A proven record of managing organizational change, certification in the Society of Human Resource Management (SHRM) or other equivalent professional certification, experience negotiating collective bargaining agreements, experience in self-insured programs for employee benefits, knowledge of employee wellness programs, and experience integrating a performance based compensation system

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

The Risk and Claims Manager performs supervisory and administrative work reviewing and ensuring that contractors, subcontractors, vendors, suppliers and tenants doing business with the Aviation Authority have sufficient insurance coverage. Obtains and maintains underwriting information for Authority procured insurance coverages. Adjusts, reviews and negotiates property, automobile, liability and workers' compensation claims on behalf of the Authority. Assists in implementing loss prevention/inspection programs including, safety training, safety committee facilitation, as well as OSHA and SMS compliance. The position also performs a wide range of supervisory duties supporting the Authority's Risk and Insurance Program including overseeing the administrative function of the Risk Management support team.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Assists in the review of contracts, procurement solicitations, leases, and other agreements to verify/revise insurance language and establish threshold insurance limits.
- Tracks and ensures that contractors, subcontractors, vendors, suppliers and tenants comply with insurance requirements throughout the contractual term and period of exposure to loss.
- Collects, updates and maintains underwriting data for the annual insurance policy renewal process.
- Assists with the maintenance of claims log and monitors processing of general liability, auto liability and property and casualty insurance claims to ensure accurate and timely adjudication and settlement.
- Assists with the investigation of incidents that could result in compensatory events with insurance companies.
- Oversees, investigates, collects and coordinates the adjudication of bodily injury and property damage claims by or against the Authority.
- Verifies performance and payment bonds with issuing institution/bank
- Supports efforts to control and plan for institutional risks
- Supports Airport Safety initiatives, including participation on the Safety Committee, safety training and procedures
- Conducts facility inspections when necessary
- Updates and facilities implementation of risk management policies, procedures and forms
- Oversees the administrative function and processes of the Risk Management Support staff
- Performs related work as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four-year degree granting college or university preferred, but experience in risk management, insurance, claims adjusting, safety, risk reduction, or an equivalent combination of experience may substitute for educational requirements. Must be able to pass a mandatory FBI background screening as required by TSA standards. Experience with PROPworks® Property and Revenue Management System, risk management information system(s), or holding an insurance-related license is a plus. May be subject to a credit check.

Position Title: Audit Manager

POSITION OVERVIEW

Performs highly responsible supervisory and administrative or project management work auditing various highly complex financial or program operations in departments and agencies, external government organizations and commercial firms with whom contractual relations exist to ensure proper procedural compliance.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supervises the work of subordinate staff by scheduling, assigning and reviewing work, providing training and counseling and evaluating performance.
- Plans, directs, organizes and coordinates the work of subordinate professional auditors engaged in highly complex auditing of assigned organizational and functional activities.
- Plans and determines the focus and direction of specific audits; assists in formulating an annual audit plan; plans the objectives, approach, scope and work program to accomplish audit objectives in accordance with professional and departmental standards and within time constraints.
- Oversees highly complex audit activities and work progress; provides direction on proper documentation techniques, data gathering, analysis methods, and quality and quantity of audit documentation.
- Reviews and evaluates completed work, findings and recommendations for accuracy, adequacy and presence of sufficient supporting documentation; assures that working papers support findings and conclusions and are in accordance with professional and departmental standards.
- Obtains, analyzes and appraises evidentiary data in support of audit objectives, conclusions and findings.
- Participates in audits of highly technical or complex areas to determine the adequacy and effectiveness of management controls, effectiveness and efficiency of activities under review, and compliance with policies, procedures, laws and regulations.
- Evaluates audit findings for inclusion in audit reports; distinguishes critical and noncritical matters when assessing the significance of deficiencies and making recommendations for improvement.
- Regularly informs management of auditing progress and/or technical problems; conducts periodic project status meetings with staff; prepares administrative reports regarding job scheduling and assigned activities.
- Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a major in Accounting, Business Administration or Public Administration; and

Possession of a current Certified Public Accountant (CPA) license or Certified Internal Auditor (CIA) license; and

Three years of supervisory or project management experience as a professional Auditor.

Or

An equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Extensive knowledge of the special principles, practices and procedures of auditing pertaining to financial and program operations of County departments, external companies, contractors and grantees having contractual relationship with the County.
- Extensive knowledge of the principles of governmental accounting, business and public administration.
- Extensive knowledge of local, state and federal laws, ordinances and regulations pertaining to fiscal management of government agencies.
- Extensive knowledge of the organization and operations of departments and agencies assigned for audit.
- Extensive knowledge of professional and departmental standards for the conduct of comprehensive auditing programs.
- Extensive knowledge of the provisions of various contracts between the County and external companies and contractors.
- Considerable knowledge of supervisory principles and practices.
- Ability to plan the objectives, approach, scope and work plan to accomplish audit objectives in accordance with professional and departmental standards.
- Ability to direct and coordinate the work of an auditing staff to achieve audit objectives within projected time constraints.
- Ability to analyze and interpret accounting data, devise audit procedures and techniques, and evaluate completed audit reports.
- Ability to determine the adequacy and effectiveness of management controls over operational activities.
- Ability to exercise judgment and discretion in evaluating audit findings for critical and non-critical matters.
- Ability to plan, organize and supervise the work of others.
- Ability to communicate clearly and concisely, orally and in writing.
- Ability to work effectively with others.
- Ability to use a computer and related software.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

POSITION OVERVIEW

Reporting to the Chief Executive Officer, this position is responsible for conducting audits and performance assessments necessary to assure the Authority's board and management that organizational goals and objectives are met efficiently and economically.

The Director of Internal Audit, subject to review by the Audit Committee, identifies the audit universe and develops a risk-based audit plan to ensure audit resources are utilized in those areas most warranting attention. The audit plan encompasses all facets of auditing and performance assessment. The incumbent formulates and develops internal auditing policies and practices regarding procedural, operational, and financial issues. The incumbent assists in the development of performance measurement standards and oversees performance audits of the Long-Term Strategic Initiatives as adopted by the HCAA Governing Board and executive management.

The Director of Internal Audit directs the internal audit staff, establishes policies and performance standards for the departmental activities to ensure the adequacy and effectiveness of the assurance function. The incumbent will review audit reports and when necessary participate in planning and post audit conferences to formulate viable improvement recommendations to the Audit Committee and Executive Director.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Development and maintenance of the departmental budget.
- Development of an annual risk-based audit plan.
- Participate with the Audit Committee and external auditors (financial or performance) to coordinate Internal Audit's participation during the external engagement and to monitor management's corrective action of findings.
- Conduct managerial audits to ensure the means used to accumulate financial-operational data result in complete, accurate, timely, reliable, and relevant information.
- Conduct operational audits to ensure control systems are in place to safeguard Authority assets and that assets are employed with optimal economy and efficiency.
- Assist management in identifying, establishing and monitoring departmental performance measurement benchmarks and standards.
- Conduct process flow audits to analyze activities and functions outside of acceptable performance limits to assess causal effects and remediation options.
- Prepare reports detailing departmental performance statistics, positive and negative deviations from established benchmarks, management's commentary regarding unfavorable deviations, and the corrective action plan developed by management to rectify unfavorable deviations.
- Compliance audits to ensure functional activities are conducted according to plans, policies, procedures, laws, and regulations.

- Investigate and document allegations of misappropriation to determine wrongdoing, identify parties involved, quantify loss, provide recommendations for criminal or civil prosecution, and testify on the Authority's behalf at court proceedings.
- Evaluations of audits to ensure audits are conducted according to generally accepted government audit standards.
- Establish an appropriate internal quality control system and achieve a satisfactory compliance rating on all external quality control reviews.
- Follow-up on audit findings to ensure adequacy and timeliness of corrective action.
- Proficiency in and knowledge of the profession, including generally accepted government auditing and accounting standards and changes in financial reporting requirements and in laws and regulations promulgated by governmental agencies.
- Participation at professional seminars, classes, and meetings.
- Promotion of the airport audit function by participating in Authority functions and professional organizations.
- Satisfactory interpersonal relationships with auditors, auditees, management, and the Audit Committee.
- Report to the Audit Committee regarding departmental activities.

MINIMUM QUALIFICATIONS

The minimum qualifications required to perform successfully in this position are: a Bachelor's degree in Accounting, Business Administration or Public Administration. A minimum of six years audit experience is required; at least four years of required experience must be as an audit supervisor. International airport and governmental audit experience is preferred. Experience should reflect a demonstrated knowledge and thorough understanding of current audit standards and practices. CPA and/or CIA required.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: *Senior Administrative Assistant (Internal Audit)*

POSITION OVERVIEW

Reporting to the Director of Operations, the Senior Administrative Assistant is responsible for a wide variety of administrative duties supporting the leadership team of the Tampa International Airport Operations Department. The leadership team includes the Director of Operations as well as Senior Managers and can also include other members of operations management team. This position may make screening phone calls, travel arrangements, complete expense reports and is responsible for organizing the calendars of several Operations Leadership members. This position requires strong organization skills and extreme need for confidentiality. Additionally, the Senior Administrative Assistant may be asked to assist with ongoing project coordination of the Operations Team or company-wide initiatives. Interpersonal skills at all levels of management, and comfort in interacting with upper management is a must.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Independently performs a wide variety of paraprofessional administrative, secretarial and confidential functions and duties supporting the Operations Team.
- Serves as an Executive Assistant back up to the Vice President of Operations as necessary
- Independently determines for the Director of Operations priority status and special attention to important matters received or observed, such as incoming postal mail, email, correspondence, statements, face-to-face meetings, phone calls and internal staff actions.
- Manages and closely monitors Director of Operations; schedules and coordinates appointments, conferences and itineraries; makes travel and lodging arrangements; completes expense reports using Oracle.
- Initiates and schedules tentative appointments for Operations Leadership team members; works with procurement and legal departments to secure or reserve venues if necessary, coordinates attendees; assembles handout materials, slideshow presentations and equipment.
- Reviews outgoing correspondence for internal consistency and proper conformance with administrative policies, approvals and signatures, as well as formatting, grammatical construction and typographical errors.
- Initiates and composes agendas, minutes, correspondence, memos, spreadsheets, logs, invoices, and reports in final form, for approval or signature from the Director of Operations as needed.
- Interprets, recommends and implements improvements to administrative policies and internal workflow procedures.
- In the Director of Operation's absence, ensures that requests for action or information are completed or referred to appropriate staff member or area of responsibility; determines whether the Director of Operations or next level leadership member should be notified of high-priority or emergent matters.
- Working in collaboration with other Operations team members, makes recommendations and advises Director of Operations on budgetary matters concerning office expenditures, such as equipment and supplies and monetary benefits, such as payroll, salary, and overtime.
- Will have access to secured and confidential information and it is important that this role secures and monitors restricted, sensitive and confidential records or information to include but not limited to records involving-personnel, payroll, medical, performance or disciplinary.
- May prepare and distribute outgoing email and correspondence on behalf of Director of Operations as authorized.
- May serve as representative and liaison for Director of Operations by disseminating directives, instructions, assignments and following-up on the status of time sensitive items within the department or agency.
- May meet with customers, special interest groups, high-ranking officials, and others on behalf of Director of Operations; or other professional staff, committee, council or board members.
- Performs other related duties as required.

Department:	Internal Audit
Pos. No:	141006

- Ability to effectively lead or supervise lower level administrative/clerical and administrative/secretary staff.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

The position of Senior Internal Audit Manager performs highly responsible supervisory and administrative or project management work auditing various highly complex financial or program operations in departments and agencies, external government organizations and commercial firms with whom contractual relations exist to ensure proper procedural compliance.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Supervises the work of subordinate staff by scheduling, assigning and reviewing work, providing training and counseling and evaluating performance.
- Plans, directs, organizes and coordinates the work of subordinate professional auditors engaged in highly complex auditing of assigned organizational and functional activities.
- Plans and determines the focus and direction of specific audits; assists in formulating an annual audit plan; plans the objectives, approach, scope and work program to accomplish audit objectives in accordance with professional and departmental standards and within time constraints.
- Oversees highly complex audit activities and work progress; provides direction on proper documentation techniques, data gathering, analysis methods, and quality and quantity of audit documentation.
- Reviews and evaluates completed work, findings and recommendations for accuracy, adequacy and presence of sufficient supporting documentation; assures that working papers support findings and conclusions and are in accordance with professional and departmental standards.
- Obtains, analyzes and appraises evidentiary data in support of audit objectives, conclusions and findings.
- Participates in audits of highly technical or complex areas to determine the adequacy and effectiveness of management controls, effectiveness and efficiency of activities under review, and compliance with policies, procedures, laws and regulations.
- Evaluates audit findings for inclusion in audit reports; distinguishes critical and noncritical matters when assessing the significance of deficiencies and making recommendations for improvement.
- Regularly informs management of auditing progress and/or technical problems; conducts periodic project status meetings with staff; prepares administrative reports regarding job scheduling and assigned activities.
- Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a major in Accounting, Business Administration or Public Administration; and possession of a current Certified Public Accountant (CPA) license or Certified Internal Auditor (CIA) license; and three years of supervisory or project management experience as a professional Auditor; OR

A Master's Degree from an accredited college or university with a major in Accounting, Business Administration or Public Administration; and Possession of a current Certified Public Accountant (CPA) license or Certified Internal Auditor (CIA) license; and Two years of supervisory or project management experience as a professional Auditor.

JOB SPECIFIC COMPENTENCIES

- Extensive knowledge of the special principles, practices and procedures of auditing pertaining to financial and program operations of County departments, external companies, contractors and grantees having contractual relationship with the County.
- Extensive knowledge of the principles of governmental accounting, business and public administration.
- Extensive knowledge of local, state and federal laws, ordinances and regulations pertaining to fiscal management of government agencies.
- Extensive knowledge of the organization and operations of departments and agencies assigned for audit.
- Extensive knowledge of professional and departmental standards for the conduct of comprehensive auditing programs.
- Extensive knowledge of the provisions of various contracts between the County and external companies and contractors.
- Considerable knowledge of supervisory principles and practices.
- Ability to plan the objectives, approach, scope and work plan to accomplish audit objectives in accordance with professional and departmental standards.
- Ability to direct and coordinate the work of an auditing staff to achieve audit objectives within projected time constraints.
- Ability to analyze and interpret accounting data, devise audit procedures and techniques, and evaluate completed audit reports.
- Ability to determine the adequacy and effectiveness of management controls over operational activities.
- Ability to exercise judgment and discretion in evaluating audit findings for critical and non-critical matters.
- Ability to plan, organize and supervise the work of others.
- Ability to communicate clearly and concisely, orally and in writing.
- Ability to work effectively with others.

POSITION OVERVIEW

This position will be engaged in professional audio visual support work which is tier 1 to tier 2 in nature in the ITS (Information Technology Services) Department including intermediate technical support of AV hardware and software in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on AV related projects of intermediate scope and complexity. Employees in this class are expected to support the resolution of intermediate work problems and tasks under limited supervision in one or more of the following areas: audio visual, service desk support, desktop and peripheral support, mobile device support, application support and network support. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Client & Field Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates intermediate knowledge in at least one of the departmental section disciplines: audio visual management, network management, desktop management, mobile device management, server management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skills are required for this role:

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Basic skill in managing personal daily activities and tasks for self.
- Basic skill in the use and application of reference materials to support resolution of basic and intermediate desktop issues.
- Basic skill in the application of theory in desktop
- Basic skill in applying new technologies, soft skills and procedures.
- Basic ability to mentor teammates; work within teams to achieve success with others
- Ability to prepare and deliver effective section-level presentations at various levels.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Advanced Experience in supporting currently installed audio visual equipment to ensure functionality.
- Advanced to replace audio visual installed across the facility
- Experience in the design of audio visual equipment to meet customer needs
- Basic understanding of audio visual programming to deliver video content
- Ability to support high level meetings from an audio visual perspective and trouble shoot as needed

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Four years of information technology experience in intermediate support of hardware and software utilized to enhance live events such as microphones, displays/signage, video recording, projects, lighting and sound mixing equipment.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: AV industry certifications preferred but not required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs desktop hardware and software, as well as peripherals and cabling

- Assists a more senior team member in performing technical support in a formal or informal Service Desk settings to end users with common hardware and software problems, which includes logging, troubleshooting, resolving and escalating issues to the appropriate ITS resources.
- Intermediate skill in managing personal daily activities and tasks for self.
- Intermediate skill in use and application of reference materials to support resolution of standard problems.
- Intermediate skill in the application of theory in resolving problems.
- Intermediate skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.

- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Cisco switching environments
- Knowledge of Cisco routers, Wireless and Voice over Internet Protocol
- Knowledge of IP schemas and subnetting
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of device monitoring through tools such as Cisco Prime LMS, SolarWinds and Cisco Prime Infrastructure
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of Cisco Unified Communication Manager
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Four years of information technology experience in intermediate support of switches, routers, firewalls, controllers, access points, network appliances and monitoring tools.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA Network+ or Cisco CCNA required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

POSITION OVERVIEW

The Aviation Authority at Tampa International Airport is looking for a results driven leader to join their IT staff as the IT Service Desk Manager. Through a hands-on approach, the IT Service Desk Manager is a high customer service driven, and detail oriented individual responsible for ensuring that IT services are provided and supported effectively and efficiently, with the primary emphasis on meeting and exceeding customer expectations. The IT Service Desk Manager will oversee the day-to-day operations of the IT Service Desk Team, while providing technical support and solutions for internal and external customers. Responsibilities include incident prioritization, resolution of end user requests, reporting, ITIL incident management best practices, and socialization of these procedures to IT and supported customers. Incumbent will be expected to demonstrate leadership ability during high-pressure situations, while interacting with customers, peers, escalation teams, and executive leadership via phone, email, self-service and walk-in contact methods. This position is subject to afterhours on-call support and varying schedules per the business need.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Oversight of all Service Desk activities, including day-to-day operations and staff scheduling
- Leverages experience and ITIL best practices to ensure that Service Desk processes are efficient and repeatable
- Collaborates with internal teams and customers to increase first level/first contact resolution
- Provides Service Desk reporting metrics to drive continuous improvement and innovation and to evaluate customer experience, service levels, technician productivity and efficiency
- Ensures all customer communications are timely, consistent and clear
- Ensures all Service Desk processes, procedures and business standards are centrally stored, clearly understood and followed
- Continuous monitoring and administration of all department ticketing activities to ensure all tickets are assigned, properly notated, escalated and updated consistently

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a major in Computer Science; and four (4) years of direct hands-on experience managing a service desk in a medium or large organization. Preference for applicant to have ServiceNow knowledge and experience.

Substitution: Graduation from high school or possession of a GED certificate; and 6 years of experience managing desktops for a medium to large organization. The ideal candidate will also have Microsoft MCSA, MCSE, or MCITP certification.

JOB SPECIFIC COMPENTENCIES

- Proven work experience as a service supervisor or manager
- Strong business acumen and communication skills
- Demonstrated technical knowledge of typical tier 1 and 2 support subjects including computer systems, mobile devices and other technical products and services
- Advanced knowledge of remote desktop applications and service desk tools and software
- Advanced knowledge of service desk operations, processes, reporting and methodologies
- Knowledge of service desk phone system features and operations
- Demonstrated experience in leading and mentoring service desk staff
- Ability to collect, organize and evaluate data and make logical decisions

POSITION OVERVIEW

Reporting to the Senior Manager, Enterprise Service Delivery, this position is responsible for the day to day application administration and support of technology solutions at the Authority. This includes monitoring processes, checking logs, and troubleshooting and resolving Help Desk tickets. The position will also be a key resource in the deployment of new functionality within the existing applications and new applications.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Discusses Oracle and PropWorks report requirements and data availability with users; discusses system impact with appropriate functional areas; advises users on the feasibility of converting to automated systems and assists in formulating objectives.
- Analyzes, plans and designs computer applications including the preparation of all levels of program flow charts, forms, procedures, documentation and system configuration.
- Tests programs, analyzes output, and ensures modifications are made as necessary to meet objectives.
- Maintains and modifies existing systems (Oracle database and applications, Propworks, FASGov, EiS) to support user needs. This includes, but is not limited to, cloning test and development instances for planning and testing of new applications or functionality of existing applications.
- Evaluates new technological innovations in relation to Oracle and related applications using the Oracle database and makes recommendations to management.
- Acts as liaison between department or agency and hardware maintenance and support organizations, such as My Oracle Support, PropWorks product support and EiS product support. Performs other related duties as required.

MINIMUM QUALIFICATIONS

An Associate's or higher degree from an accredited college or university in data processing or related field; two years Oracle Database Administration; knowledge and understanding of SQL. Linux experience helpful but not required.

Substitution: graduation from high school or possession of a GED certificate; and four years' experience as reflected above.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental

disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional work which is standard in nature in the ITS (Information Technology Services) Department including tier 1 technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. Employees in this class are expected to support the resolution of routine work problems and tasks under limited supervision in one or more of the following areas: service desk support, desktop and peripheral support, mobile device support, application support and network support. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Service Desk Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates intermediate knowledge in at least one of the departmental section disciplines: network management, desktop management, mobile device management, server management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skills are required for this role:

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Advanced skills in managing personal daily activities and tasks for self.
- Advanced skills in the use and application of reference materials to support resolution of basic and intermediate desktop issues.
- Advanced skills in the application of theory in desktop
- Advanced skills in applying new technologies, soft skills and procedures.
- Ability to mentor teammates; work within teams to achieve success with others
- Ability to prepare and deliver effective section-level presentations at various levels.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.

- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Intermediate knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of systems analysis, development, project planning, and documentation methods and standards.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others
- Advanced ability to understand and trouble shoot the currently supported Windows operating systems
- Advanced skills in trouble shooting Microsoft Office products
- Advanced skills in desktop software installation
- Advanced Skills in problem documentation
- Ability to enhance and utilize problem knowledge base

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.
Experience: Four years of applicable information technology experience in user support of desktops, applications, mobile devices, printers, peripherals and cabling.
Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.
Licensure and/or Certification: CompTIA A+, CompTIA Network+ and Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs desktop hardware and software, as well as peripherals and cabling
- Assists team members in performing technical support in a formal or informal Service Desk settings to end users with common hardware and software problems, which includes logging, troubleshooting, resolving and escalating issues to the appropriate ITS resources.
- Intermediate skill in managing personal daily activities and tasks for self.
- Intermediate skill in use and application of reference materials to support resolution of standard problems.
- Intermediate skill in the application of theory in resolving problems.
- Intermediate skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, intermediate problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.

Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Vice President of Information Technology (IT), this position will manage a wide variety of business office functions supporting the Vice President and his Senior Leadership team at the Tampa International Airport. The IT Business Office Manager will be responsible for data collection and coordination of the department's budget and considered the liaison for IT. The incumbent will manage the execution of the IT department's purchase orders and requisitions, expense reporting and invoice processing. The ideal candidate will have at least two years of office management and executive administrative experience, exceptional organizational and project management skills, as well as critical thinking and problem solving ability. May be tasked with ongoing project coordination of department and/or Authority-wide initiatives. Interpersonal skills at all levels of management, and comfort interacting with senior management is a must.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Independently performs a wide variety of office management and project focused duties supporting a Vice President of IT, IT Director and Senior Managers.
- Manages and closely monitors department budget and forwards monthly updates to IT leadership; coordinates quarterly reviews and budget meetings and acts as the department's liaison to the Finance and Procurement departments.
- Independently determines priority status for the Vice President's calendar giving special attention to requests that reference important matters received or observed, such as incoming communications *(email, correspondence, statements, face-to-face meetings requests, phone calls and internal staff actions)*.
- Initiates purchase orders and/or requisitions, processes incoming invoices for department and/or project specific work.
- Interprets, recommends and implements improvements to IT's administrative policies and procedures as well as internal workflow procedures.
- Initiates and composes agendas, meeting minutes, general business correspondence, memos, spreadsheets, logs, invoices, and reports in final form, for approval or signature of VP and Directors.
- Reviews correspondence for consistency and compliance with administrative policies and procedures, approvals and signatures, as well as formatting, grammatical construction and typographical errors.
- Manages the coordination of special events and conference meetings; prepares presentation materials and provides summary and/or action reports for the VP of IT.
- Participates in Authority meetings related to IT activities.
- Secures and monitors restricted, sensitive and confidential records or information to include but not limited to records involving personnel, payroll, medical, performance or disciplinary.
- Tracks, monitors and manages office supply inventory and approves general supply orders.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Bachelor's degree in Business Management, Business Administration, and at least two (2) years supervisory and/or administrative office management experience to include contract monitoring and vendor relationship management or an equivalent combination of related experience, training and education necessary to perform successfully in the role.

Department:	Information Technology
Pos. No:	00361
Pay Grade:	E3 ($65,500 - $136,200)
Last update:	03/21/2018

JOB SPECIFIC COMPENTENCIES

- Experience with Oracle expense reporting a plus.
- Advanced knowledge of Microsoft Word, Power Point, Excel and Visio required.
- Knowledge of executive administration, such as word processing, managing files and records, transcription, designing forms and other related procedures.
- Knowledge of the structure and content of the English language, including the meaning and spelling of words, rules of composition and grammar.
- Knowledge of principles and processes for providing customer service, such as assessing customer needs, meeting quality standards for service, and evaluating customer satisfaction.
- Knowledge of the access, storage, destruction and release of restricted, sensitive and confidential information, and applicable guidelines.
- Knowledge of budget management.
- Ability to communicate effectively orally and/or writing.
- Skill in project management and organization.
- Skill in using logic and reasoning to identify complex problems and evaluate and implement alternative solutions, conclusions or approaches.
- Ability to initiate projects and presentations based on department needs.
- Ability to use discretion and independent judgment in evaluating information.
- Ability to serve the public and represent the department director or agency head with courtesy and professionalism.
- Ability to effectively lead or supervise lower level administrative staff and interns.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Tampa International Airport is seeking an outstanding individual to lead, direct and provide technical guidance for the Authority's business and financial applications systems. Reporting to the Assistant Vice President of Information Technology Services, this position will provide leadership, vision and direction to the applications group to ensure its contribution to the Authority meeting its strategic goals. The Director of IT Applications will be responsible for the day-to-day management of the applications group including staffing, budgeting and other relative management functions and will be accountable for optimizing the cost, risk and value of applications throughout their life cycle.

This position requires an in depth understanding of IT applications and the service and support required of those applications. The incumbent must have knowledge and experience with the implementation and upgrading of IT applications, reporting practices applicable to applications as well as the costs and risks associated with their use. The Director of IT Applications will be responsible for ensuring the applications procured and/or utilized by the Authority cost-effectively meet the needs of the business as a whole. Must be familiar with commonly used IT technology and have knowledge of software development lifecycles, IT operations, data center operations, IT project management methodologies, IT hardware/software architectures and IT auditing and compliance practices. Ideally, the incumbent should be able to prepare and present complex information technology application concepts and reports to a wide range of technical and non-technical stake holders. Must demonstrate capability and passion for innovation to meet the growth demand of the Authority's business, and ability to conceptualize new ideas for continuous improvements.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Oversees the assessment of the technical and business fitness of the Authority's business applications portfolio as well as their associated costs and risks.
- Collaborates with IT managers, staff and stake holders to define a prioritized set of business outcomes and application work to accomplish those outcomes within the limitations of the projects budget.
- Directs the systems analysis, programming and project management activities of system-wide ERP core applications systems and Authority database management systems and non-enterprise, departmental application systems.
- Leads system-wide initiatives to improve efficiency and effectiveness of the Authority's business processes in accordance with priorities and directions negotiated and discussed with various leadership groups.
- Recognizes and advances opportunities for the utilization of the Authority's information technology investments.
- Reviews and approves all systems development project requests, and coordinates schedules and related departmental activities.
- Provides overall direction and guidance to assigned senior project team members; supervises professional staff.
- Prepares activity and progress reports regarding all systems analysis and programming areas.
- Collaborates with other Information Technology management staff regarding enterprise and system-wide computer architecture, capacity, planning, security and usage.
- Oversees the formulation of business applications project objectives and system development requirements.
- Creates and manages the enterprise applications budget and provides input in the administration of related budgets.
- Formulating and implementing application developments security standards in partnership with the Information Security Office to ensure the Authority's applications are effectively secured and that risks are mitigated.

- Overseeing support activities in conjunction with IT Infrastructure and Operations to ensure the applications perform well in testing and production.
- Directs, leads and mentors applications group personnel, providing development opportunities to enhance their skills in order to meet the needs of the Authority.
- Develop and enhance methodologies and practices for the application life cycle management in line with best practices and practical experience of continuous improvement.
- Leads vendor/software package selection/evaluation and implementation. Engages with Procurement and Legal for contract management and guidance
- Contributes to the overall technology strategy, architecture and process improvements for the Authority.

MINIMUM QUALIFICATIONS

Bachelor's degree in Information Systems, Computer Science, Management Information Systems, Computer Engineering, or other related discipline. At least seven (7) years of professional experience in relevant information technology leadership roles.

JOB SPECIFIC COMPENTENCIES

- Knowledge of information technology designs, setups, installation, implementation and maintenance.
- Knowledge of security issues, crisis management and business continuity; and legal issues regarding technology.
- Knowledge of software life cycle activities.
- Knowledge of driving new continual improvement to IT's strategies in response to the Authority's evolving needs.
- Knowledge of business case analysis.
- Knowledge of costing, budgeting (development and management), risk and financial analysis.
- Knowledge of quality assurance concepts and procedures.
- Excellent verbal and written communication skills, interpersonal relationships, leadership and management principles and decision-making abilities.
- Enterprise Applications experience, accountable for customer satisfaction.
- Experience in areas such as opportunity prospecting, proposal development, proposal presentation.
- Experience working with multiple units and/or organizations, building relationships, and with highly collaborative projects.
- Experience in evaluating programs and thinking strategically about future directions for IT.
- Strong project management skills including management of multiple projects, and concept development.
- Skill in defining program objectives and establishing information technology standards, policies, and budgets.
- Skill in analyzing and improving operational effectiveness.
- Skill in program development, analysis, and strategic planning.
- Skill in managing the work of others, including leading and motivating managerial staff.
- Excellent written and oral communication and conflict resolutions skills
- Ability to work with Senior Executives.
- Ability to plan, establish, manage, and evolve applications systems and solutions in support of the Authority's strategic objectives and success.
- Ability to perform skills gap analysis, and develop solutions to fill those gaps

- Complies and enforces IT security policies including PCI compliance.
- Troubleshoots network outages quickly to ensure desired uptimes.
- Performs Cisco IOS upgrades and standard patching using Cisco Prime LMS.
- Monitors network devices using various tools such as Cisco Prime LMS, SolarWinds, and Cisco Prime Infrastructure.
- Experience with fiber and copper cable plant management and management software.
- Documents all network changes and additions using Visio or similar product.
- Coordinates with Telecomm section on all moves, adds, changes as they relate to the VoIP system.
- Communicates with various departments and Authority customers on scheduled maintenance downtimes using change management procedures.
- Performs other duties as required.

MINIMUM QUALIFICATIONS

An Associate's Degree or higher from an accredited college or university with a major in information systems or technology field; and five years' hands-on experience in a Cisco environment designing, implementing and supporting Cisco switches, routers and firewalls at a systems engineering level in a complex and diverse environment (i.e., corporate data center); current Cisco Certified Network Professional (CCNA) certification or higher.

SUBSTITUTION: Graduation from high school or possession of a GED certificate and seven years of the above experience may be substituted for the degree requirement. Additional requirements: a current CCNP certification or higher.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: *IT Project Manager*

POSITION OVERVIEW

Reporting to the Manager of the Project Management Office, this position is responsible for managing and coordinating technical and business resources involved in technology systems analysis, development, coordination, implementation and documentation of new or existing information systems to ensure effective systems controls are in place to support business operations.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Prepares project plans and schedules to include coordinating requirements, tasks, work assignments, and resources to ensure project integrity.
- Oversees the preparation of project objectives and system development requirements.
- Ensures that project goals and benefits are accomplished and in line with business objectives.
- Assigns duties and responsibilities to project team.
- Supervises a team of technical and functional personnel engaged in the performance of highly complex systems and/or programming project activities.
- Participates directly in project development, as required.
- Provides leadership, technical guidance and conducts training to ensure the success of projects.
- Monitors activities performed by the project team to insure all products and documentation meet departmental standards.
- Develops plans for testing and implementing systems and monitors those processes to ensure desired results are achieved.
- Evaluates project performance through the review and preparation of project phase reviews and status reports.
- Continuously improves and updates existing project management documentation and processes.
- Assists with the functions of the Project Management Office
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

The minimum qualifications to perform successfully in this position include a Bachelor's degree from an accredited college or University with a major in Computer Science, Business, Management, or other related degree; and four years of project management experience, PMP certification and a valid Driver's License. Preference will be given for experience working in a Strategic Project Management Office and experience working with a Project Portfolio Management system.

KEY KNOWLEDGE, SKILLS AND ABILITIES:

- Strong leadership, team-building, employee engagement, consensus-building, analytical and issue resolution skills.
- Knowledge of project management (PM) methodology and experience with major defined PM approaches.
- Significant knowledge of project planning/scheduling tools with practical application
- Ability to establish and maintain effective working relations with others within and outside own organization.
- Effective influencing and negotiating skills in and environment where you do not directly control resources
- Ability to use considerable initiative, think independently, and exercise sound judgment.
- Ability to collect, organize and analyze data and develop logical conclusions.
- Ability to prepare effective training materials and conduct training classes.
- Results-driven and decisive with an ability to execute plans that are operationally sound.
- Strong interpersonal and communication skills, expertise in setting and managing customer expectations.
- Ability to effectively balance multiple high priority tasks simultaneously.
- Strong knowledge and understanding of business needs, with the ability to establish and maintain a high level of customer trust and confidence.

Department:	Information Technology
Pos. No:	
Pay Grade:	E3 $65,500-136,200
Last update:	01/23/2017 WID

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring systems, installing server hardware and software, as well as maintenance and repair of issues with various system hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes intermediate server and system technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on server and system related projects of intermediate scope and complexity. Employees in this class are expected to support the resolution of intermediate work problems and tasks under limited supervision in one or more of the following areas: servers, systems, storage, software and peripherals as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates intermediate knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.
- Creates and manages user directories and files on the server platforms.

- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Strong knowledge of Microsoft Windows Server environments, preferably 2012R2, 2016.
- Knowledge of server virtualization technologies, preferably VMware versions 6.0 and 6.5.
- Knowledge of backup/restore technologies and products, preferably NetBackup
- Knowledge of Microsoft Windows Server Clustering.
- Some knowledge of Red Hat Enterprise Linux Version 6 or Version 7.
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of Active Directory management, including but not limited to, Group Policy administration, replication, and user/group permissions.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Four years of information technology experience in intermediate support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ or Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Intermediate skill in managing personal daily activities and tasks for self.
- Intermediate skill in use and application of reference materials to support resolution of standard problems.
- Intermediate skill in the application of theory in resolving problems.
- Intermediate skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring wired and wireless network system hardware and software, as well as maintenance and repair of issues with various network hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes basic to intermediate wired and wireless technical support of network hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on network related projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic to intermediate work problems and tasks under close supervision in one or more of the following areas: switches, routers, firewalls, controllers, access points, network appliances as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic to intermediate knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic to intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.

- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Cisco switching environments
- Knowledge of Cisco routers, Wireless and Voice over Internet Protocol
- Knowledge of IP schemas and subnetting
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Two years of information technology experience in basic to intermediate support of switches, routers, firewalls, controllers, access points, network appliances and monitoring tools.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA Network+ or Cisco CCNA preferred.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring wired and wireless network system hardware and software, as well as maintenance and repair of issues with various network hardware and software. In addition, the position performs full performance information technology work in planning, designing, developing and monitoring all aspects of the ITS network infrastructure. The work is top tier in nature in the ITS (Information Technology Services) Department and includes advanced network and system technical support of network hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on network related projects of advanced scope and complexity. Employees in this class are expected to support the resolution of advanced work problems and tasks with limited to no supervision in one or more of the following areas: switches, routers, firewalls, controllers, access points, network appliances as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of ITS Management. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates advanced knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated advanced proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.

- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Strong knowledge of server virtualization technologies, preferably VMware versions 6.0 and 6.5.
- Strong knowledge of backup/restore technologies and products, preferably NetBackup
- Strong knowledge of Microsoft Windows Server Clustering.
- Strong knowledge of Red Hat Enterprise Linux Version 6 or Version 7.
- Strong Knowledge of vulnerability identification/remediation techniques and applications.
- Strong Knowledge of datacenter configuration and operational support methodology.
- Strong Knowledge of Active Directory management, including but not limited to, Group Policy administration, replication, and user/group permissions.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Ability to dismantle, replace components and reassemble servers.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.

MINIMUM QUALIFICATIONS

Education: Bachelor Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Seven or more years of information technology experience in advanced support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ and advanced Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Advanced skill in managing personal daily activities and tasks for self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional work which is developmental in nature in the ITS (Information Technology Services) Department including basic technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This entry-level position is designed to train the incumbent to perform IT technical work on projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic work problems and tasks under close supervision in one or more of the following areas: service desk support, desktop and peripheral support, mobile device support, application support and network support. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Service Desk Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic knowledge in at least one of the departmental section disciplines: network management, desktop management, mobile device management, server management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of basic incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skills are required for this role:

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Basic skill in managing personal daily activities and tasks for self.
- Basic skill in the use and application of reference materials to support resolution of basic and intermediate desktop issues.
- Basic skill in the application of theory in desktop
- Basic skill in applying new technologies, soft skills and procedures.
- Basic ability to mentor teammates; work within teams to achieve success with others
- Ability to prepare and deliver effective section-level presentations at various levels.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Intermediate knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of systems analysis, development, project planning, and documentation methods and standards.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others
- Ability to understand and trouble shoot the currently supported Windows operating systems
- Basic skill in trouble shooting Microsoft Office products
- Basic skill in desktop software installation

MINIMUM QUALIFICATIONS

Education: Graduation from high school or possession of a G.E.D. Certificate; or An equivalent combination of related education, training, and/or experience.

Experience: Two years of applicable information technology experience in user support of desktops, applications, mobile devices, printers, peripherals and cabling.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ and/or Microsoft preferred but not required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs desktop hardware and software, as well as peripherals and cabling
- Assists a more senior team member in performing technical support in a formal or informal Service Desk settings to end users with common hardware and software problems, which includes logging, troubleshooting, resolving and escalating issues to the appropriate ITS resources.
- Basic skill in managing personal daily activities and tasks for self.
- Basic skill in use and application of reference materials to support resolution of basic problems.
- Basic skill in the application of theory in resolving problems.
- Basic skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, basic problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring systems, installing server hardware and software, as well as maintenance and repair of issues with various system hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes basic to intermediate server and system technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on server and system related projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic to intermediate work problems and tasks under close supervision in one or more of the following areas: servers, systems, storage, software and peripherals as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic to intermediate knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic to intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.
- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Microsoft Windows Server environments, preferably 2012R2, 2016.
- Knowledge of server virtualization technologies, preferably VMware versions 6.0 and 6.5.
- Knowledge of backup/restore technologies and products, preferably NetBackup
- Knowledge of Microsoft Windows Server Clustering.
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of Active Directory management, including but not limited to, Group Policy administration, replication, and user/group permissions.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of Red Hat Enterprise Linux Version 6 or Version 7.
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Two years of information technology experience in basic to intermediate support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ or Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.

- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.

MINIMUM QUALIFICATIONS

Education: Bachelor Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.
Experience: Five or more years of information technology experience in advanced support of servers, systems, software, peripherals and storage technology.
Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.
Licensure and/or Certification: CompTIA A+, CompTIA Network+ and advanced Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Advanced skill in managing personal daily activities and tasks for self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.

- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional information technology work leading ITS resources with installing and configuring wired and wireless network system hardware and software, as well as maintenance and repair of issues with various network hardware and software. In addition, the position performs full performance information technology work in planning, designing, developing and monitoring all aspects of the ITS network infrastructure. The work is top tier in nature in the ITS (Information Technology Services) Department and includes advanced network and system technical support of network hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on network and system related projects of the most advanced scope and complexity. Employees in this class are expected to support the resolution of advanced work problems and tasks under no supervision in one or more of the following areas: switches, routers, firewalls, controllers, access points, network appliances and peripherals as well as to act as an escalation point for issues not able to be resolved by lower tiers. Other team members will work under the day-to-day direction of this role. Work requires creative and original thinking and is performed under the direction of ITS management. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates advanced knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated advanced proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.

- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Ability to guide and mentor peers toward professional success.
- Ability to make key, long term technology decisions for the greater good of the business.
- Strong knowledge of data center design and network archecture in a data center.
- Strong knowledge of Cisco switching environments
- Strong knowledge of Cisco routers, Wireless and Voice over Internet Protocol
- Strong knowledge of IP schemas and subnetting
- Strong knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of device monitoring through tools such as Cisco Prime LMS, SolarWinds and Cisco Prime Infrastructure
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Knowledge of Cisco Unified Communication Manager
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Bachelor Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: 2 years of leadership experience and 10 or more years of information technology experience in advanced support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: Cisco CCNA or other advanced network certifications required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Advanced skill in managing personal daily activities and tasks for self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

POSITION OVERVIEW

This position will be engaged in professional desktop and Common Use field support work which is tier 3 in nature in the ITS (Information Technology Services) Department including advanced technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on field and common use desktop related projects of advanced scope and complexity. Employees in this class are expected to support the resolution of advanced work problems and tasks under little to no supervision in one or more of the following areas: desktop and peripheral support, mobile device support, application support and network support. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the Sr. Manager ITS Client & Field Services Manager.

This position needs to lead by example as well as mentoring other team members. This position must think in a lead manner taking on specific projects and ensuring its success from beginning to end with projects within their field.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates advanced knowledge in at least one of the departmental section disciplines: network management, desktop management, mobile device management, server management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated advanced proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skills are required for this role:

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Advanced skills in managing personal daily activities and tasks for self.
- Advanced skills in the use and application of reference materials to support resolution of basic and intermediate desktop issues.
- Advanced skills in the application of theory in desktop
- Advanced skills in applying new technologies, soft skills and procedures.
- Ability to mentor teammates; work within teams to achieve success with others
- Ability to prepare and deliver effective section-level presentations at various levels.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Intermediate knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of systems analysis, development, project planning, and documentation methods and standards.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others
- Advanced ability to understand and trouble shoot the currently supported Windows operating systems
- Advanced skills in trouble shooting Microsoft Office products
- Advanced skills in desktop software installation
- Advanced Skills in problem documentation
- Ability to enhance and utilize problem knowledge base software
- Ability to work with and develop lower level specialist on the Service Desk

MINIMUM QUALIFICATIONS

Education: Bachelor Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Seven or more years of applicable information technology experience in advanced user support of desktops, applications, mobile devices, printers, peripherals and cabling.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ or Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs desktop hardware and software, as well as peripherals and cabling
- Assists a more senior team member in performing technical support in a formal or informal Service Desk settings to end users with common hardware and software problems, which includes logging, troubleshooting, resolving and escalating issues to the appropriate ITS resources.
- Advanced skill in managing personal daily activities and tasks for self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.

Eye/hand/foot coordination: performing work through using two or more.

Tampa International Airport

Position Title: *Sr.* Applications Support Analyst

POSITION OVERVIEW

Under the supervision of the Senior Manager, Business Applications, the Sr. Support Analyst will provide functional and technical support to end users on various enhancements, issues and problems relating to Oracle e-Business software. They will also be responsible for responding to, documenting and resolving service tickets in a timely manner according to our SLA. The Support Analyst will perform project lead, root cause analysis, develop checklists for typical enhancements, problems and recommend procedures and controls. This position will support multiple applications and/or modules with Oracle e-Business and support Best of Breed Application Interfaces and Cloud Services. This position may require independent work, working as a team with consulting resources, sharing information and assisting others with work orders.

POSITION ACCOUNTABILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Work with Business Users on understanding and analyzing business problems
- Communicate and recommend new functionality to address system gaps and/or software releases
- Troubleshoot software issues and identify root causes of problems
- Plan application system upgrades, install new releases, and assist with migrations
- Work with team, consultants and software vendor to identify and resolve software defects and provide bug fixes
- Design and document functional applications solutions and technical integration/reports to support expanded functionality and technical development
- Stay current with technology industry and market trends, and determine their potential impact on the enterprise.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a degree in computer science, systems analysis or a related study, or equivalent experience or an equivalent combination of education, training and experience that would reasonably be expected to provide the job specific competencies noted below. Must have knowledge of ITIL service management best practices with strong analytical, technical, verbal and written communication skills as well as planning and organizational skills.

Core Oracle Skills Include:

- Strong Functional (Setup, Configure and Support Business) experience around Oracle E-Businesss (EBS) 12.1.X and 12.2.X Financials (GL, AR, AP, Fixed Assets, Project Costing, and SLA) and Procurement (Vendors, Purchasing, Inventory and Shipping), Sourcing/Vendor Contract a plus.
- Strong leading Business Users through Financial and Procurement out of the box functionality to support proof of concepts and new capabilities.
- Strong SQL and PL/SQL experience, Oracle Forms, and Reports.
- Knowledge of PO, Inv, GL, AP, AR, FA, CE and Project Costing Schemas.
- Knowledge around out of the box interfaces tables, APIs/Packages, base tables, seeded workflows in Oracle modules in 12.1.X and 12.2.X.
- Very good knowledge using and modifying APIs, Fast Formulas and Concurrent processes.
- Design custom reports, interfaces, conversions, and enhancements (RICE) to support the developers technical design/coding requirements.

Department:	Information Technology
Pos. No:	533112
Pay Grade:	E2 ($85,200-$116,800) - **Exempt**
Last update:	05/06/2019 - ALC

- Ensure solutions are complete from an end to end perspective, follow design and architecture principles, and provide the proper tool sets for end user support of interfaces.
- Support the definition of the process, standards and tools to enable RICE development for Oracle EBS.
- Manage risks associated with program implementation and developing risk mitigation strategies.
- Works independently or with a team.
- Manage Implementation of functional and technical migration to production.
- Act as a project lead to support design, development and deployment of key functionality.

The ideal candidate will have 5 to 10 years of experience supporting Oracle e-Business Suite 12.1.x and 12.2.X with the ability to create, update, deploy and review functional and technical capabilities and documents.

COMPENSATION

$75,000 TO $80,000* commensurate with experience

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Analyzes and maintains existing software & hardware, proposed modifications, and new software packages for impact on current operating systems regarding information security.
- Assists project leaders in implementing security controls for new and/or upgraded software applications.
- Measures system performance for optimization on newly adopted software, hardware, and configuration changes.
- Audits security logs and other data sources to ensure policy and standards compliance.
- Coordinates with vendors and users on identification of software, network, security, hardware problems and system modifications or enhancements.
- Prepares user instructional documentation and trains personnel on new technology and software upgrades regarding information security.
- Identifies and reports security related anomalies.
- Participates in qualitative risk analysis and performs gap analysis.
- Develops, implements, and maintains security policies and standards; insures all policies and standards are updated as needed to stay within compliance of any audit findings or changing technology requirements.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Bachelor's Degree or higher from an accredited four year degree granting college or university with a major in information systems, computer science or other directly related field; and at least four years of security knowledge and technical experience in a diverse range of IT systems – specifically with PCI compliance, logging solutions, vulnerability management solutions, Microsoft enterprise technologies, Cisco enterprise technologies, and Redhat Linux technologies, PCI compliance, logging solutions, vulnerability management solutions; and at least one technical certification obtained in the last three years from the following organizations: Cisco, Microsoft, or CompTIA. A Certified Information Systems Security Professional (CISSP) certification is preferred.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

Tampa International Airport

Position Title: Senior IT Business Analyst

POSITION OVERVIEW

Reporting to the Manager of Project Management Office, this position is primarily responsible for the business analysis and documentation of Information Technology (IT) Business opportunities at the Authority. Responsible for the review, assessment and transformation of business processes in a cost-effective manner. Involved in the analysis, requirements gathering, design, configuration/development, implementation and delivery of projects, facilitation of support for implemented functionality, and serves as a liaison between IT and the business units at the Authority.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Researches and prepares business case studies, total cost of ownership (TCO) and return on investment (ROI) studies for use in decision-making.
- Identifies opportunities for business process improvement and efficiencies through technology, system, and non-system changes.
- Documents current state and future state of business functions and processes, including business needs, objectives, inputs, activities, outputs, outcomes and impact.
- Conveys business requirements from customers to technical teams in an effective manner to ensure the resulting solution is in alignment with and meets the stated business needs.
- Contributes to the achievement of business objectives and strategic goals by partnering with the business to clarify and communicate business requirements and assure IT services are aligned with business needs.
- Defines system implementation approach and operational concept, ensuring requirements and value received are captured, measured and evaluated.
- Leads the preparation of proposals, including scopes and estimates, to develop or enhance systems and/or operational changes and workflows including overall change management strategy.
- Facilitation of IT development and process methodologies such as Agile, Waterfall, ITIL, and Lean
- Acts as a liaison between end-users, enterprise and solution architects, consultants, project teams, and other entities as initiatives migrate through phases from ideation to implementation.
- Performs after-hours and other related duties as required.

MINIMUM QUALIFICATIONS

An Associate's or higher degree from an accredited college or university in Information Technology or related field; and a minimum of 4 years applicable experience as a Business Analyst or in a relevant Information Technology role. Preferred Certifications: CBAP (Certified Business Analysis Professional), CCBA (Certification of Competency in Business Analysis), PMI-PBA (Professional in Business Analysis), ITIL (Information Technology Infrastructure Library) Foundation, CSPO (Certified Scrum Product Owner), Certified ScrumMaster (CSM).

JOB SPECIFIC COMPENTENCIES

- Excellent business knowledge, interpersonal skills, presentation skills, and strong written and communication skills.
- Ability to work well with team members and business users.
- Proficient in authoring technical documentation using tools such as Word, Excel, PowerPoint, Visio and other applications.
- Knowledgeable about business and technology with a strong technical aptitude.
- Ability to analyze possible outcomes that can be achieved through current Authority owned platforms, core systems and what the latest technology offers.

Department:	Information Technology
Pos. No:	15627
Pay Grade:	E4 ($76,500 – $158,000) – **Exempt**
Last update:	8/2018 Compensation

- Strong analytical skills with the ability to translate application and operational requirements into new business processes and design application enhancements.
- Problem solving, decision making, negotiation and persuasion skills.

TPA MISSION STATEMENT

Tampa International Airport

Position Title: Senior IT Lead Project Manager

POSITION OVERVIEW

Reporting to the Manager of the Project Management Office, this position is responsible for managing and coordinating technical professional resources involved in technology systems analysis, development, coordination, implementation and documentation of new or existing information systems to ensure affective systems controls are in place to support business operations and assumes the duties of the Department Manager when unavailable.

POSITION ACCOUNTIBILITIES

Note: *The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Prepares project plans and schedules to include coordinating requirements, tasks, work assignments, and resources to ensure project integrity.
- Oversees the formulation of project objectives and system development requirements.
- Supervises a staff of technical personnel engaged in the performance of highly complex systems and/or programming activities.
- Participates directly in project development, as required.
- Provides technical guidance and assistance to the project staff to ensure the success of projects.
- Monitors activities performed by the project staff to include insuring that all product and documentation meet departmental standards.
- Analyzes methods of obtaining and presenting information together with reviewing and evaluating alternative sources of information.
- Prepares specifications for information systems.
- Analyzes the impact of information as it relates to structure, management techniques and user relationships.
- Develops plans for testing and implementing systems and monitors those processes to ensure desired results are achieved.
- Alternate Department Manager (assumes duties of Department manager when unavailable)
- Change Management Board alternate for PMO Department
- Mentors PMO staff on Project management best practice and provides training and guidance as necessary
- Reviews ITS Department project plans
- Compile and validate monthly quarterly and annual PMO metrics
- Acts as the PMO system administrator for the PPMS (Project Portfolio Management System)
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

The minimum qualifications to perform successfully in this position include a Bachelor's degree from an accredited college or university with a major in Computer Science, Business, Management, or other related degree; and four years of project management, PMP certification and a valid Driver's License. Preference will be given to Oracle EBS and Oracle Technology related project management experience.

JOB SPECIFIC COMPENTENCIES

- Strong leadership, team-building, employee engagement, and consensus-building skills required.
- Ability to establish and maintain effective working relations with others within and outside own organization.
- Ability to use considerable initiative, think independently, and exercise sound judgment.
- Ability to collect, organize and analyze data and develop logical conclusions.
- Results-driven and decisive with an ability to execute plans that are operationally sound.

Department:	Information Technology
Pos. No:	15548
Pay Grade:	E4 ($76,500 – $158,000) – **Exempt**
Last update:	8/2018 Compensation

- Very visible, enthusiastic, and a high energy level.
- Strong interpersonal and communication skills.
- Ability to effectively balance multiple high priority tasks simultaneously.
- Strong analytical and issue resolution skills required.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: Senior IT Network Engineer

POSITION OVERVIEW

This position is responsible for the design and management of Aviation Authority switches, routers, firewalls and associated components, to ensure successful daily operations of all Airport computerized network systems, as well as the planning and implementation of near and long-term strategies for the network environment.

POSITION ACCOUNTIBILITIES

- Provides primary hardware and OS support for the Authority's Cisco infrastructure including but not limited to routers, firewalls, switches, wireless AP's and wireless controllers.
- Provides network support for Authority customers according to current service level agreements.
- Manages projects related to new Cisco server and network equipment installs and upgrades.
- Experience preferred with Cisco Unified Communication Manager and unity connection providing telephony services for customers ensuring constant availability of phone and voice mail services.
- Complies and enforces IT security policies including PCI compliance.
- Troubleshoots network outages quickly to ensure desired uptimes.
- Performs Cisco IOS upgrades and standard patching using Cisco Prime LMS.
- Monitors network devices using various tools such as Cisco Prime LMS, SolarWinds, and Cisco Prime Infrastructure.
- Documents all network changes and additions using Visio or similar product.
- Coordinates with Telecomm section on all moves, adds, changes as they relate to the VoIP system.
- Communicates with various departments and Authority customers on scheduled maintenance downtimes using change management procedures.
- Performs other duties as required.

MINIMUM QUALIFICATIONS

An Associate's Degree or higher from an accredited college or university with a major in information systems or a technology field; and five years' hands-on experience in a Cisco environment designing, implementing and supporting Cisco switches, routers and firewalls at a systems engineering level in a complex and diverse environment (i.e., corporate data center); current Cisco Certified Network Professional (CCNP) certification or higher.

SUBSTITUTION: Graduation from high school or possession of a GED certificate and seven years of the above experience may be substituted for the degree requirement. Additional requirements: a current CCNP certification or higher.

Department:	Information Technology
Pos. No:	15548
Pay Grade:	E4 ($76,500 – $158,000) – **Exempt**
Last update:	8/2018 Compensation

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring wired and wireless network system hardware and software, as well as maintenance and repair of issues with various network hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes advanced wired and wireless technical support of network hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on network related projects of advanced scope and complexity. Employees in this class are expected to support the resolution of advanced work problems and tasks under limited to no supervision in one or more of the following areas: switches, routers, firewalls, controllers, access points, network appliances as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed without the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates advanced knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated advanced proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.

- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Cisco switching environments
- Knowledge of Cisco routers, Wireless and Voice over Internet Protocol
- Knowledge of IP schemas and subnetting
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of device monitoring through tools such as Cisco Prime LMS, SolarWinds and Cisco Prime Infrastructure
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of Cisco Unified Communication Manager
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Five or more years of information technology experience in advanced support of switches, routers, firewalls, controllers, access points, network appliances and monitoring tools.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA Network+ or Cisco CCNA required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Advanced skill in managing personal daily activities and tasks for self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Senior Manager, Information Security Office

POSITION OVERVIEW

Reporting to the Director of Information Technology Services, the incumbent will lead critical information security-related activities, including the planning and development of information security strategy in support of the Authority's strategic plan. This position requires an in depth understanding of data breach reporting laws, generally accepted information security principles and related information technology security best practices. The incumbent must be familiar with commonly used IT technology security controls and tools and have knowledge of software development lifecycles, IT operations, data center operations, IT project management methodologies, IT hardware/software architectures and IT auditing and compliance practices. Ideally, the incumbent should be familiar with CISCO network solutions and be able to prepare and present complex information security concepts and reports to a wide range of technical and non-technical stake holders.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Provides information and recommendations for consideration by the Director of ITS and other Executives regarding compliance with laws and regulations that govern the protection of sensitive and confidential systems and data
- Collaborates with other ITS staff and stake holders to develop security policies, standards and guidelines to ensure the confidentiality, integrity and availability of information systems and data
- Supports the protection of information technology assets by developing, implementing and operating security best practices that include systems access management, systems security monitoring and threat evaluation
- Reports all critical security issues to the Director of ITS and other Executives
- Develops risk reduction strategies and plans
- Supports the development and delivery of employee security awareness training programs.
- Collaborates with external consultants as required to support independent security audits, assessments and intrusion and penetration testing.

MINIMUM QUALIFICATIONS

- Bachelor's degree in information systems, computer science, management information systems or other related discipline.
- Seven years of professional experience gained in information technology roles, to include five years in an information security role including experience with Payment Card Industry-Data Security Standard (PCI-DSS) audits.
- Certified Information Systems Security Professional (CISSP) certification issued by ISC.
- Valid IT security certification such as Certified Ethical Hacker (CEH) or Comp TIA Security+

Tampa International Airport

Position Title: *Senior Manager, Oracle Solutions and Product Support*

POSITION OVERVIEW

This position is responsible for providing technical leadership, expertise and guidance related to the architectural standards, design, development, integration and implementation of software solutions that enable our Tampa International Airport business partners the ability to achieve their objectives. In addition, The Solution Architect will provide oversight to production controls, access, Disaster Recovery and instance management. The Solutions Architect will apply proven communication skills, problem-solving skills, and knowledge of best practices, acting as a technical advisor, to guide in the planning and coordination of design, development and implementation of our mission-critical systems. This role will report to the Director of IT Applications.

POSITION ACCOUTABILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Provide architecture design and governance expertise while collaboratively working with stakeholders in all areas of the business and IT to help achieve company objectives.
- Oversight and Control of Production Support, Governance, Instance Management, Access Controls, Technology Platform and Disaster Recovery.
- Work directly with the Program Management Office, Applications Development Group, IT Security and Infrastructure/Network Organizations to provide and deliver technology solutions to enable our users and provide data to support their regulatory, financial and decision making processes.
- Continually facilitate and assist with efforts to define the future state of the enterprise.
- Provide clear guidance and assistance on moving from current state architecture towards the future state through collaboration and/or architectural roadmaps/runways.
- Ensure effective governance of defined industry and company software practices and standards.
- Demonstrate and create prototypes, build reference architectures and define other effective solutions.
- Continually stay abreast on current industry trends and lead the research and development efforts accordingly through proof of concept implementations, workshops, etc.
- Provide guidance, coaching and effective assessments for various IT teams and initiatives.
- Create prototypes and demonstrate innovative and effective solutions that align with organization's objectives and maintain competitive market advantage.
- Analyze existing systems through interview process with technology and application SMEs to develop end-to-end current state architecture and definition of the future state architecture.
- Perform gap analysis between current state and the future state architecture to identify single points of failure, capabilities, capacity, fault tolerance, hours of operation (SLA), and change windows.
- Collaborate with various IT groups in continuously creating and modifying technology standards and practices.
- Champion product design, solution design and industry best practices in building and delivering best in class software.
- Effectively communicate using written, oral, non-verbal, and active listening skills.

Department:	Planning and Development
Pos. No:	411021
Pay Grade:	E5 ($89,000 – $185,000) – **Exempt**
Last update:	8/2018 Compensation

MINIMUM QUALIFICATIONS

- Bachelor's degree in computer science, systems analysis or a related study, or equivalent experience.
- Five to seven years of experience Architecting and deploying enterprise solutions incorporating core ERP applications, Best of Breed Applications, middleware integration, database management, operational support and technical documentations that includes complete topography design.
- 3-5 years implementing and/or supporting Oracle Applications (EBS v 12.x.x and Cloud)
- Strong analytical and technical skills.
- Strong written and verbal communication skills.
- Strong planning and organizational skills.
- Relational database design, coding, and management with an emphasis on Oracle and PL/SQL.
- Ability to create, update, and review functional and technical documents; and Ability to develop test data, test scripts and execute comprehensive testing of integrated systems.
- Must have experience in identifying and implementing sound design patterns and capable of leading and facilitating design and modeling workshops with both business and technical team members.
- Additional Plus
    - Knowledge of ITIL service management best practices
    - Proven experience working with project teams in an influential role to deliver architecture solutions based on business requirements, technology standards, and service level agreements and approved funding.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring systems, installing server hardware and software, as well as maintenance and repair of issues with various system hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes basic to intermediate server and system technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on server and system related projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic to intermediate work problems and tasks under close supervision in one or more of the following areas: servers, systems, storage, software and peripherals as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic to intermediate knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic to intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.
- Creates and manages user directories and files on the server platforms.

- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Microsoft Windows Server environments, preferably 2012R2, 2016.
- Knowledge of server virtualization technologies, preferably VMware versions 6.0 and 6.5.
- Knowledge of backup/restore technologies and products, preferably NetBackup
- Knowledge of Microsoft Windows Server Clustering.
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of Active Directory management, including but not limited to, Group Policy administration, replication, and user/group permissions.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of Red Hat Enterprise Linux Version 6 or Version 7.
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Two years of information technology experience in basic to intermediate support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ or Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Under supervision, installs and repairs server hardware and software, as well as peripherals and cabling
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Intermediate skill in managing personal daily activities and tasks for self.
- Intermediate skill in use and application of reference materials to support resolution of standard problems.
- Intermediate skill in the application of theory in resolving problems.
- Intermediate skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

The GIS Analyst uses technical and administrative skills to ensure that GIS technology is applied properly and efficiently at various departmental levels within the Hillsborough County Aviation Authority (Authority). The GIS Manager must be skillful at identifying the spatial information needs of the Authority and Tampa International Airport as well as the General Aviation Airports and the resources that are needed to meet them. A working knowledge of the Authority's functions and activities is important together with knowledge of geodatabases and GIS software used in those functions and activities. The GIS Manager must possess the skills and abilities necessary to ensure that projects and tasks are completed on time and within budget constraints. The GIS Managers sets project and task goals, establishes completion dates, obtains necessary resources, and coordinates activities with the GIS user departments. The GIS Manager is expected to develop budgets, follow project management processes, lead and coach teams, and prioritize customer satisfaction in the effort to implement an enterprise GIS for the Authority.

The ideal candidate will have a minimum of 5 years of experience leading enterprise GIS programs preferably for an Airport, City or County and with experience specific to implementing GIS solutions for planning, engineering infrastructure, and land development.

The GIS Manager will have the ability to work independently to develop a GIS master plan and implement a GIS system at TPA. In addition, the GIS Manager could be required to manage and oversee the work of other employees or consultants depending on the long term GIS strategy developed for the Authority.

The GIS Manager is responsible for implementing the Authority's enterprise GIS by coordinating all projects, tasks and work requests required to develop and maintain the Authority's GIS. The GIS Manager will need to provide leadership, experience, is an effective communicator, and has experience as a project lead for complex IT applications.

POSITION ACCOUNTIBILITIES

- Develop and maintain a 3 year master plan for implementing an enterprise GIS.
- Develop, prioritize and manage GIS projects and tasks that support the Authority's GIS needs.
- Schedule team member day to day workload consisting of, but not limited to, efficiently completing "time-line defined" customer service projects, information maintenance work, layer creation, modifications and enhancements, ArcGIS application development, research & technology evaluations, technology support, and client consultation.
- Provide technical advice and problem solving support to staff.
- Lead and develop GIS workflows and procedures.
- Manage the enterprise GIS operations including business development and policies.
- Develop and chair committees and/or working groups to collaboratively develop GIS management policy, project prioritization, resource needs with stakeholders.
- Maintain effective communication with staff and management including presenting GIS Program status.
- Manage GIS infrastructure (e.g., ArcGIS for Server, Portal for ArcGIS, SQL Server geodatabases).
- Manage projects that implement new systems, software applications, hardware additions and hardware maintenance.

- Manage software licenses, and maintenance.
- Develop and maintain GIS Website, GIS portal and applications.
- Research and stay current with latest GIS & information technology advancements.
- Develop and Implement data standards and quality control processes.
- Integrate GIS with business application including CAD and develop time saving applications.
- Assist as needed with the maintenance of GIS data as required.
- Manage client support and information technology solutions development.
- Provide staff training (e.g., seminars, technical courses, conferences) when necessary to maintain or improve the level of customer service or promote increased revenues.
- Develop and/or maintain staff job specifications to reflect the most up-to-date and required technical skills. Ensure that staff are granted all options to upgrade or maintain these skills.
- Provide recommendations and supportive documentation to senior management prior to initiating any HR related action.

MINIMUM QUALIFICATIONS

- BS Degree in Geography, Computer Science or related field
- Enterprise GIS experience preferably with a local government
- Five years of experience with GIS/ESRI software specifically:
  - ✓ ArcGIS for Server
  - ✓ ArcGIS for Desktop
  - ✓ Portal for ArcGIS
  - ✓ ArcGIS Online
  - ✓ Enterprise geodatabase (ArcSDE)
  - ✓ License Management and maintenance
  - ✓ Manage client support and information technology solutions development
  - ✓ Research and stay current with latest GIS & information technology advancements.
  - ✓ Develop and maintain the GIS web site and applications
  - ✓ Working knowledge of local government models, templates, data modeling, python and ArcGIS scripting

- Working knowledge of AutoCAD and AutoCAD Civil 3D
- Experience integrating ArcGIS with AutoCAD and vice versa
- Knowledge of FAA policies, regulations, Standard Operating Procedures and Airport GIS
- FAA AGIS-IDLE training
- Knowledge of Microsoft SQL Server
- Working knowledge of Asset Management (Cityworks asset management preferred)..

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Leads research and evaluation of emerging trends in the information technology field to determine their worth to the organization.
- Designs and oversees staff education on the use of new technology.
- Recommends ways to apply new products and solutions that will maximize their value to the organization.
- Familiar with a variety of the field's concepts, practices, and procedures.
- Relies on extensive experience and judgment to plan and accomplish goals.
- Performs a variety of tasks.
- Prepares project plans and schedules to include coordinating requirements, tasks, work assignments, and resources to ensure project integrity
- Oversees the formulation of project objectives and system development requirements.
- Supervises a staff of technical personnel engaged in the performance of highly complex systems and/or programming activities.
- Participates directly in project development, as required.
- Provides technical guidance and assistance to the project staff to ensure the success of projects.
- Monitors activities performed by the project staff to include insuring that all product and documentation meet departmental standards.
- Analyzes methods of obtaining and presenting information together with reviewing and evaluating alternative sources of information.
- Prepares specifications for information systems.
- Analyzes the impact of information as it relates to structure, management techniques and user relationships.
- Develops plans for testing and implementing systems and monitors those processes to ensure desired results are achieved.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a major in Computer Science, Business Management, Public Administration, Accounting, or Engineering; or five years' experience managing Information Systems projects including two years in a supervisory capacity.

Substitution: An Associate degree from an accredited college or university with a major in Computer Science, Business Management, Public Administration, Accounting, or Engineering; and six years' experience managing Information Systems projects including two years in a supervisory capacity.

Substitution: Graduation from high school or possession of a GED certificate; and ten years' experience managing Information Systems projects including three years in a supervisory capacity.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the capabilities, limitations, and functional applications of information technology methods and equipment.
- Considerable knowledge of information technology systems design and programming.
- Considerable knowledge of systems analysis, development, planning, and documentation methods and standards.
- Considerable knowledge of cross-functional project management methods and techniques.
- Ability to synthesize project information and establish the appropriate scope of a project.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.
- Ability to use a computer and related software.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Develops and communicates project management standards and best practices.
- Identifies and coordinates internal resources and expertise to achieve project objectives.
- Advises leadership about the project portfolio, status and resource planning.
- Provides guidance on establishing project planning.
- Provides guidance on tracking time of resources.
- Provides guidelines for and assists in project audits.
- Prepares project plans and schedules to include coordinating requirements, tasks, work assignments, and resources to ensure project integrity.
- Oversees the formulation of project objectives and system development requirements.
- Participates directly in project development, as required.
- Provides guidance and assistance to the project staff to ensure the success of projects, as required.
- Monitors activities performed by the project staff to include insuring that all product and documentation meet departmental standards.
- Analyzes the impact of information as it relates to structure, management techniques and user relationships.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

An Associate degree from an accredited college or university; and six years' experience managing Information Systems projects including two years in a supervisory capacity.

Substitution: Graduation from high school or possession of a GED certificate; and seven years' experience managing Information Systems projects including three years in a supervisory capacity.

Department:	Information Technology
Pos. No:	00354
Pay Grade:	E5 ($89,000 – $185,000) – **Exempt**
Last update:	3/23/2018 Compensation

POSITION OVERVIEW

This position manages an information technology operation that includes implementing work plans based on annual goals and the strategic plan; resolves operational, and management issues; and achieves goals while ensuring resources are utilized appropriately. This position will be engaged in professional information technology work leading an IT team or multiple teams, including Lead IT roles. Employee is responsible for planning, organizing, allocating resources, ensuring compliance with procedures, and achieving the outcomes of the team. Duties performed involve weighing and evaluating complex factors requiring a high degree of judgment, analytical ability, and problem solving. Work requires creative and original thinking and is performed under the direction of Senior ITS management. A highly customer service driven approach is required. This role typically reports to the Director of ITS.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Reviews, develops, or modifies work plans, methods, and procedures. Determines work priorities and develops work schedules to provide adequate staff coverage. Assigns and distributes work and reviews work for accuracy and completeness and returning assignments with recommendations for proper completion.
- Responds to customer service escalations and complaints and assists subordinate staff with difficult or unusual assignments. Resolves problems and mediates conflicts encountered during daily operations. Promotes teamwork and encourages regular communication. Informs staff of relevant business issues and their impact on the organization.
- Provides recommendations to higher level management on the development of goals, objectives, and priorities for the operation. Recommends and establishes objectives for the work group and special projects to achieve these overall goals, objectives, and priorities.
- Provides technical expertise to clients and IT staff by identifying technology solutions to meet business needs and by leading the design, development, and/or maintenance of supported technologies.
- Represents the work group in meetings with vendors and clients to implement technology solutions and to resolve escalated issues. Cultivates, fosters, and maintains positive working relationships user and peer groups to gain their cooperation and support technology projects.
- Implements and maintains standards and procedures for the work group. Monitors and evaluates daily operations to ensure standards and procedures are being followed. Recommends and implements process improvements for the work group.
- Provides input into the development of performance metrics for work group; implements, monitors, and analyzes performance metrics, sharing results with higher level management.
- Conducts hiring interviews and selects candidate(s) for job opening(s).
- Develops goals, documents performance, provides performance feedback and formally evaluates the work of the employee; provides reward and recognition for proper and efficient performance. Assists staff to achieve performance standards and identifies opportunities for continual improvement to performance standards.
- Documents causes for disciplinary action and initiates letters of reprimand and makes formal recommendations for disciplinary action. Responds to formal and informal employee grievances and prepares written responses.
- Performs other related duties as assigned.

MINIMUM QUALIFICATIONS

Education: Bachelor Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: 5 or more years of information technology experience with proven leadership experience

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: ITIL, CompTIA A+, CompTIA Network+ and advanced Microsoft Certified Professional preferred.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Deciding and Initiating Action - Takes responsibility for actions, projects and people; makes quick, clear decisions which may include tough choices, after considering risks.
- Delivering Results - Sets high standards for quality, quantity, and timelines. Focuses on customer needs and satisfaction. Consistently achieves project goals.
- Interpersonal Skills – Shows understanding, friendliness, courtesy, tact, empathy, cooperation, concern, and politeness to others and relates well to different people from varied backgrounds and different situations.
- Influencing - Collaborates with, persuades and influences others.
- Technical Competence – Uses knowledge that is acquired through formal training or extensive on-the-job experience to perform one's job; works with, understands, and evaluates technical information related to the job; advises others on technical issues.
- Coaching - Provides others with clear direction, motivates, and empowers. Recruits staff of a high caliber and provides staff with development opportunities and coaching.
- Written Communication - Composes, reviews, edits, and issues written materials for diverse audiences and communicates purpose in a succinct and organized manner that is appropriate for context, time, and place.
- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Assists lower tier resources, senior team members as well as other disciplines in ITS in performing technical support in a formal or informal ITS infrastructure setting.
- Advanced skill in managing personal daily activities and tasks for staff and self.
- Advanced skill in use and application of reference materials to support resolution of standard problems.
- Advanced skill in the application of theory in resolving problems.
- Advanced skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.

- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.
Eye/hand/foot coordination: performing work through using two or more.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Executive Vice President, Legal Affairs (General Counsel) and Information Technology, this position is responsible for directing all technology and telecommunication activities for the Aviation Authority. Responsibilities include establishing departmental goals and procedures, directing the development and maintenance of the Authority's website - TampaAirport.com, monitoring individual and operational performance, developing long range plans and strategy, directing the preparation of departmental personnel, operating, equipment and capital budgets, overseeing all technology capital projects, overseeing the acquisition, development, implementation, operation and maintenance of all information technology and telecommunication systems including computer hardware, software and networks. The Director of IT interacts with Authority staff, technology vendors, tenants, and participates in industry and trade organizations. This position assists the Vice President, Business Planning and Information Technology with special projects.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Take an active role in leading, promoting and managing the IT department, providing direction, guidance and development to the Authority's Network Engineering and Software Development groups. Develop and implement a technology plan which will move Tampa International Airport towards the leading edge of airport technology.
- Research, develop and implement a technology strategy for the Aviation Authority. Identify evolving and emerging technologies that offer the potential for the continuous improvement of business operations and services provided by the Aviation Authority. Ensure that the Authority's technology strategy is aligned with the direction of mainstream, proven technology solutions.
- Direct the planning, budgeting, coordination and construction of all Information Technology projects. Oversee the technology component of all non-information technology department managed projects.
- Direct the planning, coordination, development, implementation, training and maintenance of all Authority developed software. This includes the development and maintenance of the website TampaAirport.com, the information kiosks, and the Authority's intranet. Oversee the planning, acquisition, coordination, implementation, end- user training and maintenance of all non-financial third party software used by the Authority.
- Direct the planning, acquisition, coordination, implementation, end-user training and maintenance of all financial software used by the Authority. Oversee the maintenance of the Oracle financial software system, the Propworks property management system and all Authority databases.
- Direct the operation and maintenance of all Authority networks and IT infrastructure throughout the airport. Oversee the development of equipment budgets and procurement specifications. Plan for the configuration, installation and maintenance of all computers, servers, printers, telecommunications equipment, network switches, routers, hubs and other ancillary equipment. Oversee the operation of the IT Help Desk and the provision of end-user hardware support.
- Direct the development, implementation and management of network, desktop and software security policies and procedures. Oversee the development and on-going testing of the Authority's IT disaster recovery plan and intrusion detection program.
- Direct the provisioning of information technology services provided by the Aviation Authority to airport tenants. Manage and grow the Authority's Shared Tenant Services program, providing telephony services to the Authority's tenants. Maintain a high level of customer service characteristic of services provided by the Authority to its tenants.
- Oversee the administration of the Authority's cellular telephone equipment and service agreements.

POSITION OVERVIEW

This position will be engaged in professional desktop and field support work which is tier 1 to tier 2 in nature in the ITS (Information Technology Services) Department including basic technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization in a lead role. This incumbent is expected to perform IT technical work on field and desktop related projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic work problems and tasks under close supervision in one or more of the following areas: service desk support, desktop and peripheral support, mobile device support, application support and network support. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Client & Field Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic knowledge in at least one of the departmental section disciplines: network management, desktop management, mobile device management, server management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.
- Basic skill in managing personal daily activities and tasks for self.
- Basic skill in the use and application of reference materials to support resolution of basic and intermediate desktop issues.
- Basic skill in the application of theory in desktop
- Basic skill in applying new technologies, soft skills and procedures.
- Basic ability to mentor teammates; work within teams to achieve success with others
- Ability to prepare and deliver effective section-level presentations at various levels.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Intermediate knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of systems analysis, development, project planning, and documentation methods and standards.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others
- Ability to understand and trouble shoot the currently supported Windows operating systems
- Basic skill in trouble shooting Microsoft Office products
- Basic skill in desktop software installation

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Two years of information technology experience in basic to intermediate user support of desktops, applications, mobile devices, printers, peripherals and cabling.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

Licensure and/or Certification: CompTIA A+, CompTIA Network+ or Microsoft Certified Professional required.

Employer May Also Require

- Florida Driver's License or Florida Commercial Driver's License and endorsement, if any.
- Assignment to work a variety of work schedules including compulsory work periods in special, emergency, and/or disaster situations.
- Other highly desirable knowledge, skills, experience, abilities and credentials relevant to a position.

JOB SPECIFIC COMPENTENCIES

- Knowledge of standard office practices, procedures, policies, personal computers, operating systems and related software applications. Recommends changes to improve operational efficiencies.

- Under supervision, installs and repairs desktop hardware and software, as well as peripherals and cabling
- Assists a more senior team member in performing technical support in a formal or informal Service Desk settings to end users with common hardware and software problems, which includes logging, troubleshooting, resolving and escalating issues to the appropriate ITS resources.
- Basic skill in managing personal daily activities and tasks for self.
- Basic skill in use and application of reference materials to support resolution of standard problems.
- Basic skill in the application of theory in resolving problems.
- Basic skill in applying new technologies, soft skills and procedures.
- Ability to use diplomacy in dealing with difficult customers and delivery of services.
- Ability to communicate effectively, both verbally and in writing, with peers and others.
- Ability to communicate with tact, patience and courtesy at all levels of the organization.
- Ability to assist other personnel with training of new technologies.
- Ability to establish and maintain effective work relationships, both inside and outside of the work section.
- Ability to develop relevant job-related skill(s) for current role.
- Ability to understand and follow specific instructions, priorities, policies and procedures.
- Ability to take ownership of, and support resolution of, standard problems.

Physical Requirements

Standing: remaining on one's feet in an upright position.
Walking: moving about on foot.
Lifting: raising or lowering an object weighing up to and occasionally over 50 pounds.
Carrying: transporting an object, usually by hand, arm, or shoulder.
Pushing: exerting force on an object so that the object is away.
Pulling: exerting force on an object so that it is moving to the person.
Climbing: ascending or descending objects usually with hands/feet.
Balancing: maintaining body equilibrium to prevent falling over.
Stooping: bending the body by bending spine at the waist.
Kneeling: bending legs to come to rest on one or both knees.
Crouching: bending body downward and forward by bending legs.
Crawling: moving about on hands and knees or hands and feet.
Sitting: remaining in the normal seated position.
Reaching: extending the hand(s) and arm(s) in any direction.
Handling: seizing, holding, grasping or otherwise working with hand(s).
Talking: expressing or exchanging ideas by means of spoken words.
Hearing: perceiving the nature of sounds by the ear.
Repetitive motions: making frequent movements with a part of the body.

POSITION OVERVIEW

This position will be engaged in professional information technology work installing and configuring systems, installing server hardware and software, as well as maintenance and repair of issues with various system hardware and software. The work is tier 2 to tier 3 in nature in the ITS (Information Technology Services) Department and includes basic to intermediate server and system technical support of hardware and software services in information technology serving the Hillsborough Aviation Authority organization. This incumbent is expected to perform IT technical work on server and system related projects of limited scope and complexity. Employees in this class are expected to support the resolution of basic to intermediate work problems and tasks under close supervision in one or more of the following areas: servers, systems, storage, software and peripherals as well as to act as an escalation point for issues not able to be resolved by lower tiers. Work requires creative and original thinking and is performed under the direction of more senior ITS staff. A highly customer service driven approach is required. This role typically reports to the ITS Infrastructure Services Manager.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Demonstrates basic to intermediate knowledge in at least one of the departmental section disciplines: server management, system administration, network management, desktop management, mobile device management, security management, incident management, audio visual systems support, project management, document management, service management, asset management, storage area network.
- Demonstrates job knowledge, quality, dependability, judgment, communications and initiative, with demonstrated basic to intermediate proficiency in at least one of the following core competencies: analysis, design, planning, implementation, monitoring/controls, troubleshooting and problem solving.
- Demonstrates technical support that fosters commitment, team spirit, pride and trust. Facilitates and fosters open communication and cooperation within the organization and with customer groups in a team environment.
- Supports organizational change that fosters a quality of service essential to high performance. Supports a shared vision and is able to work with others to translate vision into actions and meaningful contributions that drive performance to higher levels of effectiveness and productivity.
- Shows initiative; manages and performs personal daily activities under the discipline of defined departmental business processes.
- Executes tasks and work assignments with a demonstrated ability to focus on priority tasks.
- Supports resolution of standard incidents and problems; distinguishes between relevant and irrelevant information to make logical decisions.
- Takes ownership of assignments and works as part of a team with an appropriate sense of urgency.
- Communicates effectively, both verbally and in writing, to peers and management. Prepares and delivers occasional section-level presentations to various audiences using clear, concise and effective communication.
- Performs basic setup, installation, and configuration of the operating system (including hardware and software) and assists with the setup, installation, and configuration of new software releases and upgrades.
- Creates and manages user directories and files on the server platforms.
- Monitors, diagnoses and resolves common operating system problems
- Assists with the troubleshooting, maintenance and repair of operating systems and applications.
- Assists with backup and recovery processes
- Assists with the evaluation and recommendation of various software and hardware solutions to meet user needs.
- Functions in a highly customer service driven manner.
- Performs other related work and duties as assigned or required.

In addition, the following specific skill are required for this role:

- Knowledge of Microsoft Windows Server environments, preferably 2012R2, 2016.
- Knowledge of server virtualization technologies, preferably VMware versions 6.0 and 6.5.
- Knowledge of backup/restore technologies and products, preferably NetBackup
- Knowledge of Microsoft Windows Server Clustering.
- Knowledge of vulnerability identification/remediation techniques and applications.
- Knowledge of datacenter configuration and operational support methodology.
- Knowledge of Active Directory management, including but not limited to, Group Policy administration, replication, and user/group permissions.
- Knowledge of systems analysis, development, project planning, and documentation methods (including the use of Visio) and standards.
- Some Knowledge of various storage system technologies, including iSCSI, Fiber-Channel, DAS, NAS.
- Some knowledge of Red Hat Enterprise Linux Version 6 or Version 7.
- Willingness to learn, research and support new technologies
- Willingness to support critical systems after normal working hours.
- Willingness to work Non-Standard Hours, including nights, weekends and holidays as required.
- Ability to collect, organize and evaluate data and make logical decisions.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.

MINIMUM QUALIFICATIONS

Education: Associate Degree in Computer Science, Computer Information Systems, Business Administration, Mathematics, or a directly related field.

Experience: Two years of information technology experience in basic to intermediate support of servers, systems, software, peripherals and storage technology.

Education/Experience Equivalency: Additional relevant education and experience may be substituted for the minimum education and experience requirement.

POSITION OVERVIEW

As the Visual Communications Designer with HCAA, you will need to listen to clients and understand their needs before making design decisions. Understanding "why" will drive "what" a successful outcome looks like. You will work on a variety of projects, such as websites, advertising, posters, exhibitions and displays, corporate communications and corporate identity. All while ensuring the consistency and quality synonymous with the HCAA brand. The work demands creativity, up-to-date knowledge of industry software and a professional approach to time, costs, and deadlines.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Work with internal and external stakeholders to create new and original print, web, and multimedia designs based on client specification, needs, and the established HCAA brand standards.
- Collaborate with internal and external partners as needed on the development of communications pieces.
- Advise clients on strategies to reach a particular audience.
- Present the design to clients and/or the Brand and User Experience Manager for approval.
- Create and maintain files for all creative assets and resources, such as software, art materials, and special fonts as required for record keeping and referencing.
- Assist in the management of production for all pieces from conception to completion.
- Produce print-ready files for use in production as required, including correct file formatting, trim and bleed marks, etc.
- Attend press checks as needed and conduct quality checks on all pieces.
- In collaboration with the project manager, ensure delivery of the assigned project within the agreed upon budget and timeline.
- Serve as a reserve photographer and support for videography efforts.
- Support social media efforts and campaigns with images and/or video.
- Creatively seek out new products and maintain cutting-edge industry knowledge.
- Attend meetings as assigned.
- Performs other duties as assigned.

MINIMUM QUALIFICATIONS

Four-year related degree and a minimum of 5 years design experience in an in-house creative department or design firm.

Or

An equivalent combination of education, training, and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Possess strong creative, organizational, problem-solving and time-management skills.
- Must have a good working knowledge of corporate branding, print/digital media, and color theory.
- Possess strong conceptual skills, high-level sense of design, layout, and typography. A broad thinker who is able to offer a variety of design solutions.
- Be an adaptable and quick learner. Must be able to apply style guides creatively while upholding brand identity for

the HCAA as well as those of our HCAA's partners when collaborating.

- An expert-level knowledge of Adobe Creative (i.e. Photoshop, InDesign, After Effects, etc.) and Microsoft Office Suite (i.e. Word, Excel, PowerPoint). Experience with HTML and motion graphics a plus.
- Familiarity with DSLR, action cameras, and mobile phone video and photography equipment and accessories.
- Excellent interpersonal and communication skills.
- Expert knowledge in the print and digital graphic production process.
- Must work well with tight deadlines in a team environment.
- Able to take projects from start to finish with minimal supervision.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

The role of Communications Manager will serve as the primary content creator for Tampa International Airports (TPA's) social media platforms, including Facebook, Twitter, Instagram and other emerging platforms. The position will play a key role in managing all interactions on TPA's social profiles as well as addressing key questions, comments and concerns. Will assist with analyzing content, generating monthly reports and identification of target areas for future growth. The Communications Manager will also be responsible for the implementation, growth and ongoing maintenance of TPA TV to internal and external audiences and for managing all assignments related to social media and TPA TV. Reporting to the Senior Communication Manager, the incumbent will also assist in the supervising Communications interns and or part-time employees assigned to the Communication Team.

POSITION ACCOUNTABILITIES

Note: The following job description is not intended to be, nor should it be construed as an all-inclusive list of responsibilities associated with this position. The duties listed are illustrative, not exhaustive and any omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Management may require incumbents to perform job duties other than those contained in this document at any time.

- Identifying and developing content for the airport's social media/other outlets. Research, develop and write content independently with minimal oversight.
- Managing or co-managing projects related to social media (this includes coordinating efforts between multiple departments and maintaining production schedules)
- Taking photos, video and coordinating with TPA's Design-Studio on social media projects
- Managing TPA's social media content calendar
- Using discretion and professionalism while rapidly responding to and tagging all important inbound messages while promoting TPA's key messages
- Identifying and interacting with key influencers
- Moderating, managing and facilitating all TPA-managed Facebook groups
- Hosting social media events/tours from the planning and development stage to execution (working with other departments, coordinating logistics, working with vendors)
- Supports Communication staff with research and other needs
- Stays current on all news relevant to TPA Airport Communications and is aware of key talking points
- Assists with the development of research methodologies; ensures the soundness of principles used in developing new communication strategies to address current and emerging business needs.
- Provides direct analytical/communication support to individual business units within the Airport.
- Assists in disseminating information to the public via social media platforms in crisis incidents.
- Responsible for overseeing key airport campaigns and initiatives with internal and external business partners.
- Responsible for oversight and growth of TPA TV, including all content creation, content scheduling and implementation of TPA TV throughout the airport.
- Assists the Communications team with all internal and external communications efforts, as needed. These include:
    a. Serving as a primary contact for the Aviation Authority with local and national news media and industry publications
    b. Responds to media requests in a timely manner
    c. Proactively seeks placement of stories about TPA in national, local and industry publications
    d. Writes, edits and designs content for distribution in Airport newsletter and community publications

e. Manages media relations internship program, coordinating with local universities and providing supervision and meaningful experience for interns.
f. Researches, writes and edits internal and external communications for the CEO and other executive staff
g. Monitors news coverage of the Aviation Authority and aviation industry, identifying trends and opportunities for promoting Airport initiatives.
h. Responsible for creating or assisting in the creation of key airport messages

MINIMUM QUALIFICATIONS

The minimum qualifications required to perform successfully in this position are Bachelor's degree from an accredited institution in Communications, Journalism, Marketing, Public Relations and proven experience using social media platforms in a business setting.

ADDITIONAL QUALIFICATIONS

- Must be able to work independently under tight deadlines/quick turnarounds with minimal supervision and direction
- Strong writing and interviewing skills
- Strong photography and videography skills
- Strong social media following with an understanding of current best practices
- Basic or greater level of experience using Hootsuite or another social media management tool
- Proficient with InDesign and video editing

JOB SPECIFIC COMPETENCIES

- Deep curiosity and evidence of completing independent research in either a business or academic environment.
- Strong interest in a career in market research.
- Ability to prepare and present detailed information to management and clients.
- Ability to manage multiple resources and projects to achieve successful results.
- Ability to establish and maintain effective working relationships, both inside and outside the organization.
- Ability to communicate effectively, both orally and in writing.
- Ability to direct specialized work.
- Ability to use substantial reasoning and problem-solving techniques.
- Ability to perform duties beyond the principal accountabilities listed as needed.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Director, Government Affairs

POSITION OVERVIEW

Reporting to the Assistant Vice President of Media and Government Relations, the Director of Government Affairs is responsible for coordinating the Aviation Authority's federal, state and local inter-governmental relations activities and promoting its interest with regard to legislation which could have an impact on the Aviation Authority. The incumbent is responsible for monitoring pertinent federal, state and local proposals throughout the legislative process and notifying the Chief Executive Officer, the General Counsel and senior management of potential operational or administrative impacts.

Utilizing lobbying techniques the Director of Government Affairs will attend and/or monitor relevant federal and state legislative committee meetings, as well as local, regional and national meetings and conferences concerning issues that may impact the Aviation Authority. The incumbent will develop federal and state legislative and funding initiatives and collate the final results of legislative action to provide an annual report to staff regarding new laws pertinent to the Aviation Authority.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Develop and maintain contact with federal, state and local elected officials and agency representatives associated with the operation and development of commercial international and general aviation facilities and surrounding transportation and economic development.
- Prepare and present updates to the Aviation Authority Board as to the status of all legislative activities that are under review that could impact the Aviation Authority.
- Attend and monitor public meetings of elected bodies and federal, state and local agencies that may impact operation and/or development of the Authority's airport system.
- Coordinate the Authority's federal, state and local inter-governmental relations activities by assembling information, monitoring legislative and regulatory proposals, and preparing recommendations for review of the Executive Director.
- Coordinate and conduct meetings with public leaders and agencies in promoting federal and state funding and legislative initiatives.
- Develop and maintain contact with industry trade associations that benefit the aviation and transportation community.
- Research legislation that may impact the Authority and develop strategies for approval of legislation supported by the Authority.
- Draft and disseminate legislative summaries and conduct briefings to relevant staff members.
- Represent the Chief Executive Officer and serve as liaison with federal, state and national professional associations.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor's degree in business, political science or related field and at least five years of responsible experience in the public sector or areas related to the legislative process.

Department:	Media & Government Relations
Pos. No:	12078

Pos. No:	TBD
Pay Grade:	E5 ($89,000-$185,000) – **Exempt**
Last update:	12/2018 Talent Acquisition

POSITION OVERVIEW

Reporting to the Executive Vice President of Marketing and Communications is responsible for developing and implementing a dynamic communications program which will proactively advance the interests of the Authority's policies and programs. This position is responsible for providing leadership to a communication staff and will work closely with other program leaders and staff in helping implement a mission-focused, enterprise-level communications strategy. The Vice President will continually develop and improve communication approaches to advance the Authority's programs and initiatives.

The Vice President will also work to align external stakeholders and consultants to leverage the Authority's visibility and brand in order to advance its policy and program initiatives. The Vice President will be an innovative, creative and strategic communications leader. The Vice President serves as a member of the senior management team and is responsible for the overall planning, budgeting, staffing, and evaluation of all communications activities consistent with policies established by the CEO and the Board.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Continually develop and improve communications resources and approaches to advance the Authority's program strategies and initiatives.
- Provides leadership for design, implementation, and management of issue-focused communication enterprise.
- Develops strategic communications plans, both proactively and responsibly to breaking events.
- Develops workable implementation plans; communicates changes effectively; build commitment and overcomes resistance; prepares and supports those affected by change; monitors transition and evaluates results.
- Effectively utilize social media and other online formats, as well as more traditional media/communications vehicles, to ensure information on the Authority is accurate, consistent and accessible to external audiences.
- Efficiently communicate Authority image and positions to maintain or enhance credibility with key audiences; engage potential partners or allies who share similar goals; and, proactively engage critical stakeholders to advance the mission of the Authority.
- Works in direct partnership with Authority's staff to mutually develop program-related communications strategies that are built into broader program plans and effectively utilize the Authority's other internal resources when appropriate.
- Reinforces, trains, and grows staff's capacity to effectively engage with key audiences about the organization's mission, program outcomes and goals in alignment with the Authority's core values.
- Provides regular strategic and tactical communication support to CEO's Office and leadership to advance critical goals and priorities.
- Provides insight to the communication of critical information relayed to the Board of Directors and provides counsel on strategic communications as needed.
- Ensures all staff has access to useful and timely information about the Authority.

The Vice President should ideally embody the following professional attributes and minimum qualifications:

KEY ATTRIBUTES:

- Proven capacity to communicate with, and successfully reach, culturally and ethnically diverse target audiences, especially within the nonprofit, policy, and/or philanthropic sectors.
- Looks for ways to fulfill the vision; shows commitment to the organizational mission and guiding principles; inspires respect and trust.
- Looks for ways to improve and promote quality; demonstrates accuracy and thoroughness.
- Able to generate and deliver persuasive and clear verbal, graphic, and written communications.
- Outstanding interpersonal skills; must have credibility, good judgment, honesty, and integrity.
- Ability to listen and process complex information quickly.
- Ability to manage change with flexibility and grace.
- Initiative to solve problems with energy and a positive attitude.
- Able to anticipate, prioritize, and manage tasks while simultaneously demonstrating genuine respect for diversity and inclusiveness with multicultural sensitivity.
- Demonstrated and effective people management and employee development skills.

LEADERSHIP DIMENSIONS:

- Verbal Written and Technology Based Communications – Seeks and listens for critical thoughts, ideas, and feelings, and technical information in an accurate and concise manner. Tailors delivery method and tone of communication to meet the needs and preferences of the other person and/or audience. Is adept at accessing and appropriately utilizing the Authority's communication channels.
- Builds Effective Relationships – Establishes enduring and inclusive relationships within the Authority and with all key stakeholders. Commands the respect of employees, his/her peers, customers, and stakeholders. Manages beneficial partnerships in ways that take full advantage of internal and external synergies. Understands the impact of personal behavior on the perceptions of others. Places a high priority on the values of honesty, accountability and integrity.
- Gold Level Customer Service – Communicates a genuine willingness to work positively with all customers and visitors to the airport. Actively listens to their questions and/or concerns. Accurately identifies the service that will meet the customer's needs and wants. Proactively utilizes his/her comprehensive knowledge of the Authority's systems and services to explore options that go beyond the customer's immediate questions or concerns to create an expanded solution to the problem.
- Leadership and Engagement – Creates a positive environment and inspires others to buy into the Authority's mission and vision. Recognizes strategic possibilities and aligns the Authority's vision with those options. Clearly articulates the organization's direction by utilizing a variety of communication channels. Fosters a diverse culture where individual respect and enterprise-wide teamwork thrives. Passionately and convincingly articulates the steps and changes necessary to achieve the Authority's goals. Holds self and all employees accountable for achieving the performance goals.
- Leading and Managing Performance – Establishes clear direction and articulates the vision, priorities, and annual performance objectives. Communicates messages that motivate and inspire others to action. Fosters a work culture where mutual respect and enterprise-wide teamwork thrive. Builds ongoing learning into the Authority that enables

team to realize their full potential. Ensures that team has accurate and timely feedback and the required resources to ensure successful performance.

- Professionalism-Delivering the Results - Demonstrates a commitment to personal excellence, ethical behavior, and integrity. Seeks out and acts on feedback. Addresses problems and makes appropriate decisions. Exhibits a personal commitment to overcoming obstacles. Demonstrates a commitment to continuous learning. Holds self-accountable for behavior and results.

MINIMUM QUALIFICATIONS

Must possess a B.A. in a related field and have at least five years of experience in communications, public relations or other related field. Ideal candidate will be bilingual.

TPA MISSION STATEMENT

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Department:	Maintenance
Pos. No:	00000
Pay Grade:	NE3 ($17.36-$32.55) Non **Exempt**
Last update:	8/2018 Compensation

POSITION OVERVIEW

Performs administrative duties overseeing maintenance and repair personnel engaged in skilled, specialized or technical trades work related to maintenance, repair or construction of buildings, grounds, or roadways, and related systems and equipment to enhance and maintain assets at a prescribed standard.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Oversees the activities of skilled trades and maintenance personnel engaged in the construction, repair and maintenance of buildings, grounds, or roadways, and related systems and equipment.
- Develops, analyzes and updates maintenance policies and procedures to ensure an efficient, effective and safe work environment.
- Monitors, prioritizes, participates in, and inspects work activities to ensure compliance with plans, specifications, codes, standards, regulations, operating instructions and safety standards and to ensure operational efficiency and a safe working environment.
- Plans job layouts, estimates materials, determines equipment and tools, and makes drawings or sketches necessary for maintenance personnel to properly perform work assignments.
- Determines, schedules and oversees preventive maintenance activities to increase operational effectiveness and extend the lifecycle of assets.
- Requisitions equipment, tools and materials in a timely manner to ensure maintenance and construction schedules are met.
- Assists in developing contract specifications and overseeing the performance of contracts in assigned area to ensure construction and maintenance requirements are satisfied and services are completed in accordance with specifications.
- Answers questions and provides information related to work assignments including resolving problems, handling complaints and providing technical expertise in area of assignment.
- Prepares and maintains manual and computerized reports, records and logs related to the work performed, and materials, equipment and supplies used to provide an audit trail of activities.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

An Associate's degree in Construction Technology or an Engineering Technology; and seven years of work experience in construction, maintenance, or the skilled trades; and including two of which must have been in a supervisory capacity or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the rules, regulations and operational requirements of the organization to which assigned.

- Working knowledge of accepted methods, practices and procedures used in the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Working knowledge of equipment, tools and materials used in the construction, repair and maintenance of buildings, grounds and roadways and related systems and equipment.
- Working knowledge of safety practices and principles related to the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Working knowledge of record keeping requirements.
- Working knowledge of laws, ordinances, rules, regulations and standard operating procedures related to the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Working knowledge of the organization's procurement system.
- Skill in overseeing and performing routine repairs, maintenance or construction of buildings, grounds, or roadways, and related systems and equipment.
- Skill in the use of tools and equipment used in the construction and maintenance of building, grounds, or roadways and related systems and equipment.
- Ability to communicate effectively both orally and in writing.
- Ability to accurately assess maintenance and repair needs and make adjustments to maintenance crews and/or schedules as required.
- Ability to collect, organize and evaluate data and develop logical conclusions.
- Ability to work outside in a sub-tropical climate.
- Ability to stand for extended periods of time, kneel, bend and climb in the performance of duties.
- Ability to work effectively with others.
- Ability to use a computer and related software.
- Ability to read and interpret construction plans, specifications, blueprints, diagrams and drawings.
- Ability to plan, organize and oversee the work of others.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Maintenance Repair Leader (Fleet Maintenance)

POSITION OVERVIEW

Performs supervisory duties involving maintenance and repair of airport fleet vehicles and other mechanical airport support equipment. Repairs and maintains assets at a prescribed standard. Provides technical support to junior mechanics on complex problems and prioritizes and completes a large workload with available resources.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supervises the activities of skilled and unskilled trades and maintenance personnel engaged in the construction, repair and maintenance of buildings, grounds, or roadways, and related systems and equipment by planning, scheduling, assigning and reviewing work, providing training and counseling, and evaluating performance.
- Monitors, prioritizes, participates in, and inspects work activities to ensure compliance with plans, specifications, codes, standards, regulations, operating instructions and safety standards and to ensure operational efficiency and a safe working environment.
- Plans job layouts, estimates materials, determines equipment and tools, and makes drawings or sketches as necessary for maintenance personnel to properly perform work assignments.
- Determines, schedules and oversees preventive maintenance activities to increase operational effectiveness and extend the lifecycle of assets.
- Answers questions and provides information related to work assignments including resolving problems, handling complaints and providing technical expertise in area of assignment.
- Prepares and maintains manual and computerized reports, records and logs related to the work performed and materials, equipment and supplies used to provide an audit trail of activities.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and
Seven years of work experience in construction, maintenance, or the skilled trades; including
One year of experience in a supervisory capacity.

Or

An equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Working knowledge of accepted methods, practices and procedures used in the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Working knowledge of equipment, tools and materials used in the construction, repair and maintenance of buildings, grounds or roadways and related systems and equipment.

- Working knowledge of safety practices and principles related to the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Working knowledge of record keeping requirements.
- Some knowledge of laws, ordinances, rules, regulations and standard operating procedures related to the construction, repair and maintenance of buildings, grounds, or roadways and related systems and equipment.
- Skill in supervising and performing routine repairs, maintenance or construction of buildings, grounds, roadways, and related systems and equipment.
- Skill in the use of tools and equipment used in the construction and maintenance of building, grounds, or roadways and related systems and equipment.
- Ability to communicate effectively both orally and in writing.
- Ability to accurately assess maintenance and repair needs and make adjustments to maintenance crews and/or schedules as required.
- Ability to work outside in a sub-tropical climate.
- Ability to stand for extended periods of time, kneel, bend and climb in the performance of duties.
- Ability to work effectively with others.
- Ability to use a computer and related software.
- Ability to read and interpret construction plans, specifications, blueprints, diagrams and drawings.
- Ability to plan, organize and supervise the work of others.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: Landscaping Maintenance Leader

POSITION OVERVIEW

This is a skilled Lead Worker position requiring working knowledge of interior plants, live foliage, greenhouse operations, propagation and managing plant stock. The ideal candidate for this position should have a minimum of three years' experience working in a greenhouse, nursery or interior landscape operation. This position will be required to assign work and lead those individuals working within the Interior Landscape section. Administrative duties include estimating materials and determining operational needs to perform tasks; performing employee training; address employee issues to include coaching and employee support; assist with providing performance evaluation information; and time clock management. The individual is required to have working knowledge of Microsoft Office and Oracle computer software; ability to communicate effectively both verbally and in writing; ability to make decisions and prioritize work; provide outstanding customer service; and the ability to work with Airport tenants in a professional manner.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Leads workgroup effort in designing, installing and managing interior landscaping to include constant displays throughout the Main Terminal and Airsides.
- Works with other Departments regarding plant arrangements and setups for special events.
- Trains, schedules and provides oversight of employees in interior landscaping practices and greenhouse operations.
- Proactively seeks out floral and plant arrangements that enhance the ambiance of interior spaces at Tampa International Airport.
- Works with the Landscape Maintenance Superintendent to provide annual performance review information and employee issues for those individuals working in interior landscaping.
- Provides ongoing communications with other Authority Departments and Airport Stakeholders and serves as lead coordinator for arranging setup requests.
- Performs related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and three years of experience working in a greenhouse, nursery or interior landscape.

JOB SPECIFIC COMPENTENCIES

- Working knowledge of growing flowers, interior plants, live foliage, and palms.
- Working knowledge of plant identification, problems and insects.
- Working knowledge of Microsoft Office and Oracle computer software.
- Working knowledge of the functions, services and procedures of the Landscape Maintenance Section.
- Some knowledge of the laws and regulations governing insecticide use.
- Ability to work effectively with others.
- Working knowledge of greenhouse operations, propagation and managing plant stock.

- Ability to communicate effectively both orally and in writing.
- Ability to organize information into a logical presentation format.

Tampa International Airport

Position Title: Maintenance Supervisor (Landscaping)

POSITION OVERVIEW

The ideal candidate for this position has extensive operational experience in parks and grounds landscape work from more than one discipline (maintenance, installation, pest control, sports turf, etc.). Individual will perform landscaping supervisory duties to include inspection of airport property for issues needing attention and planning associated landscaping work. Administrative duties include estimating materials and determining equipment needs to perform tasks; coordinating employee training; supervising personnel to address employee issues to include coaching and employee support; performance evaluations; time clock management; and construction project coordination. Individual should possess ability to use computer software for a variety of tasks, excellent verbal and written communication skills, and strong ability to make decisions and prioritize work for varying work locations.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Oversees the activities of skilled trades and maintenance personnel engaged in the construction, repair and maintenance of buildings, grounds, or roadways, and related systems and equipment.
- Develops, analyzes and updates maintenance policies and procedures to ensure an efficient, effective and safe work environment.
- Monitors, prioritizes, participates in, and inspects work activities to ensure compliance with plans, specifications, codes, standards, regulations, operating instructions and safety standards and to ensure operational efficiency and a safe working environment.
- Plans job layouts, estimates materials, determines equipment and tools, and makes drawings or sketches necessary for maintenance personnel to properly perform work assignments.
- Determines, schedules and oversees preventive maintenance activities to increase operational effectiveness and extend the lifecycle of assets.
- Requisitions equipment, tools and materials in a timely manner to ensure maintenance and construction schedules are met.
- Assists in developing contract specifications and overseeing the performance of contracts in assigned area to ensure construction and maintenance requirements are satisfied and services are completed in accordance with specifications.
- Answers questions and provides information related to work assignments including resolving problems, handling complaints and providing technical expertise in area of assignment.
- Prepares and maintains manual and computerized reports, records and logs related to the work performed, and materials, equipment and supplies used to provide an audit trail of activities.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

An Associate's degree in Construction Technology or an Engineering Technology; and
Seven years of work experience in construction, maintenance, or the skilled trades; and including
Two of which must have been in a supervisory capacity.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position will manage department functions in support of the Senior Manager of Maintenance – Automated Systems including technical participation on complex, large scale, capital projects; management of small to medium sized capital or maintenance refurbishment projects; assistance in managing budgets; trades training and assistance with the management of personnel in the trades groups that comprise the Automated Systems Division.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Performs project management work by managing, coordinating and implementing small and medium sized projects. Participates in the development of the scope of work.
- Provides highly technical support on large scale capital projects throughout all phases including: design planning and review, construction inspection and management, project close out.
- Prepares contract drafts, requests for proposal and other related documents for review. Creates project schedules and controls resources to ensure timely completion of project.
- Interprets, explains and ensures compliance with Authority Construction Program requirements, regulations and procedures.
- Prepares and/or monitors project and O&M budgets, monitors status of allocated funds and controls expenses.
- Coordinates with other Maintenance Dept. divisions, organizational departments, consultants and contractors to ensure efficient flow of communications and services.
- Reviews and acts on project management, administrative, and operational problems.
- Assists with the management and activity planning of multiple trades divisions in achieving established organizational goals and objectives; coordinating functions; assignment, monitoring and reviewing work.
- Develop spreadsheets or reports to support sustainability initiatives.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four-year degree granting college or university; and four years of personnel management and construction project experience directly related to the position duties or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Knowledge of project and personnel management theory, techniques and tools.
- Knowledge of building functions and mechanical systems related to large commercial facilities.
- Ability to effectively coordinate resources in the successful completion of projects.
- Ability to analyze, organize and prioritize work while meeting multiple deadlines.
- Ability to use Microsoft Excel spreadsheets to collect, organize and analyze data. Must have familiarity with Microsoft Office suite including Word, Outlook, and PowerPoint.
- Ability to establish and maintain constructive and cooperative interpersonal relationships with staff, peers, management and local stakeholder groups to accomplish department's mission.
- Ability to analyze data and make correct inferences or draw accurate conclusions.
- Skill in developing tracking systems to monitor work progress.
- Ability to work collaboratively with other departments on common objectives.
- Ability to communicate effectively to personnel with varying degrees of technical understanding. Must be able to communicate orally and through the technical writing of reports and email.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: Building Maintenance Superintendent

POSITION OVERVIEW

The ideal candidate for this position has extensive supervisory experience in building maintenance and repair of a large public facility (airport, hotel, theme park, sports stadium, office building, hospitals and universities). Supervisory and administrative duties include estimating materials and determining equipment needs to perform tasks; coordinating employee training; supervising personnel to address employee issues to include coaching and employee support; performance evaluations; time clock management; and construction project coordination. Candidates should possess the ability to use computer software for a variety of tasks, have excellent verbal and written communication skills, and the ability to make decisions and prioritize work for varying work locations.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supervises the activities of employees and monitors contractors engaged in building maintenance and repair of large commercial facilities; installation, inspection, maintenance, and repair of plumbing systems, flooring, carpentry, specialized equipment, outside structures, or roofing systems.
- Establishes preventive maintenance programs, procedures and schedules; supervises an equipment safety inspection program and makes periodic inspections to ensure proper maintenance of equipment.
- Reviews contract bids and inspect work performed by contractors to ensure conformance to specifications and contract integrity; brings contract inadequacies to the attention of management, and follows up to ensure correction of contract performance.
- Requisitions and maintains replacement parts and materials in central stock to allow timely completion of assignments.
- Prepares technical specifications for equipment acquisition and repair projects.
- Provides technical advice and assistance to subordinates; trains personnel in safety procedures and operating standards.
- Creates and manages budgets and administers employees performance evaluations
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and three years of experience as the supervisor of either a construction work crew or in the area of facility maintenance and repair.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the principles, practices, methods, tools, materials and equipment used in the maintenance and repair of buildings and other physical structures and plumbing systems.
- Considerable knowledge of codes, rules, regulations and requirements pertaining to area(s) of responsibility.
- Working knowledge of occupational hazards and applicable safety regulations, standards, and equipment.
- Ability to locate, analyze, and diagnose structural deficiency or equipment malfunctions.

- Ability to establish and maintain effective working relationship with subordinates, peers, and others.
- Skill in the application of supervisory techniques.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Vice President of Facilities and Customer Service, this position is responsible for ensuring that all facilities, systems and equipment are maintained in accordance with industry standards and to meet or exceed customer expectations for safety, aesthetics, convenience, reliability and value.

The facilities involved are all terminal buildings and other Authority-owned buildings, roadways and grounds, airfield pavements and grounds, and parking structures. Maintenance of these facilities includes aesthetic components, structural components, and roofs. The systems and equipment-related components consist of mechanical/electrical/plumbing systems, people mover and conveyance systems, baggage handling systems, aircraft boarding bridges, electronic visual displays, security/access control, fire detection and protection, and all Authority-owned vehicles, including heavy equipment.

Maintenance is accomplished with a combination of in-house personnel and specialty outsourced contracts. The largest outsourced labor contract is for janitorial services which are provided in all public areas and in airline exclusive use spaces in all terminals. In-house personnel are separated into major functional areas consisting of administrative/work control, multi-trades workers, technical/systems personnel, and outsource resource managers. In addition to the maintenance-related functions above, the position is responsible for the administration of the Authority's tenant work permit program (TWP) and key control functions. The TWP program ensures that all tenant work is performed according to applicable codes and standards, and with appropriate insurance and bonding in place. The key control function ensures that a proper key hierarchy is established and maintained for all Authority controlled spaces.

The position ensures the development and implementation all staffing plans; outsource contracting, and management programs that may be required. Accordingly, the position is responsible for ensuring that all operating and maintenance resource requirements, including water and electric utility services, are properly budgeted and monitored.

The Director of Maintenance is part of the senior management staff and is responsible for recommending and developing: policies and procedures, project management plans, goals and objectives, and business plans. Specifically, this position is responsible for ensuring that all major decisions take into consideration the following as may be appropriate: human resource issues, life cycle costs, asset replacement and refurbishment, utility costs and natural resource management, O&M costs, safety and reliability, maintainability, and customer service. The Director of Maintenance also a member of the development committee which directs the capital program of the Authority.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

1. Responsible for the department's budgets for operations and maintenance, equipment and capital projects
2. Responsible for ensuring that all necessary specialty maintenance service contracts are established, procured and maintained
3. Responsible for overall management of maintenance activities to ensure safety, reliability and high level of customer satisfaction
4. Responsible for the development of departmental goals and objectives

5. Responsible for ensuring that all necessary projects to replace facilities/equipment/systems are identified on the business plan
6. Responsible for ensuring that management processes are in place to properly administer the Authority's tenant work permit program and key control functions
7. Responsible for ensuring that an organizational structure is in place which will fulfill the department's mission in the organization and provide maximum opportunities for employee development and advancement
8. Responsible for ensuring a cost effective operation

Reporting directly to the Director of Maintenance are:

Different levels of Project and General Managers, who are responsible for the various sections of maintenance: clerical, contracts, fuel, airfield maintenance, landscaping, fleet, building maintenance, projects, airport systems, and plant (HVAC, electrical, electronics).

MINIMUM QUALIFICATIONS

A Bachelor's degree from an accredited college or university, preferably in engineering, with six years of progressive experience managing a maintenance operation of similar complexity and budget responsibility. Significant high-level management experience at an airport of comparable size may be substituted for some of the educational requirements. Knowledge and experience in all aspects of maintenance, including budget management, is essential. Experience with a large maintenance operation that includes utilization of in-house and outsourced resources is necessary. Familiarity with all aspects of airport operations is desired.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Fleet Maintenance Superintendent

POSITION OVERVIEW

Performs supervisory and technical duties planning and directing the maintenance and repair of internal and external structures and facilities, or operating, maintaining and repairing mechanical and electronic equipment.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Tampa International Airport

Position Title: Maintenance Manager, Contracts

POSITION OVERVIEW

Performs management oversight for all Automated People Mover (APM) systems Operations and Maintenance (O&M) contracts at Tampa International Airport (TPA), including the System Safety Program Plan (SSPP) oversight compliance, preparation and submission of annual Florida Department of Transportation (FDOT) safety reports, updates, and supervision of support staff.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manage and oversee Automated People Mover (APM) O&M contracts valued at approximately $7,000,000 per year.
- Prepare the Hillsborough County Aviation Authority (Authority) for new Federal Transit Administration (FTA) regulations and compliance.
- This position will be the liaison between the Authority and FDOT and will prepare all formal communications to FDOT on behalf of the Authority.
- Conduct and oversee all internal safety audits per FDOT and System Safety Oversight policies.
- Develop and submit Corrective Action Plans (CAPS) to FDOT as required.
- Update SSPP document as needed.
- Co-chair the System Safety Committee for the Authority and act as Chair as needed.
- Coordinate annual mock drills as required by FDOT.
- Coordinate all required external safety inspections.
- Respond to accidents, conduct accident investigations, and submit required communications to FDOT, NTSB, and/or OSHA as outlined in SSPP.
- Ensure that the APM systems are in compliance with the Authority SSPP document and FDOT regulations.
- Review pay request and performance reports
- Review of contract documents and perform vendor quality assurance inspections to ensure compliance
- Monitor Automatic Transit System (ATS) operation
- Evaluate and approve extra work requests
- This position may also supervise and direct support staff.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Four-year college/university degree and at least three years of contract management experience. Oversight of APM systems or transit rail vehicles, SSPP and safety programs highly preferred. An equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below will also be taken into consideration.

JOB SPECIFIC COMPENTENCIES

- Working knowledge of design, operation and maintenance criteria for computer-controlled airport APM systems and maintenance facilities.
- Knowledge of Safety Management Systems and SSPP for APM or Rail Transit Vehicles.

- Working knowledge of electrical and mechanical engineering principles and practices.
- Working knowledge of airport and APM/transit systems terminology and operating philosophy.
- Ability to use a computer, email, internet, and Microsoft office applications.
- Ability to read, review, and interpret technical reports, contracts, specifications, and plans.
- Ability to draft accurate and professionally-finished reports.
- Ability to supervise people
- Experience in contract documents and managing contractors.
- Ability to identify discrepancies between construction specification drawings and work performed.
- Ability to communicate effectively both orally and in writing.
- Ability to work effectively with others.
- Knowledgeable in all aspects of FDOT SSPP preparation, internal safety audits, Safety Management System, and development of FDOT annual safety reports preferred.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Maintenance this position will perform high-level managerial duties in support of the department's QA/QC program and maintenance contracts that have significant visibility and impact to the Aviation Authority. Also assists division senior managers in tracking performance of maintenance activities, personnel and budget management, and development and administration of training programs for personnel development and compliance. May provide department representation in capital projects attending design and construction meetings and coordinating construction activities to minimize facility impacts.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Performs management duties pertaining to the department's QA/QC program.
- Assists division senior managers in personnel management including performance assessments and corrective action.
- Performs maintenance contract management work by managing, coordinating and monitoring contractor performance on assigned contracts.
- Establishes administrative procedures and guidelines to ensure effective contract management outcomes.
- Works closely with the Procurement department as subject matter expert on the procurement of maintenance supplies, services and contracts.
- Prepares contract work scope drafts, bid schedules, pay applications and other related documents for review.
- Develops and administers training programs for personnel development.
- Prepares and/or monitors division budgets, monitors status of allocated funds and controls expenses.
- Actively serves as department representative on capital projects to ensure Maintenance requirements are met and work is coordinated with minimal impact to airport operations.
- Creates and coordinates work schedules and controls resources to ensure timely completion of work.
- Coordinates with other divisions and departments to ensure efficient flow of communications and services.
- Reviews and proactively acts on operational problems.
- Interprets, explains and ensures compliance with program requirements, regulations and procedures, and provides consultation to customers on matters relating to functional area.
- Assesses staffing needs and identifies shortfalls; interviews, recruits and hires new staff.
- Performs supervisory duties including performance evaluation and scheduling of subordinate personnel
- Assists other department managers and supervisors as needed
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university; and four years of maintenance contract management experience directly related to the position duties or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the functions, services, activities, requirements and objectives of the specific functional area to which assigned.
- Knowledge of federal, state and local regulations pertaining to assigned functional area.
- Knowledge of contract management principles, practices and objectives.

- Ability to establish and maintain constructive and cooperative interpersonal relationships with staff, peers, management and local stakeholder groups to accomplish department's mission.
- Ability to communicate effectively both orally and in writing in order to present information and prepare a variety of reports.
- Ability to identify relationships that explain facts, data or other information, and make correct inferences or draw accurate conclusions.
- Ability to effectively coordinate resources and manage these resources to a successful outcome.
- Ability to establish and maintain effective working relations with others within and outside own organization.
- Ability to collect, organize and analyze data and develop logical conclusions.
- Ability to effectively utilize Microsoft Office and Oracle programs.
- Skill in applying existing guidelines and in creating new approaches to develop and modify work plans, methods and procedures for the work unit or function.
- Skill in developing tracking systems to monitor work progress.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

MAINTENANCE PROCESS	Number: MP662.01 Effective: 09/30/2019 Revised:
SUBJECT: Qualified Maintenance Personnel Program	Page: 1 of 2

PURPOSE: To establish an in-house Maintenance Training Program for the existing trade sections within the Maintenance Department.

DEFINITION OF TERMS:

- **Qualified Maintenance Personnel –** all maintenance trade employees who have successfully completed the Maintenance Department's Qualified Maintenance Program for the appropriate section; Systems Maintenance, Building Maintenance, and Plant.

- **Maintenance Trainee –** a maintenance employee who is minimally qualified for the requirements of an existing Authority Maintenance entry level position.

  Ex: Automated Device Mechanic Trainee – an existing MTW employee who has completed the QMP entry level program as specified in the QMP Program. An external candidate who possess minimal experience and has completed an approved trade school curriculum.

PROCESS:

A. Automated Device Mechanics – Trainee (NE3 pay grade bottom of scale) for minimally qualified candidates from the following pool:

- **Systems Operations MTW** employees who have completed approved basic QMP entry level courses as outlined in the QMP program will be eligible to interview for ADM vacancies **(these are educational courses in Electrical and Motor Controls).**

- Minimally qualified external candidates with experience and/or electrical motor control trade school diplomas. This group of candidates must also complete the on-line QMP program within their probationary period as a condition of employment.

B. Automated Devices (NE 4 pay grade bottom of scale)

Promoted MTWs and/or external entry level ADMs must complete the entire on-line courses as specified in the QMP Program. Upon completion of the on-line courses, these candidates will have a salary increase, as outlined in the QMP Program, and will be eligible to continue with the remaining portion of the QMP program. Upon successful completion of the QMP program, the employee will receive a salary increase based on the level of proficiency.

C. Senior Automated Device Mechanics (New NE4 salary band)

All permanent Automated Device Mechanics will be eligible to enroll in the full Qualified Maintenance Personnel Program which includes completion of all on-lines courses, completion of the practical on-the job training portion, and passing of a final examination to validate that all required disciplines have been mastered by the employee. Upon successful completion of this program, the employees will be issued a certificate of completion from HCAA and have a salary increase adjustment as determined by the Director of Maintenance.

Tampa International Airport

Position Title: Multi–Trades Worker II (Airfield)

POSITION OVERVIEW

This is a skilled Airfield Maintenance position which is part of the team that is responsible for the maintenance and FAA FAR PART 139 compliance of approximately 1.5 million square feet of airfield paint markings, pavement condition indexing, field conditioning and security requirements. These include but are not limited to work associated with trash and liter routes, sweeper routes, asphalt and concrete spall repairs, fence repairs, large and small tractor mowing, chemical application, FDOT bridge repairs and signage installation and repairs at Tampa International Airport. The ideal candidate should have both heavy and light equipment operation experience, be familiar with Tampa International Airport, FAA Advisory Circulars and Airport Operations. This position may be required to work nights, weekends, and holidays. Additionally, this position must be able to lift up to 75 pounds. CITE Pavement Marking Training and Green Industries Best Management practices and Maintenance of Traffic experience is beneficial but not required.

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Repairs and adjusts plumbing, water lines, electrical wiring and equipment, plastering, furniture, shelves, doors, windows, and machines of various kinds.
- Participates in the erection of small structures and the more complex alteration, repair and maintenance of plumbing, electric, and water systems and/or fixtures, brick, cement, HVAC, and carpentry work.
- Paints interiors and exteriors of buildings.
- Performs electric and acetylene welding, brazing, and fabrication.
- Operates power equipment to include lathes, drill presses, threading machines, air compressors and gas operated saws.
- May supervise assigned laborers and trades helpers in maintenance work.
- May operate medium to heavy motorized equipment.
- Drives a vehicle to and from work sites.
- Cleans work site upon work completion.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from High school / GED; or
An equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below; and
Possession of a valid Driver's License.

JOB SPECIFIC COMPENTENCIES

- Working knowledge of procedures and techniques used in two or more construction trades.
- Working knowledge of the construction and maintenance of various types of buildings and facilities.
- Some knowledge of safety procedures and safety equipment.
- Skill in the use of hand and electrical/gas operated tools and equipment used in building and construction.

- Ability to read and interpret blueprints and drawings.
- Ability to work effectively with others.
- Ability to prioritize work.
- Ability to plan, organize and supervise the work of others.
- Ability to proof own work and work of others.
- Ability to operate a motor vehicle.
- Ability to work effectively with others.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Projects Maintenance Superintendent

POSITION OVERVIEW

Performs supervisory and technical duties planning and directing the maintenance and repair of internal and external structures and facilities, or operating, maintaining and repairing mechanical and electronic equipment.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supervises the activities of employees and monitors contractors engaged in building maintenance and repair; installation, inspection, maintenance, and repair of air conditioning, heating, refrigeration systems, mechanical equipment, specialized equipment, pavements, outside structures, or major electronic systems.
- Establishes preventive maintenance programs, procedures and schedules; supervises an equipment safety inspection program and makes periodic inspections to ensure proper maintenance of equipment.
- Reviews contract bids and inspect work performed by contractors to ensure conformance to specifications and contract integrity; brings contract inadequacies to the attention of management, and follows up to ensure correction of contract performance.
- Requisitions and maintains replacement parts and materials in central stock to allow timely completion of assignments.
- Prepares technical specifications for equipment acquisition.
- Provides technical advice and assistance to subordinates; trains personnel in safety procedures and operating standards.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and three years of experience as the supervisor of either a construction work crew or in the area of facility maintenance and repair.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the principles, practices, methods, tools, materials and equipment used in the maintenance and repair of one or more, of the following or a combination thereof: buildings and other physical structures, mechanical equipment and systems, vehicular and stationary equipment, or electronic systems.
- Considerable knowledge of codes, rules, regulations and requirements pertaining to area(s) of responsibility.
- Working knowledge of occupational hazards and applicable safety regulations, standards, and equipment.
- Ability to locate, analyze, and diagnose structural deficiency or equipment malfunctions.
- Ability to establish and maintain effective working relationship with subordinates, peers, and others.
- Skill in the application of supervisory techniques.

Tampa International Airport

Position Title: Senior Manager Maintenance, Buildings and Grounds

POSITION OVERVIEW

Reporting to the Director of Maintenance, this position is one of three senior manager positions responsible for ensuring that all airport facilities, systems and equipment are maintained in accordance with industry standards and to meet or exceed customer expectations for safety, aesthetics, convenience, reliability and value. The facilities involved include all terminal buildings and other Authority-owned buildings, roadways and grounds, airfield pavements and grounds, and parking structures. The senior manager of maintenance, Buildings and Grounds (this position) is primarily responsible for the management of the activities and personnel of the Airfield, Buildings, Fleet, Landscaping and Projects sections of the department. The systems and components maintained by these sections consist of airfield pavements and grounds, interior and exterior landscaping, plumbing and restroom systems, building interior and exterior finishes, all airport vehicles and equipment, and small project construction. The senior manager position also ensures that the Maintenance staff participates on capital project development teams to provide input on issues relative to life cycle costs, maintainability, reliability, and customer service. This requires on-going involvement with Authority staff, design professionals, and constructors to help ensure projects meet customer expectations. In addition, the position develops and implements personnel development programs and staffing plans, formulates goals and objectives, oversees and directs the development of project management plans, participates in procurement of specialty maintenance services including preparation of board agenda items, and formulates and monitors all aspects of the Maintenance department budget.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for developing and monitoring the department budgets for operations and maintenance, equipment, and capital projects.
- Responsible for implementing and monitoring goals and objectives.
- Responsible for properly procuring specialty maintenance services and systems, including specification development.
- Responsible for developing and implementing programs and processes to provide adequate inspection and monitoring of facility conditions to protect the Authority's interests.
- Responsible for developing, implementing and monitoring project management plans including specification development when required. May also perform Project Director Duties for capital improvement projects as required.
- Responsible for personnel development.
- Responsible for the management of in-house trades sections which includes but is not limited to; Responsibility for the preventive and corrective maintenance activities of trades personnel; responsibility for managing utility expenses and developing energy management programs; responsibility for instituting appropriate inspection, monitoring and other controls to ensure compliance of maintenance programs and maintenance projects

MINIMUM QUALIFICATIONS

A Bachelor's degree is desired, along with 5 years of progressive experience managing a maintenance operation of comparable complexity and budget responsibility. Significant high-level management experience at an airport, large commercial or institutional facility is preferred. Knowledge and experience in all aspects of maintenance including budget management is essential. Experience with a large maintenance operation that includes utilization of in-house and outsourced resources is necessary.

Department:	Maintenance
Pos. No:	15638
Pay Grade:	E5 ($89,000 – $185,000) – **Exempt**
Last update:	8/2018 Compensation

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of Web, Internet or Intranet sites, database design and programming languages.
- Considerable knowledge of graphic, illustration, animation and 3D software program tools.
- Considerable knowledge of computer equipment and operations and the interrelationship of equipment with programming approaches.
- Working knowledge of general office policies, practices and procedures.
- Ability to design and develop complex Web, Internet or Intranet pages.
- Ability to collect, organize and analyze data and to develop logical conclusions.
- Ability to multi-task and prioritize tasks effectively.
- Ability to communicate effectively, both orally and in writing.
- Ability to work effectively with others.

The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Maintenance, this position is one of two responsible for ensuring that all airport facilities, systems and equipment are maintained in accordance with industry standards and to meet or exceed customer expectations for safety, aesthetics, convenience, reliability and value. The facilities involved are all terminal buildings and other Authority-owned buildings, roadways and grounds, airfield pavements and grounds, and parking structures. The systems and equipment-related components consist of mechanical/electrical/plumbing systems, people mover and conveyance systems, baggage handling systems, passenger boarding bridges, security/access control, fire detection and protection, and all Authority-owned vehicles including heavy equipment. The Managers of Maintenance have oversight for the activities of in-house trades personnel and outsourced maintenance contracts. The Managers of Maintenance also ensure that the Maintenance staff participates on capital project development teams to provide input on issues relative to life cycle costs, maintainability, reliability, and customer service. This requires on-going involvement with Authority staff, design professionals, and constructors to help ensure projects meet customer expectations. In addition, the position develops and implements staffing plans, formulates goals and objectives, oversees and directs the development of project management plans, participates in procurement of specialty maintenance services including preparation of board agenda items, and formulates and monitors all aspects of the Maintenance department budget.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for developing and monitoring the department budgets for operations and maintenance, equipment, and capital projects.
- Responsible for implementing and monitoring goals and objectives.
- Responsible for properly procuring specialty maintenance services and systems, including specification development.
- Responsible for developing and implementing programs and processes to provide adequate inspection and monitoring of facility conditions to protect the Authority's interests.
- Responsible for developing, implementing and monitoring project management plans including specification development when required. May also perform Project Director Duties for capital improvement projects as required.
- Responsible for personnel development.

- Primary responsibility for one of the two major divisions of the department;
    - Management of contracted services which includes but is not limited to; responsibility for the overall management of all outsourced maintenance contracts; responsibility for providing proper administration over the Authority's tenant work permit program and key control functions; responsibility for instituting appropriate inspection; monitoring and other controls to ensure contract compliance of outsourced service contractors
    - Management of in-house trades personnel which includes but is not limited to; Responsibility for the preventive and corrective maintenance activities of all trades personnel; responsibility for managing utility expenses and developing energy management programs; responsibility for instituting appropriate inspection, monitoring and other controls to ensure compliance of maintenance programs and maintenance projects

MINIMUM QUALIFICATIONS

A Bachelor's degree is required, preferably in engineering, with 5 years of progressive experience managing a maintenance operation of similar complexity and budget responsibility. Significant high-level management experience at an airport of comparable size may be substituted for some of the educational requirements. Knowledge and experience in all aspects of maintenance including budget management is essential. Experience with a large maintenance operation that includes utilization of in-house and outsourced resources is necessary. Familiarity with all aspects of airport operations is desired.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

Tampa International Airport

Position Title: *Systems Automation Manager*

POSITION OVERVIEW

The ideal candidate for this position has extensive experience in the operation, maintenance, repair, and inspection of airport Baggage Handling Systems (BHS) and all associated control systems. This position will manage the performance and technology of the BHS and ensure the BHS at Tampa functions as certified by TSA and as intended by the designers. Manage the activities of the Airport Systems Automation Technicians (ASAT) and associated vendor contracts. Develop budgets to support the BHS machine level controls and associated vendor support contracts. Administrative duties include conducting quality assurance inspections of completed work; coordinating and overseeing contractor performance; and project coordination. Individual should possess ability to use computer software for a variety of tasks, excellent verbal and written communication skills, and strong ability to make decisions and prioritize work for varying work locations.

POSITION ACCOUNTABILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

This position will report directly to a Senior Manager and will manage a team of Airport Systems Automation Technicians.

- Manage the performance and technology of the BHS and other Airport equipment as needed
- Manage associated vendor support contracts
- Support, manage and develop highly technical personnel
- Review BHS performance
    - Provide performance reports to airline personnel
    - Conduct investigations
    - Develop corrective action plans
    - Coordinate special efforts with Airline personnel
- Manage contractor projects related to BHS improvements/upgrades
- Coordinate with TSA and other agencies on performance and operational issues
- Conduct inspections of all HCAA facilities in order to verify job performance of contractors
- Coordinates contractor work schedules on various shifts
- Provides escorts to contractors as needed
- Performs other related duties as required
- Weekends, holidays, and shift work may be required

MINIMUM QUALIFICATIONS

A Bachelor's degree with 4 years' of progressive experience in maintenance of a large commercial facility with technical experience in high level controls and computer programing on automated conveyance equipment or two years' contracts management experience of a large commercial facility and 5 years' of progressive experience in maintenance of a large commercial facility with technical experience in high level controls and computer programing on automated conveyance

equipment or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPETENCIES

- Considerable knowledge of the rules, regulations and operational requirements of the organization.
- Working knowledge of airport TSA security regulations.
- Working knowledge of accepted methods, practices and procedures used in the repair and maintenance of BHS systems and equipment.
- Working knowledge of safety practices and principles related to the repair and maintenance of Airport Automated Systems and related systems and equipment.
- Working knowledge of record keeping requirements.
- Working knowledge of the organization's procurement system.
- Ability to communicate effectively both orally and in writing.
- Ability to accurately assess maintenance and repair needs and make adjustments to maintenance crews and/or schedules as required.
- Ability to collect, organize and evaluate data and develop logical conclusions.
- Ability to work effectively with others.
- Ability to function as an effective team member in the established chain of command.
- Ability to use a computer and related software.
- Ability to plan, organize and oversee the work of others.
- Working knowledge of contract management.
- Ability to supervise employees
- A strong command of high level controls and troubleshooting abilities on complex automated conveyance equipment.
- A strong command of programmable logic controllers and industrial electrical controls.
- A strong understanding of large scale automated baggage conveyance equipment.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: Airport Credentials Manager

POSITION OVERVIEW

Performs managerial duties for the Security Access Control office provides security access for the entire airport facility. Responsible for planning, coordinating work and supervising assigned administrative staff to include conducting performance reviews. All individuals coming to work at the Tampa International Airport must go through a criminal history records check and a security threat assessment prior to being granted access into a secured area at the airport. This position manages and provides guidance to assigned administrative support staff in the Security ID Badge Office, adjudicates all badge applicants' Criminal History Records Check (CHRC) issued from the Federal Bureau of Investigations (FBI) to ensure the applicant's CHRC does not contain any disqualifying information that would prevent the applicant from being able to work at the airport. The duties and requirements for this position are mandated by the Transportation Security Administration (TSA) and are national security requirements for all airports. Additional duties include auditing requirements for TSA Regulatory compliance.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position.

Depending on the particular agency/division/department to which they are assigned, individual employees may perform all or any of the duties described below.

- Manages the administration of airport-issued security credentials for Tampa International airport.
- Reviews and acts on administrative and operational issues related to the TSA's security mandates.
- Administers procedures for maintaining records for all vehicle access credentials.
- Create, compile, prepare, and disseminate various reports for airport tenants, airline managers, contractors, HCAA staff, and FAA and law enforcement agencies.
- Conduct and administer Security Identification Display Areas (SIDA) training classes mandated by the FAA.
- Supervision and management of all billing records and access media.
- Preparation of budget documents and monitoring status of allocated funds for the security access control office.
- Conduct audits of all tenants' security procedures and records pertaining to background checks, security training requirements, and status of credentials.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree college or university; and

One year of supervisory or lead worker/team leader experience directly related to the position duties.

Or

An Associate's Degree from an accredited college or university; and

Three years of experience directly related to the position duties; two of which must have been in a supervisory or lead worker/team leader capacity.

Or

Graduation from high school or possession of GED Certificate; and

Tampa International Airport

Position Title: *Airport Dispatcher Trainee*

POSITION OVERVIEW

As an Airport Dispatcher Trainee, incumbents will complete a 12-month training academy where they will train to become proficient in performing a number of responsibilities in support of Tampa International Airport Operations and Public Safety and Security activities within the airport and surrounding area 24 hours every day. Responsibilities include but are not limited to, monitoring airport operations or public safety audio and video communication systems, receiving and directing airport emergency and non-emergency calls requesting assistance, service, or information utilizing computer controlled systems and communications equipment to provide information and dispatch personnel to provide timely responses. After successful completion of the 12 month training and probationary period, incumbents are promoted to Senior Airport Dispatcher.

POSITION ACCOUNTABILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

General Airport Dispatching Duties:

- Monitors airport audio and video communication systems.
- Receives and directs emergency and non-emergency calls for service using digital and/or analog voice communications equipment and a computer dispatch system.
- Determines the location of incoming emergency and non-emergency calls initiated from land lines or cellular phones using a Global Positioning System (GPS).
- Conveys a variety of information related to airport activities to airport personnel, vendors, service contractors, and the general public as required.
- Initiates emergency and non-emergency call-backs to obtain or provide additional information or to follow-up on disconnected calls.
- Responds to lost and found inquiries, provides entries into lost and found database, and releases lost and found items to owner.
- Maintains records and reports, including shift reports and operations logs. Performs duties at temporary emergency command centers and locations during periods of local, state and national emergencies, as required.
- Testifies in court to provide an accurate account of information related to emergency/non-emergency calls for assistance, as required.
- Completes designated airport operations or public safety dispatching training programs as required by the Aviation Authority.
- Performs other related duties as required.

Airport Operations Dispatching Duties:

- Operates various computer systems and programs including aviation specific systems, airport facility systems and equipment, security alarm systems, and closed circuit television (CCTV) systems.
- Activates the Aviation Authority emergency communication notification system to notify tenants and authorities of emergencies, impending severe weather, and other critical airport operations impacts.
- Responds to requests for flight information, pages, general information, and inquiries from the general public and airport tenants regarding operations related issues.

Department:	Operations
Pos. No:	Various
Pay Grade:	NE2 ($15.82-$29.66) – **Non Exempt**

Airport Public Safety Dispatching Duties:

- Receives incoming 911 emergency and non-emergency calls for assistance, makes inquiries to solicit additional relevant information when needed, and assesses information to determine the nature and urgency of calls for assistance.
- Enters public safety related information into the Computer Aided Dispatch (CAD) system and/or redirects calls to specific or alternate emergency responding agencies or departments.
- Dispatches emergency response personnel using digital and/or analog voice communications equipment, and/or an emergency computer dispatch system.
- Accesses and enters sensitive law enforcement data in local, state, and federal data bases for investigative purposes including use of the Florida Crime Information Center (FCIC) and the National Crime Information Center (NCIC) databases.
- Researches local, state and federal databases when requested or when circumstances dictate to review criminal justice records, search for outstanding warrants, and locate other relevant data, and provide information to emergency response personnel prior to arrival at the emergency location.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and one year of experience dispatching calls for assistance or performing customer service duties or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPETENCIES

Note: To be acquired during the training period.

- Working knowledge of CJNET, FCIC and NCIC law enforcement databases.
- Working knowledge of the Airport Communication Center regulations and standard operating procedures, and airport operations and public safety dispatching systems related to area of assignment.
- Working knowledge of CPR and First Aid procedures and techniques. Working knowledge of the Airport layout, facilities, and operations systems. Working knowledge of Aviation Authority policies, procedures and guidelines.
- Some knowledge of effective communication techniques.
- Some knowledge of digital and audio communications equipment operation.
- Some knowledge of computerized mapping systems and related software use and application.
- Some knowledge of airport operations, law enforcement, emergency medical, and fire terminology based on area of assignment.
- Skill in the operation of a multi-line or computerized telephone, and in the operation of digital, audio, or radio communications equipment.
- Ability to multitask under potentially stressful conditions.
- Ability to demonstrate a high degree of customer service skills while interacting with both external and internal customers.
- Ability to accurately assess emergency and non-emergency information, make correct decisions, and take appropriate action.
- Ability to use a computer and related software.
- Ability to communicate effectively, both orally and in writing.
- Ability to follow established procedures and pay close attention to detail.
- Ability to locate offices, agencies or individuals promptly through directories or other information sources.
- Ability to maintain confidential information.
- Ability to work effectively with others.
- Ability to accurately sort, file and retrieve materials using alphabetical, numerical or chronological information systems.
- Ability and willingness to work rotating shifts including nights, weekends and holidays.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Lead Dispatcher, Airport Operations Center

POSITION OVERVIEW

Reporting to an AOC Manager within the Airport Operations Center, the Lead Dispatcher is under the umbrella of the Airport Operations Department at Tampa International Airport. This position is responsible for leading a shift consisting of at least six to eight airport dispatchers on a day-to-day basis. Strong teamwork and critical incident response skills are a must in this role. In addition, this role is also responsible for attending duty briefings, monitoring scheduling, allocating dispatchers, scheduling or administering break relief, and coordinating with outside departments to achieve operational and organizational objectives, among other operational or administrative tasks, as assigned.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Leads a shift within the AOC and coordinates with management to administer assigned programs and resources.
- Leads the emergency evacuation and transfer of responsibilities for the Airport Operations Center in the absence of the AOC Manager.
- Responsible for responding to critical incidents by acting as the liaison between Tampa International Airport and all responding mutual aid resources. Involvement includes activating the Incident Command Center and fulfilling the role of the ESF2 (NIMS) function until relieved by a Manager or Senior Manager.
- Analyzes staffing needs (current and future) to identify shortfalls and plans daily dispatcher position assignments.
- Monitors the AOC Duty Phone, as needed, and communicates operational impacts or emergency responses to AOC and Operations Leadership.
- Responds to AOC and Airport Operations operational concerns.
- Responds to requests or issues from airport tenants and the public.
- Creates break relief schedules for shift and provides relief as needed.
- Assists with administrative duties.
- Updates daily shift activity logs and other reports and communications as requested and/or required.
- Relays requests to management for new equipment, software or personnel budget items.
- Working knowledge of CJNET, FCIC and NCIC law enforcement databases and their associated protocols.
- Working knowledge of the Airport Communication Center regulations and standard operating procedures, and airport operations and public safety dispatching systems.
- Working knowledge of the Airport layout, facilities, operations systems, and airport public safety operations.
- Working knowledge of Aviation Authority policies, procedures and guidelines.
- Working knowledge of law enforcement, emergency medical, and fire terminology.
- Ability to multitask under potentially stressful conditions.
- Ability to demonstrate a high degree of customer service skills while interacting with both external and internal customers.
- Ability to accurately assess emergency and non-emergency information, make correct decisions, and take appropriate action.
- Ability to follow established procedures and pay close attention to detail.
- Ability to maintain confidential information.
- Ability to accurately sort, file, and retrieve material using alphabetical, numerical or chronological systems.
- Ability and willingness to work rotating shifts including nights, weekends and holidays.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Department:	Operations
Pos. No:	00000
Pay Grade:	E3 ($65,500 – $136,200) – **Exempt**
Last update:	1/24/2018 Compensation

Tampa International Airport

Position Title: *Airfield Operations Training and Innovation Manager*

POSITION OVERVIEW

Reporting to the Senior Manager, Airfield Operations, this position will perform airfield operations training, including safety management, operational, supervisory and administrative duties. This position will also take the lead on identifying, developing and implementing new or enhanced processes, procedures and systems/technologies to improve the efficiency of Airfield operations. This position is responsible for all airfield training standardization. Furthermore, this position requires the individual to successful liaise with other teams and/or departments to analyze and resolve business challenges or problems by which Airport Operations can, as a department, assist in such issues or challenges, especially those that require training related assistance. A successful candidate will be responsible for developing and implementing all Airfield training standardization and implement changes and/or operational enhancements through a robust and effective communications and project management approach. In addition to these roles, secondary but required duties include supervising airport facilities, safety programs, security functions, and other operations designed to ensure effective passenger and public services. All duties are performed under the general supervision of an immediate supervisor who evaluates performance through observation of work, periodic conferences, critiques, and/or records and reports. This position will require full and demonstrated AOM qualification.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for providing guidance and direction for the planning, implementation and implementation of all Airfield Operations training.
- Manages airport Movement and Non-Movement Area safety and training program. Drive incident, near miss and hazard investigation process, train personnel to conduct incident investigations. Track corrective actions.
- Conducts airfield and apron safety inspections to ensure stakeholders are maintaining a safe work environment and that all employees are working in a safe manner (safe place / safe people).
- Ensures that airfield and apron are in compliance with all applicable safety regulations.
- Brings value by mitigating potential costs from accidents or incidents.
- Lead projects and programs from conception to review.
- Complies with SMS requirements by documenting and facilitating safety programs. Empowers employees as safety professionals by developing a positive safety culture.
- Monitors airport tenants and leased areas for possible violations of the Airport Rules/Regulations and other applicable regulations. Notifies appropriate parties in the Aviation Department of investigations and corrections.
- Manages Airfield Training Programs, to include computer based training for airport personnel and tenants. Development and implementing airfield training will be required.
- Reviews applicable technology and literature, surveys agency/department personnel, and confers with Senior Manager and other stakeholders to determine airfield operations and skills-based training needs.
- Designs and delivers operations job qualification programs to increase effectiveness of the team and individuals.
- Designs and implements qualification development and skills-based training programs to maximize participant acquisition and retention of knowledge, skills, abilities, and perspectives.
- Identify, develop and implement new systems, processes and technologies to improve efficiency and reduce costs to the Authority.
- Assesses training and development program effectiveness and revises programs accordingly.
- Designs training programs, curriculum, and related materials.
- Evaluates training and development program content and recommends modifications.
- Perform regular operations department practices, procedures and operating plans to identify and remedy issues and/or inconsistencies.

- Perform resource allocation, presentations and engage all primary and secondary stakeholder's reference safety and training plan initiatives.
- Demonstrates effective written & verbal communication and positive public relations with ability to effectively handle potentially confrontational situations.
- Supervise, train, and evaluate subordinates.
- Resolves operational problems involving airline passengers, public safety and security.
- Must be extremely safety conscious. Must be able to lift and/or move up to 50-75 pounds. Must be willing to work in inclement weather conditions; and ability and able to work odd hours/shifts, holidays, weekends, and be recalled during emergencies.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

- A Bachelor's degree.
- Possession of a valid Driver's License.
- Certified Member (CM) credentialing, or ability to obtain within six months of hire.
- Three years of work experience at a medium or large hub airport.

JOB SPECIFIC COMPENTENCIES

- Proven leadership, team-building and consensus-building skills required
- Understand and implement appropriate Federal Aviation Administration regulations and advisor circulars.
- Considerable knowledge of policies and procedures of the Operations Department.
- Knowledge of airport operations, maintenance and other airport related activities
- Knowledge of weather and NOTAM terminology used in Airport Operations.
- Thorough knowledge of federal, state and local rules and regulations pertaining to airport operations and security
- Ability to lead teams and gain commitment
- Must possess strong leadership skills and abilities
- Ability to develop, analyze and evaluate programs, policies and procedures
- Ability to work independently and organize and set priorities
- Ability to plan, assign, train, review and supervise work projects of subordinate personnel
- Ability to prepare reports, maintain records, analyze data, make procedure decisions and administer programs.
- Considerable knowledge of Federal, State and Aviation Authority rules and regulations governing use and operation of airports.
- Ability to perform independently and make critical decisions under stressful/demanding situations.
- Ability to analyze situations quickly and objectively and determine a proper course of action to be taken in emergency/urgent situations.
- Ability to use firearms in accordance with the airports Wildlife Hazard Management Plan.
- Organize and direct the work of multiple staff in a complex operating environment.
- Exercise tact, self-restraint, judgment, and strategy in dealing with a variety of people, including appointed and elected public officials and manage and motivate employees from diverse professional backgrounds, educational levels, specialization and affiliation.
- Speak before large and small groups within the Authority and in the community, to instruct subordinates in the performance of their duties, and to use a two-way radio effectively.
- Manage multi-agency, multifunctional teams, create/develop/manage complex projects.
- Make effective decisions regarding Airside Operations during intense or emergency related situations.
- Write grammatically correct reports, memoranda, directives, and letters to inform tenants, staff and others of airside policies and procedures.
- Understand and implement appropriate Federal Aviation Administration regulations and advisor circulars as they apply to FAR Part 139.
- Organize time, personnel and equipment to achieve objectives.
- Ability to plan and coordinate multiple activities occurring simultaneously.
- Ability to use a computer and related software.

Tampa International Airport

Position Title: Ground Transportation Specialist

POSITION OVERVIEW

Performs day-to-day operational management duties for a small functional unit which provides routine programs and services in any of a large variety of departments and agencies, with responsibility for planning, coordinating, supervising and controlling assigned resources to achieve unit/section objectives. Position is an entry level manager and managers in this class typically manage clerical, maintenance and technical employees.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages the day-to-day operations of the unit/section, coordinates and administers assigned programs and resources.
- Sets direction and priorities and allocates staff and resources to projects and unit initiatives.
- Provides supervision, guidance, training and motivation to assigned staff; assigns, monitors and reviews work; evaluates performance and initiates corrective action as needed, including termination.
- Performs a variety of administrative duties in support of the unit's activities.
- Implements goals, policies, procedures and guidelines to ensure operational efficiency and effective administration of unit.
- Monitors work flow, data accuracy, and overall quality of work; assures processes and procedures are accomplished according to established guidelines.
- Assesses staffing needs and identifies shortfalls; interviews, recruits and hires new staff.
- Participates in budget development by providing detailed justification and persuasive arguments for proposals or unit initiatives, but has no direct budget approval responsibility.
- Coordinates with other branches/sections within own organization and external agencies/departments to ensure efficient flow of communications and services.
- Provides consultation to customers on matters relating to functional area.
- Prepares a variety of documents for the purpose of documenting activities and administering assigned programs and resources.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university; and
Two years of experience directly related to the position duties.

Or

Any equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the functions, services, procedures and regulations of the assigned unit.
- Skill in the application of supervisory techniques.
- Ability to support, promote, and ensure alignment with the departments/agency's goals and vision.
- Ability to effectively recruit, select, develop and retain competent staff.
- Ability to establish and maintain effective working relationships with others within and outside own organization.
- Ability to use initiative and exercise sound judgment.
- Ability to communicate effectively, orally and in writing.
- Ability to effectively manage and guide group efforts.
- Ability to create solutions to problems using new methods and processes.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

CORE Values

- ***Safety*** - Extending beyond our proactive approach to maintaining a secure facility for guests, our commitment to safety acknowledges the sense of security and peace of mind that comes from providing a warm and comfortable environment.
- ***Service*** - We are committed to the highest levels of guest quality and service. Tampa International Airport team members take great pride in delivering top-notch experiences that are helpful, welcoming and friendly. Our minimum standard is excellence in all we do.
- ***Community*** - As the gateway to the west coast of Florida, we serve communities and businesses throughout the region. Through our initiatives, we bring regional interests and organizations together to build a stronger Tampa Bay

region. As a good neighbor and community partner, we are committed to providing opportunities and making responsible choices that benefit our region.

- ***Growth*** - We are committed to building a sound financial position that cements our ability to be best in class for years to come. Our economic strength comes from a sensible and dynamic approach to growth. We will ensure that as the Tampa Bay region grows the airport is scaled to meet rapidly changing needs.
- ***Innovation*** - We are imaginative and forward-thinking. Dedicated to evolving both form and function through technological advancement, improved processes, and operational efficiency, while remaining true to our guests' desire for simplicity, organization, and convenience.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: Senior Airport Dispatcher

POSITION OVERVIEW

The Senior Airport Dispatcher position is part of a 911-dispatcher team which supports Tampa International Airport operations and public safety and security activity within the airport and surrounding area 24 hours every day. This 38-person team is under the umbrella of Airport Police Department. In this position, the Senior Dispatchers will monitor and operate systems that include communication of video security and patron transportation, such as the Airport's monorail and shuttle systems, while taking customer service phone calls from patrons and fellow employees looking for assistance. A Senior Dispatcher will also be responsible for processing lost and found items and cataloging them for inventory. Additionally, the Senior Dispatcher will maintain certification as a Public Safety Tele communicator as defined by the Florida Department of Health. The Senior Dispatcher will prepare the dispatcher to answer emergency phone calls, process sensitive law enforcement information, and dispatch first responders by radio.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Monitors airport audio and video operations and public safety communication systems.
- Receives incoming 911 emergency and non-emergency calls for assistance, makes inquiries to solicit relevant information, and assesses information to determine the nature and urgency of calls for assistance.
- Enters public safety related information into the Computer Aided Dispatch (CAD) system and/or redirects calls to specific or alternate emergency responding agencies or departments.
- Dispatches emergency response personnel using digital and/or analog voice communications equipment, and/or an emergency computer dispatch system.
- Accesses and enters sensitive law enforcement data in local, state, and federal data bases for investigative purposes including use of the Florida Crime Information Center (FCIC) and the National Crime Information Center (NCIC) databases.
- Determines the location of emergency and non-emergency calls initiated from land lines or cellular phones using a Global Positioning System (GPS).
- Researches local, state and federal databases when requested or when circumstances dictate to review criminal justice records, search for outstanding warrants, and locate other relevant data, and provides information to emergency response personnel prior to arrival at the emergency location.
- Operates various computer systems and programs including aviation specific systems, airport facility systems and equipment, security alarm systems, and closed circuit television (CCTV) systems.
- Activates the Aviation Authority emergency communications notification system to notify tenants and authorities of emergencies, impending severe weather, and other critical airport operational impacts.
- Responds to requests for flight information, pages, general information, and inquiries from the general public and tenants regarding airport operations and public safety issues.
- Conveys a variety of information related to airport operations and public safety activities to airport personnel, vendors, service contractors, and the general public as required.
- Responds to lost and found inquiries, enters information to maintain the lost and found database, and releases lost and found items to owner.
- Maintains records and reports, including shift reports and operations logs.
- Initiates emergency and non-emergency call-backs to obtain additional information or to follow-up on disconnected calls.
- Performs duties at temporary emergency command centers and locations during periods of local, state and national emergencies, as required.
- Testifies in court to provide an accurate account of information related to emergency/non-emergency calls for assistance, as required.

- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED certificate; and
Successful completion of all designated airport operations and law enforcement dispatcher training programs including possession of all required certifications.

JOB SPECIFIC COMPENTENCIES

- Working knowledge of CJNET, FCIC and NCIC law enforcement databases.
- Working knowledge of the Airport Communication Center regulations and standard operating procedures, and airport operations and public safety dispatching systems.
- Working knowledge of the Airport layout, facilities, operations systems, and airport public safety operations.
- Working knowledge of Aviation Authority policies, procedures and guidelines.
- Working knowledge of effective communication techniques.
- Working knowledge of digital and audio communications equipment operation.
- Working knowledge of computerized mapping systems and related software use and application.
- Working knowledge of CPR and First Aid procedures and techniques.
- Working knowledge of law enforcement, emergency medical, and fire terminology.
- Skill in the operation of a multi-line or computerized telephone, and in the operation of digital, audio or radio communications equipment.
- Ability to multitask under potentially stressful conditions.
- Ability to demonstrate a high degree of customer service skills while interacting with both external and internal customers.
- Ability to accurately assess emergency and non-emergency information, make correct decisions, and take appropriate action.
- Ability to use a computer and related software.
- Ability to communicate effectively, both orally and in writing.
- Ability to follow established procedures and pay close attention to detail.
- Ability to locate offices, agencies or individuals promptly through directories or other information sources.
- Ability to maintain confidential information.
- Ability to work effectively with others.
- Ability to accurately sort, file, and retrieve material using alphabetical, numerical or chronological systems.
- Ability and willingness to work rotating shifts including nights, weekends and holidays.

Tampa International Airport

Position Title: Senior Manager, Terminal Operations and Security Administration

POSITION OVERVIEW

Reporting to the Director of Operations, the Manager of Terminal Operations is responsible for the development and administrations of the rules, regulations, and operating directives relating to terminal operations activities. This position is also responsible for managing the Security Administration functions to include operation of the Security Access Control, Close Circuit Camera and Television System, the Security ID Badge Media Office and System, and the Interactive ID Badging Training Systems. This position will proactively coordinate and interact with airport tenants, outside government agencies, Authority leadership and departmental staff on matters influencing the operations within the terminal buildings of the airport to include terminal construction impacts, maintenance department work efforts, and operation administration of the airport's flight information system. Incumbent will also be responsible for managing the TSA approved Airport Security Program.

Reporting directly to the Manager of Terminal Operations are the following positions:

- Security Operations and Compliance Manager
- Airport Credentials Manager

POSITION ACCOUNTABILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages and administers the rules, regulations, and operating directives relating to terminal operations activities; coordinates with airport stakeholders on matters influencing operations within terminal buildings.
- Manages the airport's Terminal Standards and Sign Program.
- Manages the airport's security and ID badging office including issuance of airport security badges, Criminal History Records Checks (CHRC) and Security Threat Assessments (STA) as well as the Airport's Access Control System consisting of doors, gates and alarm points.
- Creates and modifies security policies and procedures according to TSA Regulations; Liaison between TSA and Aviation Authority regarding all security directives and regulations and maintains TSA approved Airport Security Program
- Coordinates Access Control and CCTV system applications with Airport Operations Center, Maintenance and IT
- Responsible for the Authority's remote baggage check-in program.
- Handles CCTV review and archived video footage requests for Airport's CCTV system.
- Receives, investigates, and provides resolution to customer service issues with airport tenants and customers.
- Responsible for Terminal Operations Construction Coordination.
- Special Projects as required.

Leadership Qualities:

- Strong leadership, team-building and consensus-building skills required.
- Strong customer service skills is a must.
- Results driven, accountable and decisive with an ability to execute plans that are operationally sound.
- Visible, enthusiastic, and a high energy level.
- Strong interpersonal, oral and written communication skills.
- Strong analytical and problem resolution skills required.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree in Airport Operations/Management, Business Administration, or closely related field from an accredited college or university. The incumbent should possess exceptional leadership, communication and presentation skills. Successful candidate should possess an understanding of airport security operations and airport facility management, federal, state and local rules and regulations affecting such operations, and business principles and practices as they relate to management of airport operations, and facilities. The incumbent should have a minimum of five years of progressively responsible experience at a medium or large HUB airport in terminal and security operations or large public facility requiring multiple levels of security, as well as administration of service or management contracts. Must possess a current Driver's License.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Operations, this position is responsible for managing daily operations of the airfield and ramp operations on a 24/7 basis; and administers the allocation of resources, establishing policies and procedures, initiating programs, and managing personnel to ensure the continuity of operations; coordinates, monitors, and/or implements operational activities with key management representatives from the airlines, FAA, TSA, tenants, construction and other individuals within and outside the Authority.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Supervision of the duty operations staff and their respective project activities and responsibilities.
- Coordination and interaction with airport tenants, airline managers, Authority staff, construction contractors and FAA management on any matters that may impact the operation of the airport.
- Attends construction progress meetings, provides reports, and coordinates Operations oversight and monitoring efforts.
- Primary Operations representative for issues in a customer service capacity to the airlines and FAA to include problem resolution.
- Represents Operations in and through the project development process.
- Develops and administers policies and procedures to maintain a current Federal Aviation Administration operating certificate.
- Reviews engineering and construction plans.
- Implements and manages programs and specific management assignments by researching, evaluating alternatives and selecting courses of action.

- **Reporting directly to the Manager of Airfield Operations are the following positions:**
- Airport Operations Managers responsible for 24-hour comprehensive airport management presence and day-to-day operational activities; and specialized operational related projects.
- Airport Operations Specialists who support and assist the Airport Operations Managers.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a four-year degree from an accredited college or university in Airport or Aviation Management, Public or Business Administration, or related degree; and four years of supervisory and managerial experience in airport operations at a large or medium hub airport. This should include a thorough knowledge of federal and state regulations governing the use and operation of airports.

JOB SPECIFIC COMPENTENCIES

- Extensive knowledge of the field of airport operations to include 139 Certification and emergency procedures
- Specific knowledge of Tampa International Airport operations with respect to rules and regulations and operating directives
- Extensive knowledge of the principles and practices of management

- Extensive knowledge of the computer-based gate management system and flight information systems
- Skill in application of management and supervisory techniques
- Ability to establish and maintain effective working relations with others within and outside the Authority
- Effective oral and written communication skills
- Ability to use considerable initiative, think independently, and exercise sound judgment

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

POSITION OVERVIEW

Under the leadership of the Director of Operations, the Manager of Parking and Ground Transportation is responsible for the development and execution of the Aviation Authority's policies and strategic business objectives in support of the Parking and Ground Transportation system; proactively manages the day-to-day operations of all parking facilities; interfaces with Parking and Ground Transportation providers and businesses; ensures that customer service standards are met or exceeded; proactively identifies and recommends to the Director opportunities to make the Parking and Ground Transportation operation financially sustainable; conducts market research in support of the business objectives; actively monitors the competitive landscape and proactively identifies and recommends best practices of other Parking and Ground Transportation operations. Performs additional duties as deemed necessary by the Director of Operations and is entrusted with confidential information.

This position will oversee the planning and development of the Authority's Parking and Ground Transportation System as well as managing parking management contract and operations, various ground transportation contracts and ground transportation permitting processes. Responsibilities include planning and implementation of Authority short and long term revenue goals; working with other Authority Departments related to planning, business development, marketing programs, capital improvement programs and construction; directing day-to-day activities of existing facilities and services. This position is expected to use independent judgment and initiative to accomplish performance objectives while demonstrating the ability to effectively balance multiple high priority tasks simultaneously.

Leadership Qualities:

- Strong leadership, team-building and consensus-building skills required.
- Results driven, accountable and decisive with an ability to execute plans that are operationally sound.
- Visible, enthusiastic, and a high energy level.
- Strong interpersonal, oral and written communication skills.
- Strong analytical and problem resolution skills required.

Reporting directly to the Manager of Parking and Ground Transportation are the following positions:

- Parking Manager, who manages and coordinates the day-to-day administration of the Parking Management contract at Tampa International Airport to include auditing and reporting daily and monthly revenue and expenses.
- Ground Transportation Manager, who manages the day-to-day operation of ground transportation, to include considerable daily contact with ground transportation companies and ensures compliance with Authority policies and procedures.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages the parking management contract and operation to ensure a high level of public service, capacity to meet demand and strict revenue control.

- Participates in the creation of contract documents for the management of the public parking facilities, shuttle bus operation, limousine, charter buses, courtesy vehicles and taxicab service; and administers these contracts, permits and procedures. Establishes rules and operating procedures for ground transportation operators and operations.
- Develops, evaluates, and implements capital improvement goals, objectives, policies, programs, and procedures; prepares and analyzes statistical reports and develops and reviews goals and objectives with the Director; assures departmental activities are in compliance with all laws, policies, regulations, timelines and goals.
- Plans, directs and evaluates the work of subordinates.
- Determines proficiency and training needs of subordinates to maintain a high level of service to our customers.
- Responds to operational and emergency situations 24 hours a day, 7 days a week.
- Coordinates with other Authority departments in the creation of Project Management Plans (PMP) for projects that support the Authority's development program; participates in planning of future airport development programs, capital improvement programs, and airport master plan updates.
- Establishes cooperative relationships with the public and tenants; confers with other entities, business and commercial representatives and general public about development and operational matters; coordinates Parking and Ground Transportation related activities with other departments, and with outside agencies; responds to public inquiries and complaints relative to parking and ground transportation services.
- Proactively identifies opportunities to make the Parking and Ground Transportation operation financially sustainable by growing the business and generating a profit. Works with other Aviation Authority Departments in identifying potential business development opportunities.
- Actively monitors the competitive landscape, and proactively identifies and recommends best practices of other Parking and Ground Transportation operations. Researches and stays abreast of current industry issues in order to anticipate impacts from industry changes.
- Assists the Director of Operations with budget preparation and ensures department expenditures are kept within the budget parameters as approved by the Authority

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree in Airport Operations/Management, Business Administration, or closely related field from an accredited college or university. The incumbent should possess exceptional leadership, communication and presentation skills. Successful candidate should possess an understanding of airport parking facility development and ground transportation operations, federal, state and local rules and regulations affecting such operations, and business principles and practices as they relate to management of parking and ground transportation contracts and facilities. The incumbent should have a minimum of four years of progressively responsible experience at a medium or large HUB airport in operations or public parking and ground transportation, administration of service or management contracts. Must possess a current Driver's License.

POSITION OVERVIEW

Reporting to the Senior Manager of Construction, the Construction Project Manager is responsible for managerial and administrative work in planning, organizing, directing, and executing new Construction. The position identifies and tracks changes in budgets, tracks progress, and oversees implementation of the overall design. In addition, the incumbent will make recommendations regarding recovery schedules, value engineering of design elements, and evaluate the overall risk of the project and work with fellow team members in improving safety. The Construction Project Manager will interact with the Authority's consultants, engineers, parking & retail vendors, Operations, FAA, and other agencies in representing the Authority's interest. The Construction Project Manager will be required to maintaining confidentiality during contract negotiations and when working with procurement.

The Construction Project Manager will work under the direction of the Senior Manager of Construction with considerable latitude for independent judgment as to the technical aspects and implementation of the construction projects.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for developing and managing strategies for effectively communicating with key personnel both internal and external stakeholders.
- Tracking and monitoring both State and Federal programs and assuring adherence and compliance.
- Oversee the contractors pay application approval process and negotiate contractor's Schedule of Values.
- Provide leadership for the airport's construction program and provide guidance for the day to day operations, administration, and decision making.
- Develop and implement new policies and programs needed to track and monitor contract adherence.
- Represent the Agency during weekly/monthly meetings with the contractors and designers.
- Work with project inspectors as required ensuring contract compliance and continuity.
- Coordinate construction related activities with tenants. Craft written notifications as well as conduction face to face meetings.
- Coordinate and notify tenants and fellow departments as needed when services are being impacted or interrupted.

MINIMUM QUALIFICATIONS

A four-year degree from an accredited university in Construction Management, Engineering, Architecture or related field; and a minimum of 5 years of experience working in the field in construction management and/or supervision. The ideal candidate will have strong people skills, exceptional leadership, and solid oral and written communication skills.

OR

An Associate's Degree from an accredited college plus 7 years of experience in the field regarding construction management or supervision.

Other requirements: Proficient in the use of Windows and Microsoft Office software (Word, Excel, Projects, and Outlook).

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: Director of Construction

POSITION OVERVIEW

Reporting to the Assistant Vice President of Planning and Development the Director of Construction represents the Authority in the administrative and operational details of ongoing construction activities. The Director of Construction insures that all construction projects are proceeding in accordance with the requirements of the project plans and specifications and in accordance with the requirements of the Authority.

This position will provide oversight of the communication between Authority Staff, contractors, designers, inspectors and the Authority's Consulting Engineer on all construction projects ; provides oversight of the schedules of construction for all projects and assures that construction phasing, conflicts between contractors and contract compliance issues are addressed. This position will also provide oversight of the status of contract submittals processing and assures prompt action is taken to maintain appropriate response within contract requirements.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- With the assistance of the Project Managers, this position insures that regular construction progress meetings are conducted between contractors, designers and inspectors to review procedures, progress, scheduling and changes to the work.
- Monitor the contractor's implementation and maintenance of a Safety Program. Review all proposed changes to the Construction Contracts and assure proper application and interpretation of the Contract Documents.
- Analyzes contractor claims and prepares recommendations for Authority action.
- Provides oversight of the successful resolution and correction of Notices of Non-Compliance and oversees the preparation of the monthly Status of Construction Report by the project manager.
- Reviews the schedules submitted by the contractor to ensure compliance with the Master Schedule, and monitors each contractor's monthly submittals of schedules to ensure they remain within the parameters established by the Master Control Schedule. This includes reporting any major variance with recommended corrective action. Coordinates phasing of contactors' work to complete the Project(s) according to the Authority's objectives of cost, time and quality.
- Acts as the representative of the Authority at the site of all construction work.
- Oversees Project Managers' scheduling and conducting of Progress Meetings at which Contractors and Inspectors can jointly discuss matters such as procedures, progress, problems, field changes and scheduling. Establishes procedures for cooperation and coordination between inspectors and Contractors concerning all aspects of the Project and implements such procedures.
- Develops and implements a procedure for review of all contractors' schedules of values and reviews all contractors' billings and invoices and recommends payment of all invoices.
- Monitors the Architect/Engineer in determining that factory inspection and testing for items fabricated outside Project limits is performed and assures that all necessary field records that arise out of the Work are maintained and provides oversight of the Project closeout procedures.
- Oversees the preparation of formal Board Monthly Status Reports of all Construction.
- Oversees the preparation and negotiation of all Contract Change Orders.

Reporting to this position are:

- Manager of Construction
- Senior Construction Project Managers
- Construction Project Managers
- Senior Construction Project Management Inspectors

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position are a Bachelor's Degree in Engineering, Architecture or Building Construction from an accredited college or university, and at least ten years of experience in construction administration or construction management. The incumbent's experience should include work at a medium or large hub airport.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: *Project Director*

POSITION SUMMARY:

Under the general direction of the Director of Planning and Design, this position represents the Authority in the administrative and operational details of ongoing design activities and provides oversight of project related communication between Authority staff, design consultants, the Authority's Consulting Engineer, tenants and airport users on airport development projects.

This position will oversee the planning and design elements of capital improvement projects. It is the duty of this position to ensure that from an operational and functional aspect all design elements are fully coordinated with Authority stakeholders including meeting all FAA and TSA regulatory operational requirements. This position ensures that the design of all projects is proceeding in accordance with the goals and objectives of the Authority and that all schedule and budget requirements are met.

POSITION ACCOUNTABILITIES

- Develops project management plans for airport development projects including definition of the scope of work, project budgets and schedules.
- Manages capital improvement projects including coordination and oversight of A/E firms and coordination with key stakeholders including other Authority Departments and tenants. Monitors and controls project budgets, schedules and prepares project management plan updates as required to manage the project. Reviews and approves A/E design invoices. Prepares and reviews project status reports with department management.
- Reviews and approves design progress drawings and specifications at designated intervals (15, 30, 60, 90, 100% completion). Leads design coordination and review meetings. Ensures the Authority's design criteria is implemented in the project's design.
- Hold project team meetings with stakeholders during the design process, as well as keep stakeholders updated and informed as the project moves through the design phase of each project.
- Interprets design questions from contractor and HCAA construction personnel. Participates in construction progress meetings. Oversees any redesign activities, participates in final inspection and acceptance of the project.
- Coordinates with design consultants to obtain required permits and design approvals as required.
- Coordinates and establishes effective working relationships with other Authority departments, coordinates with governmental and code agencies, and assists in design administration duties.
- Performs review of tenant work permit plans and specifications.
- Performs other related duties as required

MINIMUM QUALIFICATIONS:

The minimum qualifications to perform successfully in this position are a Bachelor's Degree in Engineering or Architecture from an accredited college or university and seven years of progressively responsible experience in project design and management. A professional license in engineering or architecture is preferred. The ideal candidates should possess exceptional leadership, communication and presentation skills.

- With the assistance of the Construction Project Managers, this position insures that regular construction progress meetings are conducted between contractors, designers and inspectors to review procedures, progress, scheduling and changes to the work.
- With the assistance of the Construction Project Managers, this position insures that all construction activities are accurately documented and reported.
- Monitor the contractor's implementation and maintenance of a Safety Program. Review all proposed changes to the construction contracts and assure proper application and interpretation of the Contract Documents.
- Provides oversight of the successful resolution and correction of Notices of Non-Compliance and oversees the preparation of the monthly status of construction report by the construction project manager.
- Reviews the schedules submitted by the contractor to ensure compliance with the contract and monitors each contractor's monthly submittals of schedules to ensure they remain within the parameters established by the contract. This includes reporting any major variance with recommended corrective action. Coordinates phasing of contactors' work to complete the project(s) according to the Authority's objectives of cost, time and quality.
- Acts as the representative of the Authority at the site of all construction work.
- Oversees Construction Project Managers' scheduling and conducting of progress meetings at which contractors and inspectors can jointly discuss matters such as procedures, progress, problems, field changes and scheduling. Establishes procedures for cooperation and coordination between inspectors and contractors concerning all aspects of the project and implements such procedures.
- Monitors the Architect/Engineer in determining that factory inspection and testing for items fabricated outside project limits is performed and assures that all necessary field records that arise out of the Work are maintained and provides oversight of the Project closeout procedures.

- Oversees the preparation and negotiation of all contract change orders.

Reporting directly to the Manager of Construction are the following positions:

- Senior Construction Project Managers
- Construction Project Managers
- Senior Construction Project Management Inspectors

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree in Engineering, Architecture or Building Construction from an accredited college or university, and at least ten years of experience in construction administration or construction management, preferably at a medium or large hub airport or similar facility with 24-hour per day operations (e.g. hospital, university, large multistory hotel complex). Additional experience in lieu of the preferred Bachelor's Degree may be considered.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position is responsible for Directing and supervising the environmental compliance program for the Authority's airport system. This position supervises the activities of the Authority's environmental staff, environmental consultants and contractors as it relates to the day-to-day operation and maintenance of the airport facilities. Also directs and supervises the activities of the Authority's project design consultants and contractors whose work supports the Authority's capital improvement program.

This position reports to the Director of Planning and Development.

This position manages the environmental compliance program which has the goal of reducing current and future environmental liabilities, reducing compliance costs associated with regulatory permits and reporting requirements, and cost-effectively managing compliance responsibilities with a focus on pollution prevention.

This position represents the Authority before regulatory agencies and is responsible for environmental-related communications with environmental regulators, consultants and contractors. Directs investigations on enforcement actions and prepares regulatory responses. Serves as a liaison for the airport system's stakeholders to provide recommendations on design compatibility and interpretation of environmental regulations.

This position provides support to the Authority's real estate program. Manages a compliance program for existing tenant facilities, and an audit program for Authority real estate that is under consideration for acquisition, divestiture or future redevelopment.

This position administers the environmental department's operation and maintenance budget, monitors the status of funds and determines staffing requirements.

Reporting to the Manager of Environmental Services are the following positions:

Project Managers – These mid-level positions manage environmental projects and operation and maintenance assignments. This work includes project oversight, technical writing and communication with Authority stakeholders.

Environmental Technicians – These positions provide field support for environmental projects and operation and maintenance assignments. This work includes inspections, sample collection, aquatic plant management and equipment maintenance. It also includes field oversight and escort of regulators, consultants and contractors.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

1. Ensures that the Authority's real estate program is environmentally sound. Coordinates an inspection and pollution prevention program for existing tenant facilities. Manages a tracking and compliance monitoring program to ensure that tenant activities are in compliance with applicable environmental regulations.

2. Manages an audit program for Authority real estate that is under consideration for acquisition, divestiture or future redevelopment. Coordinates audits, follow-up investigations and site rehabilitation, as necessary.

3. Manages environmental compliance matters that are encountered on capital projects by providing technical support during the various project phases including design, technical specification development, permitting and construction. Participates in the procurement of professional consulting services and contractors.

4. Develops and maintains budgets and schedules. Administers the operation and maintenance budget for the environmental department. Manages the budgets, schedules and workloads of the Authority's environmental consultants. Supports the Authority's capital improvement program by providing budgets and schedules for environmental project components.

Manages the Authority's environmental consultants. Ensures that these consultants complement the environmental compliance program so that the program maintains full capability to meet the airport system's needs. Ensures that the Authority's environmental consultants directly or indirectly serve all stakeholders including Authority staff, tenants, government agencies and regulators.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor's degree in geology or engineering from an accredited college or university. A minimum of four years of progressively responsible experience managing an environmental engineering program at a medium or large hub airport. The qualifications also include the design and management of environmental projects and the supervision of subordinates. A professional license from the state of Florida in geology or engineering will be required.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Planning and Development, this position is responsible for directing and supervising Authority staff and professional consultants related to planning, engineering, architectural and environmental design development of all capital projects for the Authority's airport system which includes Tampa International, Tampa Executive, Peter O. Knight and Plant City Airports.

This position directs all planning and design of airport facilities and infrastructure pertaining to the development, improvement and expansion of the Authority's airport system. Coordinates the design with the Authority staff and tenants and supervises the preparation of contract documents for construction. This position administers planning and design contracts including the selection, contract negotiation and preparation of professional contracts.

Represents the Authority in the administrative and operational detail of ongoing planning and design activities. Incumbent will work to insure that the planning and design of all projects is proceeding in accordance with the goals and objectives of the Authority and that all schedule and budget requirements are met. This position will communicate any changes to the project scope, schedule or budget to the Development Committee in a timely manner.

Incumbent will provide oversight of communication between Authority staff, consultants, tenants and airport users on all projects. The position closely interacts with other members of the Authority, and professional consultants regarding the development, implementation and coordination of all capital projects.

Reporting to the Manager of Design are the following positions:

Project Directors – These positions are responsible for managing and overseeing the planning, architectural and engineering design of all capital projects associated with the improvement and expansion of the Authority's airport system. These positions supervise the Authority's project planning and design consultants.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Ensures that the development of the Authority's airport system, including the assessment of facility and infrastructure requirements, project definition, budget determination, capital project design conforms to the long term objectives of the Authority.
- Ensures that the Authority's needs and interests are met with respect to engineering, architectural and environmental designs, including drawings, specifications, cost estimates, and tenant development plans. Directs and supervises all design development activities to assure establishment and enforcement of guidelines, standards and design criteria. Develops and maintains project budgets and schedules. Prepares, administers and coordinates the annual budget for the design department.
- Develops, administers and coordinates the selection of and contract negotiations with professional design consultants. Directs, supervises and administers contracts for all design disciplines.

- Supervises and coordinates the design of airport facilities and infrastructure with Authority staff, professional design consultants, outside agencies, and tenants to ensure that the Authority and/or tenant needs are met. Directs and supervises Authority staff and project design consultants in the preparation of design drawings, specifications, cost estimates and schedules. Reviews and accepts Contract Documents, including plans and specifications, prepared by Authority staff and professional design consultants. Coordinates and establishes effective working relationships with other Authority departments, coordinates with governmental and code agencies, and assists in construction administration duties.
- Ensures that projects for the four airports and related studies are produced in a manner that meets Aviation Authority goals, level of service standards, performance measures and program needs.
- Ensures that on-airport developments are consistent, whenever possible, with applicable FAA advisory circulars and regulations.
- Ensures that the primary guides for future airport development, namely the Master Plans, Airport Layout Plans and Land Use Plans are consistent with the primary implementation document for future airport development.
- Ensures that necessary environmental studies, permits and mitigation program(s) are implemented in a timely manner to avoid delay in airport-wide capacity enhancement projects.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a bachelor's degree in engineering or architecture from an accredited college or university. A minimum of eight years of progressively responsible experience in the planning, design, construction, coordination and program management of engineering and architectural activities at a medium or large hub airport is preferred. Professional licenses from the state of Florida in engineering or architecture will be required.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Under the general direction of the Manager of Planning and Design and within the Planning and Development Department, this position represents the Authority in the administrative, operational and technical details of ongoing design activities and provides oversight of project related communication between Authority staff, design consultants, the Authority's Consulting Engineer, tenants and airport users on airport development projects.

This position oversees planning and design elements of capital improvement projects. The position is responsible for ensuring that, from an operational and functional aspect, all design elements are fully coordinated with Airport stakeholders, including meeting all Federal Aviation Administration (FAA) and Transportation Security Administration (TSA) regulatory operational requirements at a minimum. This position ensures that the design of all projects is proceeding in accordance with the goals, objectives, policies, procedures and processes of the Authority and that all schedule and budget requirements are met.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Develops project management plans for airport development projects including definition of the scope of work, project budgets and schedules.
- Manages capital improvement projects and other assignments including coordination and oversight of Architectural/Engineering (A/E) and Design-Build (DB) firms and coordination with key stakeholders including other Authority Departments and tenants.
- Monitors, controls and reports on project budgets, schedules and prepares project management plan updates as required to manage the project. Reviews and approves A/E and DB design invoices. Prepares and reviews project status reports with department management.
- Reviews and approves design progress deliverables including drawings and specifications at designated intervals (e.g., 15, 30, 60, 90, and 100%). Leads design coordination and review meetings. Ensures the Authority's design criteria is implemented in the project's design.
- Holds project team meetings with stakeholders during the design process, as well as keep stakeholders updated and informed as the project moves through the design phase of each project.
- Interprets design questions from contractor and Authority construction personnel. Participates in construction progress meetings. Oversees any redesign activities, participates in final inspection and acceptance of the project.
- Coordinates with design consultants to obtain required permits and design approvals as required.
- Coordinates and establishes effective working relationships with other Authority departments, coordinates with governmental and code agencies, and assists in design administration duties.
- Performs review of tenant work permit plans and specifications.
- Supervises and manages direct reporting staff, completes performance appraisals, coaches and counsels as necessary.

MINIMUM QUALIFICATIONS

The minimum qualifications to perform successfully in this position is a Bachelor's Degree in Engineering from an accredited college or university and a minimum of ten years of progressively responsible experience in project design and management. The ideal candidates should possess exceptional leadership, communication and presentation skills.

JOB SPECIFIC COMPENTENCIES

- Extensive knowledge of engineering theories, principles and practices.
- Extensive knowledge of project management methods and practices.
- Extensive knowledge of federal, state and local codes, laws, regulations and ordinances pertaining to public infrastructures, building and zoning codes, safety codes, environmental permitting and real estate.
- Extensive knowledge of the development of plans and specifications.
- Considerable knowledge of civil and architectural, structural, electrical and mechanical engineering disciplines as related to facilities projects.
- Considerable knowledge of applicable State and County policies, rules, standards and practices as applicable to procurement and contracts.
- Considerable knowledge of department policies and procedures.
- Considerable knowledge of project programming, scheduling and estimating.
- Considerable knowledge of Consultant's Competitive Negotiation Act (CCNA), consultant rates, fees and cost structures.
- Considerable knowledge of budgeting and fiscal policies.
- Considerable knowledge of computer applications for engineering and architectural modeling, design, and drafting.
- Skill in visualizing spatial relationships and physical requirements.
- Skill in contract negotiation.
- Skill in engineering design.
- Ability to recognize and resolve potential engineering, architectural and construction problems and site development issues.
- Ability to plan, organize, and supervise the work of others.
- Ability to communicate effectively both orally and in writing.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

This position is responsible for directing and overseeing the management of Authority activities that relate to the planning, programming, design and construction of airport facilities. The position is also responsible for advising the Chief Executive Officer regarding strategic plans and policies for the long-term growth and development of the airport.

Reporting to the Vice President of Facilities and Administration, this position is challenged with ensuring that all planning and development activities of the Authority are implemented consistent manor. This position must include the Vice President of Facilities and Administration, other Vice Presidents and Directors within the Authority when developing and preparing strategic plans and policies for the long-term development and direction of the Authority's airports.

Provides coordination among various departments and individuals as necessary for effective and efficient operations, sets priorities, establishes sound management and leadership practices, solves problems and exercises strong customer service relations skills.

Besides its internal contact with the Vice President of Facilities and Administration, other Vice Presidents, and Directors, the incumbent is in frequent contact with outside consultants to ensure that all projects are being carried out in a thorough and concise manner while protecting the Authority's interests.

Reporting directly to the Assistant Vice President of Planning and Development are the following positions:

Director of Planning and Development: Responsible for directing and overseeing the management of Authority activities that relate to the planning, programming, and design of airport facilities; and for advising the Chief Executive Officer regarding strategic plans and policies for the long-term growth and development of the airport.

Manager of Construction: Responsible for directing and supervising Authority staff, architects, engineers, and support personnel overseeing and inspecting the construction of facilities for the Authority's airport system.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Ensures the development of the Authority's airport system, including forecasts of activity and facility requirements, project definition, system planning, master planning, budget-setting and monitoring, environmental studies, special studies, project scheduling and monitoring, and construction of airport facilities.
- Ensures the preparation, review, and enforcement of planning, architectural, engineering, environmental, and construction contract documents.
- Ensures the timely implementation of development plans and projects.
- Ensures that the Authority's needs and interests are met with respect to planning, engineering, architectural and environmental designs, related specifications and cost estimates, tenant development plans, and construction management.
- Ensures that architectural, engineering and construction activities comply with approved plans and specifications.
- Ensures the application for, and administration of, all federal and state grant and loan assistance programs.
- Ensures implementation of the Authority's Height Zoning Ordinance.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position includes a Bachelor's degree in architecture, engineering, or construction management, preferably supplemented with a master's degree in business or public administration, and at least ten years of progressively higher levels of responsibility in the areas of major airport planning, design, and construction. Training and experience should include 1) Knowledge of operational characteristics, services, and activities of an airport system; 2) knowledge of federal, state, and local laws, regulations, and standards relating to airport planning and design; 3) knowledge of the codes, regulations, and ordinances applicable to public works construction; 4) knowledge of the major types of building construction materials, and equipment; 5) knowledge of site development and airfield construction; and 6) knowledge of construction delivery mechanisms. The incumbent should also have experience with planning and coordinating the work of a wide variety of technically specialized staff.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: *Business Office Manager – Procurement Department*

Position Title: Senior Manager, Procurement Non-Capital Program

POSITION OVERVIEW

Reporting to the Director, Procurement, Non-Capital and Materials Management, this position oversees four Procurement Agents and is responsible for providing procurement support for 20+ departments including Maintenance, Information Technology, Marketing, Operations, and Concessions utilizing primarily formal and informal solicitation processes such as Invitation To Bid (ITB), Request for Quotes (RFQ), sole source, government contract purchasing, and direct purchases. This position serves as the training administrator for the department and is responsible for Authority-wide staff procurement training, including the introduction to procurement, advance procurement and requisitions. This position is responsible for ensuring contract spend and purchasing controls do not exceed authorized limits, amendments, change orders, and renewals. This position also serves as the department lead for Enterprise Resource Planning system upgrades, patches and issue resolution.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Ensures compliance with all federal, state and local procurement requirements in the selection of supply and service providers, contractors, concessionaires, consultants and individuals providing services to the Authority
- Represent the Authority in negotiating contracts, agreements, work orders and change orders
- Analyzes costs and revenue projections against industry best practices
- Represent the Procurement department at Development Committee meetings
- Oversee the development of solicitation documents, specifications and contract documents for construction projects and professional service agreements
- Analyzes proposals and bids for responsiveness
- Facilitate and oversee technical proposal evaluation process
- Oversee purchasing controls
- Review and approve requisitions, purchase orders, and vendor invoices
- Develop departmental policies and procedures
- Provide oversight and direction to employees
- Act as Director, Procurement Non–Capital Program and Materials Management as necessary

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position are a Bachelor's degree in management, business, or a related field from an accredited college or university. The incumbent should have a minimum of five years of progressively responsible experience in supervision, purchasing, contracts management and competitive procurement processes, of which at least five years must include experience in a public (government) organization; possession of a Valid Class E driver's license or ability to obtain within 6 months of employment. Must hold active Certified Public Purchasing Officer (CPPO) certification by the Universal Public Purchasing Certification Council (other certifications will not satisfy this minimum requirement).

Department:	Procurement
Pos. No:	14820

IDEAL CANDIDATE QUALIFICATIONS:

- Master's degree in management, business or construction.
- Certified Purchasing Manager (C.P.M.), Certified Professional in Supply Management (CPSM) or other equivalent professional certification.
- Management experience with an agency that has obtained the National Institute of Government Purchasing's Pareto Accreditation or Outstanding Agency Accreditation Achievement Award (OA4), National Procurement Institute's Achievement of Excellence in Procurement Award, Florida Association of Public Procurement Officials Achievement of Excellence in Procurement Award or other equivalent type of award or accreditation.
- Experience in utilizing Oracle and other automated procurement systems

JOB SPECIFIC COMPENTENCIES

- Knowledge of the principles and practices of purchasing and procurement within a public agency
- Considerable knowledge of Federal, State and Aviation Authority rules and regulations governing procurement practices within a public agency
- Ability to analyze situations quickly and objectively and determine a proper course of action to be taken in emergency situations
- Ability to seamlessly plan and coordinate multiple activities occurring simultaneously
- Ability to accurately and meticulously maintain records and prepare technical reports
- Ability to communicate effectively orally and in writing
- Ability to easily build rapport and establish and maintain positive effective working relationships with co-workers, representatives of other agencies, and the general public

Tampa International Airport

Position Title: Senior Traffic Specialist

POSITION OVERVIEW

This position reports to a Traffic Supervisor in the Traffic Division which falls under the umbrella of the Airport Police Department. The Senior Traffic Specialist will perform team lead duties over 3-5 Traffic Specialists in addition to providing information, public assistance and guidance to the public while enforcing parking laws and maintaining safety and control of vehicular and pedestrian traffic on airport arrival and departure drives, and other airport areas as needed. The traffic division enforces airport parking laws and regulations, and assist with Transportation Security Administration (TSA) transportation compliance requirements.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Perform team lead duties in a Public Safety and Security Department Police Traffic Division.
- Prepare daily and monthly work schedules, memorandums, correspondence, interoffice communications, etc.
- Direct and control vehicular traffic on Aviation Authority terminal curbside drives and at checkpoint areas crossing taxiways.
- Complete written reports and required forms in accordance with standard operating procedures and directives.
- Observe Traffic Specialists in the performance of their traffic management duties.
- Reassign personnel as needed to maintain efficient public access to the airport.
- Recommend new systems and procedures to improve traffic operations.
- Assist in the resolution of operational and administrative problems.
- Train newly hired personnel.
- Assist with oversight of maintenance, safety and cleanliness of the Traffic Division vehicle fleet to ensure operational readiness.
- Operate required communications equipment.
- Facilitate impounding of vehicles found in violation of airport parking regulations.
- Assume the authority of, and act on the behalf of the Traffic Supervisor, as required.
- Perform other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED Certificate; and
One year of experience directing and controlling vehicular traffic; and possession of a valid Florida Driver's License
Or
Any equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies listed in the job description and additional details.
Must be able to pass the Police Department background investigation including a polygraph assessment and pre-employment drug screening.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of airport traffic rules and regulations.
- Working knowledge of airport security rules and regulations
- Working knowledge of the functions, services, procedures and regulations of the unit to which assigned.
- Ability to plan, organize and oversee the work of others.
- Ability to provide good customer service when dealing with the general public.
- Able to stand for long periods of time.
- Ability to properly direct vehicular traffic.
- Ability to operate a tow truck.

Tampa International Airport

Position Title: Traffic Training Coordinator

POSITION OVERVIEW

The Traffic Division Training Coordinator will serve as part of the team supporting Tampa International Airport's operations, public safety and security activity within the airport 24 hours a day. This 58-staff member team resides under the umbrella of the Airport's Police Department. The Traffic Training Coordinator will contribute to the growth and success of the Traffic Division's Training Program by developing and facilitating classroom and hands-on instruction for all Traffic personnel to include newly hired traffic specialists. Additionally, the Traffic Training Coordinator will be responsible for all annual and remedial training for personnel as required by the Florida Department of Law Enforcement.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

Position accountabilities include:

- Evaluate employee performance, analyze and identify opportunities for performance improvement and translate needs into lessons and remedial training modules.
- Develop, update, and review reference guides and instructional materials associated with Traffic Training.
- Perform as a Lead Trainer for newly hired Traffic Specialists and conducts classroom and on-the-job training.
- Perform training related administrative tasks; develop and maintain databases of training records.
- Attend meetings, serve on committees, and make presentations as needed. Perform general/clerical tasks, which may include answering telephone calls, making copies, sending/receiving faxes, filing documentation, or processing incoming/outgoing mail.
- Proficient with MS Office programs (Outlook, Word, Power Point, Excel)
- Conduct monthly quality assurance reviews of traffic personnel performance and deliver analysis to supervision for follow-up coaching.
- Participate in the recruitment, review, interview, and selection process of traffic applicants.
- Maintain a comprehensive knowledge of training principles, procedures, and presentation techniques; research and assess new training techniques and programs; coordinate training resources, and provide updates to web based materials and printed guides when applicable.
- Engage in Traffic duties as workload and training schedules dictate; additional duties should be limited to periods of time when staffing assistance is immediately needed or when an emergency situation arises.
- Demonstrate scheduling flexibility to accommodate training needs for all shifts.
- Maintain training records and reports.
- Testify in court to provide an accurate account of information related to training records and emergency/non-emergency calls for assistance, as required
- Perform other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from high school or possession of a GED certificate;

Currently a Traffic Specialist/Senior/Supervisor within the Traffic Division with a minimum of 2 years' traffic experience, and 1 years' experience as a trainer.

POSITION OVERVIEW

Reporting to the Vice President of Operations, this position serves as the chief law enforcement officer of the Aviation Authority and is responsible for ensuring the safety and security of all persons and property at Tampa International Airport. The Director of Public Safety and Security is responsible for the enforcement of laws, regulations traffic, airport operations center, security administration and security operations at the Airports and for the overall leadership and administration of the Airport Public Safety and Security Department.

This position coordinates law enforcement, safety and security activities related to public safety and security with tenants, outside agencies and in conjunction with the Aviation Authority's Operations Department and the Federal Transportation Security Administration (TSA). The incumbent serves as liaison with all other law enforcement agencies in matters involving the Aviation Authority and coordinates efforts in the case of special investigations and security operations.

The Director of Public Safety and Security prepares and updates applicable sections of the Master Airport Security Plan relating to law enforcement and security and coordinates closely with the Operations Department, on issues dealing with safety and security. As a department head attends and participates in all staff functions as part of the Aviation Authority's leadership group.

This position is challenged with keeping abreast of changing federal and state regulations and statutes and with determining their proper enforcement.

The Director of Public Safety and Security has a variety of internal and external contacts. These include tenants and employees in order to provide guidance on police and traffic measures; other law enforcement agencies, airport operations center functions, security administration, and security operations to discuss matters that affect the airport; the Operations Department to ensure compliance with the various rules and regulations of the Transportation Security Administration and Aviation Authority staff members to coordinate joint activities.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Plans, coordinates, directs, and supervises the activities of Aviation Authority personnel engaged in Airport Operations Center, Security Administration, police and traffic programs to ensure that laws and regulations are enforced for the protection of people and property at the airport.
- Creates and maintains a strong sense of public service and customer relations among Airport Police, Traffic, Security Administration and Airport Operations Center personnel to ensure that the public's needs for information, assistance, and counseling are met in a prompt and courteous manner.
- Implements and monitors the Federal Transportation Security Administration's procedures to ensure airport compliance with TSA requirements associated with law enforcement activities and to participate in the Joint Terrorism Task Force.
- Ensures that federal, state and municipal laws and Aviation Authority regulations are enforced at the airport.
- Prepares annual budget for the Public Safety and Security Department.

- Reviews and updates Pubic Safety and Security Department policies and procedures so as to ensure that they remain current.

KEY LEADERSHIP ATTRIBUTES

- Strong leadership, team-building and consensus building skills required.
- Results driven and decisive with an ability to execute plans that are operationally sound.
- Very visible, enthusiastic, and a high energy level.
- Strong interpersonal and communication skills.
- Ability to effectively balance multiple high priority tasks simultaneously.
- Must be willing to work extended hours (nights, weekends, holidays) as required by operation and must be willing to be on call 24 hours a day, 7 days a week.
- Strong analytical and issue resolution skills required

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position include a Bachelor's degree in law enforcement, criminal justice, public administration or related field, and at least five years of responsible management and administrative level experience in law enforcement. The incumbent must also be certified or certifiable by the State of Florida Criminal Justice Standards and Training Commission.

Tampa International Airport

Position Title: Director of Airline Properties and Contracts

POSITION OVERVIEW

Reporting to and under the general direction of the Vice President of Real Estate, the Director of Airline Properties and Contracts is responsible for the management of airline properties and contracts for the Authority. The incumbent will provide technical and legal expertise in contract negotiation and drafting, and will provide advice regarding all real estate activities affecting airlines and ground handlers.

The incumbent is also responsible for evaluating, developing, negotiating, and managing all airline and ground handler agreements. The incumbent will also develop a strategic plan, including recommendations for generating and driving aeronautical revenues.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

1. Responsible for the overall success of the Authority's Airline Real Estate Department, and represents the organization, both internally and externally, by supporting the Authority's strategic direction and priorities, objectives, vision, mission and values.
2. Establishes and communicates reasonable standards of performance.
3. Directs and acts on project management, administrative, and operational issues related to airline real estate, including aeronautical and non-aeronautical contract analysis, administration, drafting, interpreting, and management.
4. Directs business by providing technical analysis and contract expertise in compliance with regulatory and Authority policies and procedures to meet business, contract and revenue goals. Establishes effective project/program outcomes and schedules.
5. Directs and, as required, conducts negotiations and preparation of favorable lease and operating agreements. Assists in the strategy, development and preparation for the conduct of negotiations as well as assisting in formulating policies that are applicable to this role.
6. Identifies and builds strategic networks, relationships, and partnerships, including personal interactions with aviation and non-aviation customers to identify and meet contractual and facility needs.
7. Develops and maintains effective, efficient workflow and ongoing operations including recommending process improvements, as needed.
8. Selects, trains, supervises, motivates, coaches development skills, and evaluates personnel.

Reporting to this position are:

Project Mangers who assist the Director with the goals of the Airline Real Estate Department.

MINIMUM QUALIFICATIONS

The general qualifications of the position will include at least five (5) years of project management, contract development, and contract administration experience. Educational requirements include a Bachelor's degree from an accredited college or university. Demonstrated knowledge of contracts and business practices a must, and must reflect a thorough understanding of administration and management of contracting documents and compliance with policies and procedures. Related experience may be substituted for education on a year-for-year basis.

Strong oral and written communication skills and solid experience in negotiations mandatory. Must be competent in operating standard Microsoft Office applications including MSWord, Excel, and Power Point. Must possess a positive

attitude, be customer service focused, and have the ability to work in a team environment. A valid driver's license is required.

PHYSICAL REQUIREMENTS

The ability to sit or stand for extended hours.
The ability to utilize standard work aids including telephones, computers, Facsimile and copy machines.
The ability to speak and write clearly and analyze and interpret complex and detailed information for accuracy.
The ability to endure significant air and motor travel.
The ability to independently operate a motor vehicle.

JOB SPECIFIC COMPENTENCIES

Technical Knowledge

- Demonstrated expertise in contracting techniques and best practices. Considerable knowledge of the principles and practices of business negotiations, contract law, and project management.
- Understands, utilizes, and integrates financial data and other key performance indicators to support process performance, as applicable.
- Demonstrated experience in consulting and interpersonal skills to assist internal customers with real estate services.
- Demonstrated expertise in service-based, customer-centered best practices; has applied them effectively.
- Proficiency in effective, concise communications, both orally and in writing.

Competencies

- Leadership – Clearly supports, communicates and takes responsibility to implement the Authority's mission and vision goals. Actively solicits opinions and perspectives from all levels of the organization. Encourages and is open to other points of view. Will challenge the status quo to move the Department forward to the highest levels of achievement and in alignment with Authority goals. Demonstrates concern for employees' well-being; promotes and supports the ongoing development of employees.
- Influence – Is compelling and persuasive when engaged with individuals or teams inside and outside. Recommends solutions based on data and balancing the needs of the Authority and customers, partners and vendors. Commands respect based on results achieved and behavior consistent with the Authority's values at all levels.
- Communication Skills
- *Internal Communication* – Requires developing and maintaining ongoing internal relationships involving difficult, formal negotiations. This calls for a well-developed sense of timing, strategy, and may involve detailed explanation and interpretation of policies, rules and regulations. Requires the handling of extremely delicate/sensitive relationships and complex situations.
- *External Communication* – Requires developing and maintaining ongoing external relationships involving difficult formal negotiations. This calls for a well-developed sense of timing, strategy and may involve detailed explanation and interpretation of policies, rules and regulations. Requires the handling of extremely delicate/sensitive relationships and complex situations.

- Innovation and Creativity **–** Develops and implements creative and innovative solutions to business problems. Encourages and expects others to think "out of the box" and not be limited by existing methods and procedures. Explains how proposed changes will create value for the customer and the Authority.
- Customer Focus – Demonstrates a clear understanding of effectively managing both internal and external customer requirements and measurement criteria. Identifies and makes process improvements to better serve the customer. Establishes positive and collaborative relationships with all customers.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Real Estate, this position is responsible for the management of Real Estate Development for the Authority. The incumbent will provide the technical and legal expertise in compliance with the State of Florida's standards of conduct and provide advice regarding all real estate activities, such as title work, survey, easements, environmental issues, appraisals, appraisal reviews; purchase, relocation and development of property interests; conduct negotiations; and monitor other potential areas that might present risk for each transaction and/or venture.

The incumbent will also be responsible for developing, implementing and managing a robust real estate program in alignment with the Authority's aeronautical and master plan development, but must strive to creatively maximize the use of available Authority land.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

1. Responsible for the overall success of the Real Estate Development Department for the Authority, including commercial and industrial, and represents the organization, both internally and externally, by supporting the strategic direction and priorities, objectives, vision, mission and values of the Authority.
2. Establishes and communicates reasonable standards of performance.
3. Provides direction and mitigation strategies regarding real estate ventures and negotiations, while ensuring legal compliance with Florida legislative regulations, and other agencies and entities.
4. Directs and, as required, conducts solicitations, negotiations and preparation of favorable lease agreements. Assists in the strategy, development and preparation for the conduct of negotiations as well as assisting in formulating policies which are applicable to this role.
5. Identifies and builds strategic networks, community relationships and partnerships that could fit the Authority's real estate development strategy.
6. Develops and maintains effective, efficient workflow and ongoing operations including recommending process improvements, as needed.
7. Effectively manages the real estate budget by facilitating realistic forecasting, maintaining effective budgetary controls, constructing contingency plans to stay within budgetary constraints, reducing expenses and/or developing revenue generating opportunities.

Reporting to this position are:

Project Managers – who assist the director.

Project Managers, who assist this position with the real estate development goals.

MINIMUM QUALIFICATIONS

The general qualifications of the position will include at least five (5) years of real estate development experience. Educational requirements include a Master's degree from an accredited college or university. Must obtain a Florida Real Estate License within one year of employment. Demonstrated knowledge of real estate development business practices a must. Strong oral and written communication skills and solid experience in negotiations mandatory. Must be competent in operating standard Microsoft Office applications including MSWord, Excel, and Power Point. Must possess a positive

attitude, be customer service focused, and have the ability to work in a team environment. A valid driver's license is required.

PHYSICAL REQUIREMENTS

The ability to sit or stand for extended hours.
The ability to utilize standard work aids including telephones, computers, Facsimile and copy machines.
The ability to speak and write clearly and analyze and interpret complex and detailed information for accuracy.
The ability to endure significant air and motor travel.
The ability to independently operate a motor vehicle.

JOB SPECIFIC COMPENTENCIES

- **MINIMUM REQUIREMENTS**

Technical Knowledge

- Demonstrated expertise in real estate services techniques and best practices. Has a thorough knowledge of all real estate laws, practices, policies and guidelines.
- Understands, utilizes and integrates financial data and other key performance indicators to support process performance.
- Demonstrated experience in consulting and interpersonal skills to assist internal customers with real estate services.
- Demonstrated expertise in customer-centered real estate services best practices; has applied them effectively.
- Understanding of technical standards and requirements of external and internal customers.
- Professional certification in Real Estate or related field desired.

Competencies

- Leadership – Clearly supports, communicates and takes responsibility to implement the Authority's mission and vision goals. Actively solicits opinions and perspectives from all levels of the organization. Encourages and is open to other points of view. Will challenge the status quo to move the Department forward to the highest levels of achievement and in alignment with Authority goals. Demonstrates concern for employees' well-being; promotes and supports the ongoing development of employees.
- Influence – Is compelling and persuasive when engaged with individuals or teams inside and outside. Recommends solutions based on data and balancing the needs of the Authority and customers, partners and vendors. Commands respect based on results achieved and behavior consistent with the Authority's values at all levels.
- Communication Skills
- *Internal Communication* – Requires developing and maintaining ongoing internal relationships involving difficult, formal negotiations. This calls for a well-developed sense of timing, strategy and may involve detailed explanation and interpretation of policies, rules and regulations. Requires the handling of extremely delicate/sensitive relationships and complex situations.
- *External Communication* – Requires developing and maintaining ongoing external relationships involving difficult formal negotiations. This calls for a well-developed sense of timing, strategy and may involve detailed explanation

and interpretation of policies, rules and regulations. Requires the handling of extremely delicate/sensitive relationships and complex situations.

- Innovation and Creativity **–** Develops and implements creative and innovative solutions to business problems. Encourages and expects others to think "out of the box" and not be limited by existing methods and procedures. Explains how proposed changes will create value for the customer and the Authority.
- Customer Focus – Demonstrates a clear understanding of effectively managing both internal and external customer requirements and measurement criteria. Identifies and makes process improvements to better serve the customer. Establishes positive and collaborative relationships with all customers.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Department:	Real Estate
Pos. No:	00292
Pay Grade:	E4 ($76,500 -158,000)- Exempt
Last update:	8/2018 Compensation

POSITION OVERVIEW

The Vice President of Real Estate is responsible for the strategic leadership, management and coordination of all passenger, cargo airline and airline-related leases, contracts and agreements, and oversees Real Estate Development for the Authority. The Vice President of Real Estate will proactively manage the airport's relationships with airline properties' representatives and local station managers to facilitate all airline-airport contractual and development issues, and to ensure consistency and compliance with agreements. This position oversees the administration and maintenance of the Authority's comprehensive real estate database, and works closely with the Airport's Finance and Legal Affairs departments to ensure appropriate billing rules and parameters for airline and associated leases and agreements. This position also assists in the preparation of airline revenue forecasts for incorporation into annual budgets and amendments. The Vice President of Real Estate oversees the management of negotiations associated with Real Estate Development and monitors other potential areas that might present risk for each transaction and/or venture.

POSITION ACCOUNTABILITIES

- Responsible for the overall success of the Airline Real Estate Department and represents the organization both internally and externally by supporting the Authority's Mission and Vision, strategic priorities, objectives and values. Serves as the primary relationship manager for all airline property managers.
- Oversees coordination of the contracts and processes involved in introducing new entrant carriers into the TPA market, including identifying appropriate ticket counters, ticket offices and gates; scheduling Pre/Post Operations Meetings with the airlines and internal and external stakeholders to ensure that startup operations are organized, well-managed and efficient, and to solicit feedback to address any issues after operations begin.
- Oversees coordination, scheduling, and preparation of all Airport/Airline Affairs Committee and Airline Manager meetings throughout the year to ensure meetings are planned in advance with sufficient time for stakeholders to review the proposed agenda, dry runs are scheduled in advance of each meeting, and pre-meeting activities with the airlines and community stakeholders are planned.
- Responsible for the coordination, development and dissemination of regular Airport/Airline Affairs Committee communications to enhance the ability of Airlines to remain informed on airport issues and events, the fiscal performance of the Authority, and regular updates about capital projects.
- Coordinates directly with airport leadership and staff from all departments to ensure seamless operations for Airport tenants and that all agreements comply with Federal, State, local and HCAA laws, rules and regulations. Ensures the use of uniform contract documents and the efficient and timely development as well as administration of all Airline Real Estate-related contracts.
- Responsible for ensuring compliance by airport tenants in accordance with their leases and agreements, and routine monitoring of tenant operations to ensure quality and level of service, and for the timely and accurate updates to the PROPworks® database billing system.
- Participates in the determination of airline rates and charges in accordance with the Signatory Airline Agreement and Board approved policies.
- Develops the budget for carrying out the department's duties and responsibilities and implementing the Authority's Mission and Vision initiatives, strategic priorities, objectives and values with respect to its core airline business.

Reporting to the Vice President of Real Estate are the following positions:

- Commercial Real Estate Director
- Real Estate General Manager
- Senior Real Estate Project Manager

Department:	VP Real Estate
Pos. No:	311002
Pay Grade:	E8 ($140,800 - $260,100)
Last update:	10/24/2019 WID

- Senior Business Analyst
- Real Estate Program Coordinator

MINIMUM QUALIFICATIONS

The minimum qualifications for the Vice President of Real Estate are a Bachelor's Degree with an emphasis in business or public administration, contracts/property management, or equivalent and at least five years of experience in airport/airline and real estate contracts and property management. The incumbent's experience should include work at a medium or large hub airport or with an airline in its properties division and should reflect a clear understanding of airport property management, airport/airline economics, and the ability to interpret contractual agreements and their provisions.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Performs day-to-day operational administrative management duties for the Records and Information Office, which provides routine programs and services in any of a large variety of departments and agencies, with responsibility for planning, coordinating, supervising and controlling assigned resources to achieve unit/section objectives. Position is an entry level manager and managers in this class typically manage clerical, maintenance and technical employees.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages the day-to-day operations of the unit/section, coordinates and administers assigned programs and resources.
- Sets direction and priorities and allocates staff and resources to projects and unit initiatives.
- Provides supervision, guidance, training and motivation to assigned staff; assigns, monitors and reviews work; evaluates performance and initiates corrective action as needed, including termination.
- Performs a variety of administrative duties in support of the unit's activities.
- Implements goals, policies, procedures and guidelines to ensure operational efficiency and effective administration of unit.
- Monitors work flow, data accuracy, and overall quality of work; assures processes and procedures are accomplished according to established guidelines.
- Assesses staffing needs and identifies shortfalls; interviews, recruits and hires new staff.
- Participates in budget development by providing detailed justification and persuasive arguments for proposals or unit initiatives, but has no direct budget approval responsibility.
- Coordinates with other branches/sections within own organization and external agencies/departments to ensure efficient flow of communications and services.
- Provides consultation to customers on matters relating to functional area.
- Prepares a variety of documents for the purpose of documenting activities and administering assigned programs and resources.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university; and two years of experience directly related to the position duties or any equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the functions, services, procedures and regulations of the assigned unit.
- Skill in the application of supervisory techniques.
- Ability to support, promote, and ensure alignment with the departments/agency's goals and vision.
- Ability to effectively recruit, select, develop and retain competent staff.
- Ability to establish and maintain effective working relationships with others within and outside own organization.

- Ability to use initiative and exercise sound judgment.
- Ability to communicate effectively, orally and in writing.
- Ability to effectively manage and guide group efforts.
- Ability to create solutions to problems using new methods and processes.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Tampa International Airport is seeking an innovative leader to manage the Central Records department at the Aviation Authority. This role is responsible for managing agency's records and information management function and setting goals and strategic direction. The Central Records department manages the retention, storage and eventual disposal of physical and electronic records and oversees mailroom activities for the Aviation Authority. This position serves as the Aviation Authority's chief records custodian and subject matter expert for the management of physical and electronic records generated and maintained by the Aviation Authority. The Records and Information Management Manager is responsible for directing people and programs to develop and realize the agency's records and information management vision through strategic and business planning. The ideal candidate will have outstanding interpersonal and supervisory skills, a positive attitude, integrity, flexibility and possess comprehensive management and leadership skills. The person selected as the Records and Information Management Manager will have a unique opportunity to help move the Aviation Authority into a state of the art electronic records management program.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Manages the Aviation Authority's records management program, which includes the identification, classification and indexing of documents; the conversion of printed records eligible for alternative storage media and the retention of records.
- Maintains liaison with state archival officials to establish and provide retention and disposal standards and schedules for records and ensures agency compliance.
- Oversees the handling of public records requests and ensures compliance with Public Records Laws.
- Initiates and coordinates public records training.
- Interacts with department records custodians to ensure proper handling and archiving of department documents.
- Responsible for managing the Authority's mailroom, including the sorting and delivery of incoming mail, preparation and sending of outgoing mail and delivery of inter-office mail.
- Ensures packages received are logged into the Delivery Tracking System.
- Oversees the logging of incoming cash and credit card payments received by the Authority.
- Maintains master record of all standard agency forms.
- Acts as a business liaison with other departments to ensure appropriate information management practices and controls are in place to meet relevant information risk, policy and regulatory requirements.
- Assesses the activities of the team and recommend process improvements measured against national standards.
- Ensures appropriate controls are in place to enforce the confidentiality, privacy and security obligations for protected information working closely with Information Technology Services to identify evolving data protection risks, threats, trends and tools
- Keeps current with information technology, related legal and industry standards, regulations and emerging practices and their impact on the planning and implementation of the records management program.
- Manages, directs and coordinates department activities; works with personnel to establish schedules and methods; develops and implements policies and procedures; assigns work activities, projects and programs; monitors workflow; reviews and evaluates work products methods and procedures; and reviews and approves time, reimbursement requests and purchases.
- Responsible for the selection, supervision and evaluation of assigned staff and ensures appropriate training is provided. Leads a team of direct reports in an ongoing coaching environment, focusing on continuous process improvement.
- Develops team goals, long and intermediate strategies and priorities. Develops a business plan that ensures the accomplishment of the team goals and objectives for the different disciplines of records management. Tracks team goals and objectives, analyzes team activities and prepares reports.

- Develops and monitors budget and forecasts the needs for staffing, equipment, materials and supplies.

MINIMUM QUALIFICATIONS

An Associate's or higher degree from an accredited college or university is preferred. Five years of increasingly responsible relevant experience, of which two years must have been in a project management, supervisory or lead capacity. Certification in records and/or information management preferred.

Demonstrated knowledge and understanding of principles, practices and methods of records management, which include identification, storage, circulation, retention and disposal of records; strategies, tools and technologies used to capture, manage, store, preserve and deliver information manually or electronically. Demonstrated experience working with an electronic records management system such as P8 or Laserfiche. The ability to pass a pre-employment drug screen, credit check and FBI/TSA background check.

JOB SPECIFIC COMPENTENCIES

- Participate in continuing education, research, networking, and professional and industry organizations to develop, maintain and advance competencies.
- Effectively manage during periods involving changes in tasks, work environment or conditions affecting the organization.
- Partner with Information Technology Services to develop best practices and procedures related to managing electronic information repositories.
- Work closely with the Legal Affairs department, coordinating records requirements and providing research in support of Public Records requests.
- Considerable knowledge of data structure and information flow to enable one to review, recommend, and revise organizational business policies to achieve compliance with technology, legal, and records requirements.
- Seek out electronic document imaging technology best practices for upgrading of production capabilities on an agency-wide bases.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

Tampa International Airport

Position Title: *BIM/CAD Manager*

POSITION OVERVIEW

Nature of Position: Tampa International Airport is seeking an experienced Computer Aided Design (CAD) and Building Information Modeling (BIM) Manager to develop, implement and maintain the Authority's Landside and Airside CAD and BIM capabilities. The CAD/BIM Manager will be responsible for creating and executing a vision for BIM at Tampa International Airport (TPA) and the General Aviation airports, which reflects the forefront of industry trends to better leverage the BIM environment. The CAD/BIM Manager will maintain and update the current CAD standards, develop and maintain BIM standards, define BIM business needs, improve business processes and asset management, and maintain accurate and up-to-date building documentation. The CAD/BIM Manager is expected to engage with both internal and external entities.

Ideal candidates will have a minimum of five (5) years' experience managing CAD/BIM workflows and coordinating complex, multi-disciplined BIM models and/or civil site plans utilizing industry recognized best practices. Ideal candidates are creative, collaborative, self-motivated, positive and nimble with excellent verbal and written communication skills. A high level of aptitude of Autodesk Revit is required.

In addition to the overall management of BIM resources, the CAD/BIM Manager will maintain and create exhibits for the Authority's internal departments, collaborate with the Authority's GIS team in asset collection and management, and maintain the Authority's project drawing archives including master building, site and utility drawings.

POSITION RESPONSIBILITIES

- Develop, implement and maintain BIM/CAD standards, documentation and workflow processes
- Maintain existing base files and background files (BIM/CAD) of Authority facilities and coordinate the acquisition and inclusion of new spatial data, utilities, drainage and/or properties or buildings
- Expand and administer existing quality control/assurance programs for the adherence of BIM and CAD submissions from design and construction professionals to Authority standards
- Communicate BIM initiatives and promote the BIM program
- Proactively engage departmental leaders and project directors regarding the implementation of BIM within the Authority's Capital Improvement Program (CIP)
- Assist internal project work to include modeling, detailing and documentation (as needed)
- Manage and distribute digital documents to internal and external customers
- Maintain paper and electronic drawing archives including conversions of paper and digital formats to PDF
- Coordinate facility space identification systems including Propworks and address identification databases
- Develop and maintain a wide range of drawing exhibits such as Project Management Plan (PMP) exhibits, lease exhibits, property maps, site plans, special use plans, security plans, facility floor plans, incident reports and signs
- Collaborate with the Authority's Geographic Information System (GIS) database to include asset collection and management
- Assist with the preparation of PowerPoint presentations
- Maintain the Authority's large-format plotters and scanner
- Stay informed on industry recognized best practices and trends for Revit and BIM
- Other related duties as assigned

MINIMUM QUALIFICATIONS

- Five (5) year's experience managing or administering complex, multi-disciplinary BIM projects

DRAFT

- Experience managing and developing BIM standards and practices
- Advanced knowledge and fluency in Revit and AutoCAD
- Knowledge of A360, Navisworks and/or Dynamo
- Fluent knowledge of multi-disciplinary model coordination, worksharing, shared coordinates, model templates, family creation, and project parameters
- Articulate communication and presentation skills with the ability to convey BIM concepts to all levels of Authority leadership, project managers, designers and contractors
- Experience in MS Office, specifically PowerPoint and Excel

PREFERRED QUALIFICATIONS

- Experience working at an airport or in Aviation design or construction
- Working knowledge of AutoCAD Civil 3D
- Experience integrating ArcGIS with Revit/AutoCAD
- Working knowledge of Photoshop, Illustrator and/or InDesign
- Experience utilizing COBie data as a means of collecting asset information in BIM

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

DRAFT

Tampa International Airport

Position Title: *Business Analyst - Parking*

POSITION OVERVIEW

Under general direction of the VP of Concessions and the Director of Commercial Parking, the incumbent will perform regular analyses of parking and other related data sources to help inform decision making, optimize revenue and increase customer service. Duties involve working with numerous data sources and interpreting these data sources in order to provide insight into the parking business and related areas. Working across departments and with other stakeholders, the ideal candidate will be working with numerous systems and will have the skill set to manipulate the different data sets and provide accurate, timely and concise reports.

POSITION ACCOUNTABILITIES

Note: The following job description is not intended to be, nor should it be construed as an all-inclusive list of responsibilities associated with this position. The duties listed are illustrative, not exhaustive and any omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Management may require incumbents to perform job duties other than those contained in this document at any time.

- Provide and present analysis and reports on parking financial performance, product performance and future plans to senior management.
- Undertake regular variance and trend analyses
- Mine data to recommend changes to parking pricing or offers
- Study the change in behavior of passengers due to the implementation of new products, features, pricing, marketing etc.
- Assist in customer research programs and the process of decision making based on the findings
- Interpret various sources of data and convert findings into reports, ideas and recommendations
- Work with other departments to ensure compliance with parking revenue control and audit processes.
- Provide reliable and accurate analysis to inform decision making
- Produce new and perceptive reports from the Business Intelligence System
- Performs other related duties as required.

- Researches, reviews and prepares specifications and scope of work documents to determine appropriate purchase of equipment, goods, materials and services within area of responsibility.
- Purchases supplies, materials, services, equipment, and parts to satisfy the needs of operational units and departments within the Authority.
- Prepares, issues and processes invitation to quote and invitation to bid documents.
- Processes small dollar contracts.
- Reviews and processes purchase requisitions for item descriptions, quantities, adequacy of specifications, and estimates of costs for accuracy and compliance with Authority policies.
- Follows up on urgent purchase orders to reassure delivery is made timely.
- Confers with requesting department personnel regarding the adequacy of specifications for goods, services, or equipment to be purchased to ensure Authority needs are met.
- Confers with departments to solve complex problems pertaining to procurement.
- Performs research to develop sources of supply for assigned commodities with a continuous improvement approach to achieve on-time delivery and quality.
- Participates in the tabulation and analysis of quotes and bids to determine the lowest and best bidder and issues purchase orders in compliance with Authority policies.
- Responds to inquiries regarding procurement activities.
- Maintains records and electronic files for requisitioned items, bid analyses, purchase orders, contracts, equipment specifications, technical reference information and supplier catalogues, ensuring that information is current and accurate.
- Performs research and prepares reports.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four-year degree-granting college or university in business administration, management, public administration or related field or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below; two years of experience in public purchasing; and Certified Public Purchasing Buyer designation issued by UPPCC within two years of hire.

JOB SPECIFIC COMPETENCIES

- Working knowledge of procurement practices such as supplier and source identification, pricing methods, bid preparation, contracts, and pricing agreements.
- Working knowledge of policies, procedures, and regulations governing public procurement.
- Working knowledge of the operation of computers to maintain files and generate reports.
- Ability to prepare and/or review solicitation documents and responses for compliance with policies, procedures, conditions, and regulations.
- Ability to prepare purchase orders, contracts, and similar documents.
- Ability to maintain work related records, perform research and prepare reports.
- Ability to use a computer and related software.
- Ability to prioritize workload.
- Ability to work effectively with others.
- Ability to proof own work and the work of others.

CORE Values

- ***Safety*** - Extending beyond our proactive approach to maintaining a secure facility for guests, our commitment to safety acknowledges the sense of security and peace of mind that comes from providing a warm and comfortable environment.
- ***Service*** - We are committed to the highest levels of guest quality and service. Tampa International Airport team members take great pride in delivering top-notch experiences that are helpful, welcoming and friendly. Our minimum standard is excellence in all we do.
- ***Community*** - As the gateway to the west coast of Florida, we serve communities and businesses throughout the region. Through our initiatives, we bring regional interests and organizations together to build a stronger Tampa Bay. As a good neighbor and community partner, we are committed to providing opportunities and making responsible choices that benefit our region.
- ***Growth*** - We are committed to building a sound financial position that cements our ability to be best in class for years to come. Our economic strength comes from a sensible and dynamic approach to growth. We will ensure that as the Tampa Bay region grows their airport is scaled to meet rapidly changing needs.
- ***Innovation*** - We are imaginative and forward-thinking. Dedicated to evolving both form and function through technological advancement, improved processes, and operational efficiency; while remaining true to our guests' desire for simplicity, organization and convenience.

This classification description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with a particular position. Management may require incumbents to perform job duties other than those contained in this document at any time.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

POSITION OVERVIEW

Serves as the Chief Executive Officer of the Hillsborough County Aviation Authority and under the general administrative direction of the Board, the Executive Director is responsible and accountable for the planning, operations, public safety, security, maintenance, legal, development, marketing, community relations, finance and administrative functions for Tampa International Airport, Peter 0. Knight Airport, Vandenberg Airport and the Plant City Airport.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

1. Responsible for the creation and implementation of the long-term strategic initiatives, approved by the Board, to guide the ultimate development and direction of the HCAA.

2. Responsible for the selection, training and motivation of the staff of the HCAA to create a productive work environment. Implementation of programs to ensure staff career advancement opportunities and provide the resources to accomplish assigned tasks.

3. Responsible for the coordination with all agencies within Hillsborough County that have responsibility for Economic Development, Travel, Tourism and Convention activities to ensure the aviation system is positioned to satisfy their requirements for continued growth for the overall benefit of the community.

4. Responsible for media relations, developing promotional campaigns, issuing press release, responding to requests for specialized services and maintaining good relations with the general public by being active in the community. Typically, this would include public presentations relating to the Aviation System and its importance in the ultimate development of the Metropolitan Service Area to business and community groups.

5. Responsible for compilation, preparation and analysis of quantifiable airport and air service data for use by the Aviation Authority to pursue potential air service opportunities for passengers and cargo to improve the competitive advantage of the air service region and present the results to the identifiable service providers. Provides statistical and economic concepts to support recommendations, and promotes airport oriented activities in the region.

6. Monitors all local, state and federal legislative initiatives relating to the aviation industry to protect and promote the interests of the HCAA

7. Responsible for lease and contract negotiation and for the coordination with air carriers, concessionaires and tenants of the aviation system to support the ultimate development of services and facilities to provide the highest possible level of service to the users and customers of the airports under the control of the HCAA

8. Coordinates the activities and involvement of the HCAA with the Airports Council International, the American Association of Airport Executives, the Air Transport Association and other trade associations in an effort to influence the initiatives these organizations pursue to assure their compatibility with the goals and objectives of HCAA.

9. Responsible for compliance with all federal, state and local procurement requirements in the selection of contractors, concessionaires, consultants and individuals providing goods or services to HCAA. Development of programs to ensure equal opportunities for Disadvantaged Business Enterprises in providing services to the general public.

10. Responsible for the maximization of revenues and the minimization of expenditures to protect the financial strength of the HCAA.

11. Performs other duties as required to ensure the success of the ultimate development of the airports under the control of the HCAA is of the highest quality possible to serve the requirements of the local and national air transportation system.

The specific recitation of the above items shall not be deemed to limit the Executive Director's duties and responsibilities only to those set forth above. The Executive Director's duties and responsibilities shall be subject to the authority of the governing board of HCAA.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Position Title: *Concessions Contracts Manager*

POSITION OVERVIEW

Tampa International Airport is seeking a proactive self-starting individual to be responsible for the administration of leases and contracts to ensure compliance with terms and conditions expressed therein; research relevant markets and financial trends to forecast future business activity and assist in developing recommendations; maintain strong business relationships with tenants. The ideal candidate will have the ability to build relationships across the Authority and will have the curiosity explore the business impacts of new lines of business to the Authority. Additionally, the incumbent will be asked to provide exceptional leadership and strong written and oral communication skills along with experience in the areas of contract management, strategic planning, and financial management as well as manage the day-to-day relationship between the Authority and the Concessions partners.

POSITION ACCOUNTABILITIES

Note: The following duties are illustrative and not exhaustive. Department: Concessions
Salary Range begins at $76,500 and depends on experience.

POSITION OVERVIEW

Tampa International Airport is seeking an innovative professional to provide leadership and technical guidance for the Authority's information technology network infrastructure and support services team. Reporting to the Vice President of Information Technology Services, this position will provide leadership, vision and direction to the IT Operations and customer support team to enable cross-functional productivity of all Authority employees, and oversee the IT Operations and Support section. The incumbent will be responsible for the day-to-day management of the network infrastructure and customer support groups including staffing, budgeting and other relative leadership and management functions.

The Director of IT Operations and Support's primary responsibility will be to oversee the operation of the IT Operations and Support section(s) and it's interaction with internal and external users to include Network Administration, Database Management, IT Helpdesk and Desktop support and to ensure that all IT activities are aligned with the Authority's strategic objectives. The Director will plan, coordinate, direct and design operational activities of the IT Operations and Support team, as well as provide direction and support for IT solutions that enhance critical business operations.

The Director will work closely with senior management in all departments across the Authority to identify, recommend, develop, implement, and support cost-effective technology solutions for technology infrastructure and database management aspects of the organization. Strong analytical business skills, technical competence, communication, organization and leadership skills are required.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for the activities of the IT Operations and Client (Customer) Support team including data admin, telecommunications and client platform teams
- Ensures consistency and maintainability of existing network and infrastructure by incorporating industry "best practices" and/or creating, maintaining and enforcing standard operating procedures for the deployment and use of technology through the Authority to ensure excellent customer service to the Authority's user community
- Provides direct supervision and mentoring to IT Operations and Client Support managers to drive efficiency and effectiveness
- Develops IT strategy plans to include technical specifications, user requirements, technical design, network infrastructure, security protocols, and equipment requirements
- Develops and updates IT policies and procedures in conjunction with the Authority's organizational goals
- Works collaboratively with Authority department directors and leadership to meet the Authority's strategic goals relative to IT network and infrastructure support
- Ensures proper documentation of all aspects of IT operations to include preparation of regular status reports and budget/financial updates
- Ensures Authority network systems and infrastructure maintenance and updates adhere to security standards in partnership with the Information Security Office.
- Responsible for establishing job standards for subordinate staff and effectively evaluating staff under their direction in accordance with Authority procedures.
- Develops, prepares and recommends budget for purchasing, upgrading and network and infrastructure equipment
- Leads vendor/hardware selection/evaluation and implementation. Engages with Procurement and Legal for contract management and guidance
- Contributes to the overall technology strategy, architecture and process improvements for the Authority.

MINIMUM QUALIFICATIONS

Bachelor's degree in Information Systems, Computer Science, Management Information Systems, Computer Engineering, or other related discipline. At least seven (7) years of professional experience in relevant information technology leadership roles.

JOB SPECIFIC COMPENTENCIES

- Knowledge of Computer hardware and software used in a networked and web-based environment.
- Knowledge of information technology designs, setups, installation, implementation and maintenance.
- Knowledge of security issues, crisis management and business continuity; and legal issues regarding technology.
- Knowledge of driving new continual improvement to IT's strategies in response to the Authority's evolving needs.
- Knowledge of business case analysis.
- Knowledge of costing, budgeting, risk and financial analysis.
- Knowledge of quality assurance concepts and procedures.
- Excellent verbal and written communication skills, interpersonal relationships, leadership and management principles and decision-making abilities.
- Experience with the full range of IT services and products.
- Experience working with multiple units and/or organizations, building relationships, and with highly collaborative projects.
- Experience in evaluating programs and thinking strategically about future directions for IT.
- Strong project management skills.
- Skill in defining program objectives and establishing information technology standards, policies, and budgets.
- Skill in analyzing and improving operational effectiveness.
- Skill in program analysis and strategic planning.
- Skill in managing multiple projects, including development and management of budget.
- Skill in managing the work of others, including leading and motivating managerial staff.
- Excellent written and oral communication and conflict resolutions skills
- Ability to direct team management and development and control an operating budget.
- Ability to work with Senior Executives.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

Department:	Maintenance
Pos. No:	10855
Pay Grade:	E1 ($48,200-$100,200) – **Exempt**
Last update:	8/2018 Compensation

POSITION OVERVIEW

Reporting to the Chief Executive Officer, this position is responsible for the leadership, administration and oversight of the Hillsborough County Aviation Authority's (Authority) operating departments including the Operations Department, consisting of Airfield and Terminal Operations, Public Safety & Security, which includes Airport Police Department, Contract Airport Fire Department, Airport Operations Center, and Airport Security and Access Control; Parking and Ground Transportation, Guest Services and General Aviation Department which oversees all General Aviation operations at Tampa International Airport, Peter O Knight Airport, Tampa Executive Airport, and Plant City Airport in Plant City. The Vice President of Operations and Customer Service is also responsible for Customer Services and Airport Concessions. The position is responsible for the safe and efficient operation of all airport operations related activities, compliance with FAA and TSA operating certification requirements and regulations, as well as implementation and execution of strategic plans and policies to enhance customer experience and safety.

POSITION ACCOUNTIBILITIES

- Coordinates preparation of annual operating budget and planning activities related to Operations and Customer Service.
- Prepares, analyzes, and interprets various reports related to the airport operating departments.
- Develops, recommends and implements Airport Rules, Regulations, Operating Procedures, and Directives.
- Maintains close working relationships with various internal and external stakeholders including airlines, airport tenants, FAA, TSA, Fixed Base Operators, and other agencies.
- Implements and executes strategic initiatives that enhance customer experience.
- Knowledgeable of laws and regulations that affect the airport's operations.
- Coordinates activities with officials of external agencies, i.e., FAA, TSA, State, Local, and community organizations.
- Coordinates activities with other Vice Presidents, Department Heads, and Managers regarding airport matters.
- Coordinates activities with the Tampa Fire Rescue Department for Aircraft Rescue and Fire Fighting operations
- Oversees, through the Director of Operations and Customer Service the Authority's general aviation airports and general aviation operations at Tampa International Airport.

The following positions report directly to the Vice President of Operations and Customer Service:

1. **Director of Operations** – Responsible for the day-to-day operation of Tampa International Airport, including airport security access control, 24-hour duty management representation, parking and ground transportation operations, airport noise compliance office and maintaining the FAA Airport Operating Certificate and Airport Security Plan. Also responsible for the Authority's General Aviation Airports and all General Aviation activities.
2. **Director of Public Safety & Security** – Responsible for the administration, management, and operation of the Airport Police Department, Airport Operations Center and security access control. Responsible for ensuring the safety of all persons using the airport, the enforcement of laws, regulations, and traffic operations.
3. **Airport Fire Chief** – The Airport Fire Chief is a City of Tampa employee under contract to HCAA who is responsible for all fire and emergency medical personnel and their operations at the airport.
4. **Director of Guest Services** – Responsible for all Guest Service Representatives and Volunteer Ambassadors, Airport Tours, Public Relations, and Community Affairs, implementation of strategic initiatives to enhance customer experience, and customer correspondence.
5. **Director of Airport Concessions** – Responsible for a diverse portfolio of non-aviation lines of businesses including food & beverage, retail, duty free, currency exchange, passenger amenities, hotel, advertising, rental

cars, and other ancillary concessions. Responsible for revenue optimization, business development in identifying and implementing new sources of non-aviation revenues, and continually seek ways to enhance the quality of our product and service offerings and ultimately customer experience. Responsible for developing and meeting annual revenue targets, growing the concessions program and developing a world-class concessions program.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's degree in airport administration, aviation management, or a related subject and five years of senior level management experience in administration, operations, and fiscal functions at a major air carrier airport or large aviation-related business. The incumbent should have a working knowledge of the laws and regulations pertaining to the administration of medium or large hub airports and knowledge of principles and practices of leadership. Desirable qualifications for the incumbent also include a master's degree in airport administration, business administration or a related subject.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

- Performs other related duties as required.

MINIMUM QUALIFICATIONS

An Associate's Degree from an accredited college or university; and five years of experience directly related to the position duties, two of which must have been in a supervisory capacity. **Or** Graduation from high school or possession of a GED Certificate; and Six years of experience directly related to the position duties, three of which must have been in a supervisory capacity.

JOB SPECIFIC COMPENTENCIES

- Specialized technical knowledge of a specific operational area, and the ability to perform and/or supervise specialized work in that area.
- Knowledge of federal, state and local regulations pertaining to assigned functional area.
- Skill in the application of supervisory techniques.
- Ability to communicate effectively, orally and in writing.
- Ability to establish and maintain effective working relationships with others within and outside own organization.
- Ability to use initiative and exercise sound judgment.
- Ability to initiate and sustain action to accomplish goals of the functional area.
- Ability to remain calm and provide guidance to subordinate staff in crisis situations.
- Ability to organize work, set priorities, and determine resource requirements.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Director of Maintenance this position will perform high-level managerial duties in support of the department's QA/QC program and maintenance contracts that have significant visibility and impact to the Aviation Authority. Also assists division senior managers in tracking performance of maintenance activities, personnel and budget management, and development and administration of training programs for personnel development and compliance. May provide department representation in capital projects attending design and construction meetings and coordinating construction activities to minimize facility impacts.

POSITION ACCOUNTIBILITIES

Note: The following position responsibilities are illustrative and not exhaustive. The position description is not intended to be, nor should it be construed as an all-inclusive list of the duties associated with the position. Management may require incumbents to perform job duties other than those contained in this document at any time. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Performs management duties pertaining to the department's QA/QC program.
- Assists division senior managers in personnel management including performance assessments and corrective action.
- Performs maintenance contract management work by managing, coordinating and monitoring contractor performance on assigned contracts.
- Establishes administrative procedures and guidelines to ensure effective contract management outcomes.
- Works closely with the Procurement department as subject matter expert on the procurement of maintenance supplies, services and contracts.
- Prepares contract work scope drafts, bid schedules, pay applications and other related documents for review.
- Develops and administers training programs for personnel development.
- Prepares and/or monitors division budgets, monitors status of allocated funds and controls expenses.
- Actively serves as department representative on capital projects to ensure Maintenance requirements are met and work is coordinated with minimal impact to airport operations.
- Creates and coordinates work schedules and controls resources to ensure timely completion of work.
- Coordinates with other divisions and departments to ensure efficient flow of communications and services.
- Reviews and proactively acts on operational problems.
- Interprets, explains and ensures compliance with program requirements, regulations and procedures, and provides consultation to customers on matters relating to functional area.
- Assesses staffing needs and identifies shortfalls; interviews, recruits and hires new staff.
- Performs supervisory duties including performance evaluation and scheduling of subordinate personnel
- Assists other department managers and supervisors as needed
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university; and four years of maintenance contract management experience directly related to the position duties or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted.

JOB SPECIFIC COMPENTENCIES

- Considerable knowledge of the functions, services, activities, requirements and objectives of the specific functional area to which assigned.
- Knowledge of federal, state and local regulations pertaining to assigned functional area.
- Knowledge of contract management principles, practices and objectives.

- Ability to establish and maintain constructive and cooperative interpersonal relationships with staff, peers, management and local stakeholder groups to accomplish department's mission.
- Ability to communicate effectively both orally and in writing in order to present information and prepare a variety of reports.
- Ability to identify relationships that explain facts, data or other information, and make correct inferences or draw accurate conclusions.
- Ability to effectively coordinate resources and manage these resources to a successful outcome.
- Ability to establish and maintain effective working relations with others within and outside own organization.
- Ability to collect, organize and analyze data and develop logical conclusions.
- Ability to effectively utilize Microsoft Office and Oracle programs.
- Skill in applying existing guidelines and in creating new approaches to develop and modify work plans, methods and procedures for the work unit or function.
- Skill in developing tracking systems to monitor work progress.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

Tampa International Airport

Position Title: *Manager, Airfield Operations Compliance*

POSITION OVERVIEW

Reporting to the Senior Manager, Airfield Operations; this position is responsible for all assigned airfield activities of the Airport Certification Program relating to FAA, 14 CFR Part 139 regulatory compliance. This position will be accountable for self-inspection program, construction and maintenance coordination, and working with various government agencies. Additionally, this position is responsible for the administrative, supervisory and technical aspects relating to the regulatory compliance issues of the Operations department. The position will participate in incident/accident and special investigations as well as review proposed airport grant-in-aid program projects to ensure that proposed development to be accomplished will not compromise safety. This position will proactively coordinate and interact with airport tenants, outside government agencies, Authority leadership and departmental staff on matters influencing the operations within the air operations area to include airfield construction impacts and maintenance department work efforts.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Inspects all runways, taxiways, ramps and the associated areas to ensure compliance with 49 CFR Part 139 and the Airport Certification Manual and to ensure conditions are safe for the continued operation of an aircraft.
- Supports terminal ramp safety inspections, FOD inspections and other inspections as part of Tampa International Airport's safety management system.
- Assists Airport Operations Managers with the coordination of daily airfield activities related to airfield maintenance work, airfield construction projects, aircraft and vehicle movement.
- Monitors airport tenants and leased areas for possible violations of the Airport Rules/Regulations and other applicable regulations. Notifies appropriate parties in the Aviation Department of investigations and corrections.
- Ensures compliance with Federal airport certification regulation [Title 14 CFR, Part 139].
- Facilitates inspections of airport property to ensure compliance with Federal Regulations.
- Oversees Airfield Training Programs, to include computer based training for airport personnel and tenants. Development and implementing airfield training will be required.
- Facilitate proper response to any letters of investigation, civil penalties and or other requirements or inquiries made by the FAA.
- Acts as operations representative for airport projects, as required.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's Degree in Airport Operations/Management, Business Administration, or closely related field from an accredited college or university, or equivalent work experience. Applicant must have experience in FAR Part 139 to include work experience at medium to large airport(s) or joint use military facility; applying certification requirements and standards of airport safety; airport layout, design and construction.

JOB SPECIFIC COMPENTENCIES

- Proven leadership, team-building and consensus-building skills required
- Knowledge of and ability to interpret and apply Federal Aviation Regulations
- Knowledge of airport operations, maintenance and other airport related activities
- Knowledge of weather and NOTAM terminology used in Airport Operations.
- Current experience as an Airport Operations Manager or Airport Operations Specialist a plus
- Thorough knowledge of federal, state and local rules and regulations pertaining to airport operations and security
- Ability to lead teams and gain commitment

Department:	Operations
Pos. No:	15615
Pay Grade:	E4 ($76,400-$158,800) – **Exempt**
Last update:	8/2018 Compensation

- Must possess strong leadership skills and abilities
- Ability to develop, analyze and evaluate programs, policies and procedures
- Ability to work independently and organize and set priorities
- Ability to plan, assign, train, review and supervise work projects of subordinate personnel
- Ability to prepare reports, maintain records, analyze data, make procedure decisions and administer programs.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

POSITION OVERVIEW

Reporting to the Director of Marketing, the Marketing Events Manager is responsible for planning, organizing, coordinating, executing and managing the Aviation Authority's marketing events; developing marketing event plans and assists in managing all social media information as it relates to marketing events, and tracking the ROI of all campaigns. This position maintains effective relationships with representatives of advertising agencies, stakeholders in the business community, and marketing representatives in airline development, civic organizations, and other groups germane to the Authority's business.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Responsible for developing effectively communicating airport information and marketing campaigns to the public and key external and internal audiences and stakeholders projecting a positive image and reputation about the airport.
- Generate, promote, manage and execute revenue generating marketing initiatives for clients based on their needs for projects related to relationships in the business community, marketing representatives in airline development, civic organizations, and other groups germane to the Authority's business.
- Generate, promote, execute and manage marketing opportunities for the revenue generating division of the Hillsborough County Aviation Authority.
- Create and review copy, handle production and conduct market and demographic research to determine the best promotional strategy community partnerships and marketing plans.
- Research and present prevailing regulations, requirements or procedures to business or community partners seeking to engage in relationships with the airport through co-op advertising.
- Work with the marketing analysis team to develop ROI tracking for all advertising dollars spent.
- Monitor all marketing materials on property to ensure that all messages are timely and current.
- Manage the relationship with the advertising agency on record and third party creative partners.
- Keep a schedule of all deadlines for campaigns and manage the projects from the creation through the design studio.
- Represent the Aviation Authority and Marketing department at industry and public meetings, functions and events.
- Develop, maintain and create opportunities and packages for community event awareness (i.e. silent auction, raffle, and donation items/experiences).
- Remain current with Aviation Marketing best practices and marketing techniques that can be adapted from other industries to better serve the guest experience.
- Develop budget, policies and procedures for areas of responsibility to ensure comprehensive implementation of the Aviation.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position are a Bachelor's Degree in Marketing, Communications, Public Relations, Business Administration or other related field and at least five years of increasingly responsible experience in marketing or a marketing-related field, project management and supervising creative individuals. Experience buying or selling media a plus.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport

Position Title: *Senior Executive Administrative Assistant to the CEO*

POSITION OVERVIEW

Performs highly independent administrative support duties for the Chief Executive Officer. Duties include having direct knowledge of confidential interactions of the CEO with both internal and external projects.

In addition to the CEO and members of the Authority's board, this position routinely interacts with all levels of the Authority's staff, representatives from the private sector, and state and local governmental officials. This position is challenged with projecting a positive image on behalf of the Authority in all such interactions.

POSITION ACCOUNTIBILITIES

Note: *The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.*

- Independently performs a wide variety of paraprofessional administrative, secretarial and confidential functions and duties supporting the Chief Executive Officer.
- Is the primary point of contact for all calls that come through the Office of the CEO
- Maintains physical and electronic filing system
- Handles incoming mail correspondence for the Office of the CEO
- Supports the Office of the CEO
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

A Bachelor's degree; and three to five years of administrative/secretarial experience; or an equivalent combination of education, training and experience that would reasonably be expected to provide the job-specific competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Member of International Administrative Assistant Professionals a plus
- Experience working under pressure in a fast paced environment is essential
- Knowledge of policies, procedures, precedents, regulations, executive and general orders, and rules of assigned department or agency.
- Experience with Oracle expense reporting a plus.
- Advanced knowledge of Microsoft Word, Power Point, Excel and Visio required.
- Knowledge of executive administration, such as word processing, managing files and records, transcription, designing forms and other related procedures.
- Knowledge of the structure and content of the English language, including the meaning and spelling of words, rules of composition and grammar.
- Knowledge of the access, storage, destruction and release of restricted, sensitive and confidential information, and applicable guidelines.
- Skill in communication and effective writing.
- Skill in managing ones own time and the time of others.
- Skill in using logic and reasoning to identify complex problems and evaluate and implement alternative solutions, conclusions or approaches.
- Ability to use discretion and independent judgment in evaluating information.
- Ability to transcribe documents and information from different sources.
- Ability to serve the public and represent the department director or agency head with courtesy and professionalism.

Department:	CEO Office
Pos. No:	14594
Pay Grade:	E2 ($56,200 – $116,800) – **Exempt**
Last update:	8/2018 Compensation

TPA MISSION STATEMENT

The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Performs professional administrative and oversight work auditing various financial or program operations in county departments and agencies, external governmental organizations and commercial firms with whom contractual relationships exist.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Plans, assigns and oversees the work of professional auditors engaged in both regular systematic and special audits in departments and agencies and a group engaged in audits of contractors and outside vendors.
- Reviews completed audit reports and analyses for completeness of preparation and conformance with audit program guidelines and professional auditing standards; attends conferences with departmental officials or officials in external organizations as needed.
- Guides audit teams in the planning and conduct of special audits of a difficult nature; participates as necessary in the completion of complex audits; may testify in court as an expert witness.
- Participates in decisions relating to changes in auditing policies and procedures; coordinates division work with that of other departmental division; represents the department in outside meetings and conferences as assigned.
- Modifies and revises standard audit program guides; holds conferences with team members to discuss audit policies and procedures or to further train new personnel; insures that staff receives available professional literature to keep abreast of techniques and developments in the governmental auditing field.
- Keeps informed on law opinions, rules, regulations, standards and related information pertaining to the internal audit of county departments or audit of external agencies.
- Develops comprehensive practical programs of audit coverage for assigned areas of audit, assures conformance with acceptable audit standards, plans, budgets and schedules.
- Performs other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four year degree granting college or university with a major in Accounting, Business Administration or Public Administration; and

Possession of a current Certified Public Accountant (CPA) License or Certified Internal Auditor (CIA) License; and

Four years of experience as a professional Internal Auditor.

Or

An equivalent combination of education, training and experience that would reasonably be expected to provide the job-related competencies noted below.

JOB SPECIFIC COMPENTENCIES

- Extensive knowledge of governmental accounting, office management and the principles of public and business administration in their application to governmental accounting.
- Extensive knowledge of federal, state and local laws, ordinances, rules, regulations and guidelines pertaining to fiscal management of government agencies, including those funded by federal grants.
- Extensive knowledge of generally accepted accounting principles, public finance administration and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.
- Extensive knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.
- Considerable knowledge of the organization and operating activities of departments and agencies assigned for audit.
- Considerable knowledge of management principles, practices and procedures.
- Ability to coordinate and oversee the work of an auditing team in a manner conducive to full performance and high morale.
- Ability to analyze and interpret accounting data, devise audit procedures and techniques or specialized and general accounting systems.
- Ability to oversee the preparation of complete and accurate audit reports and statements, including those of a complex nature.
- Ability to communicate effectively and persuasively, both verbally and in writing.
- Ability to exercise sound judgment in the application of audit standards and principles to complex auditing problems.
- Ability to plan, organize and analyze data and make logical conclusions.
- Ability to participate effectively in the formulation of departmental policies and procedures.
- Ability to stay abreast of laws, legal opinions, regulations and standards relating to the conduct of audits in county departments and external agencies.
- Ability to work effectively with others.
- Ability to use a computer and related software.

Tampa International Airport

Position Title: *Senior Manager, Office of Innovation*

POSITION OVERVIEW

Reporting to the Vice President of Human Resources and Administration, the Senior Manager, Sustainability and Wellness will be responsible for the comprehensive vision and strategy for the Authority's Sustainability and Wellness programs in order to promote a culture of social, environmental and economic sustainability throughout the Authority. The incumbent will be the organizational champion who will integrate sustainability, corporate wellness and associated practices throughout the Authority via the continued development, evolution and execution of the Authority's Sustainable Management Plan (SMP).

The Senior Manager, Sustainability and Wellness will be a catalyst for change in stakeholder participation and practices by driving innovation and utilizing education, partnerships and initiatives to further the Authority's commitment to sustainability and wellness. The incumbent will promote Tampa International Airport as a global leader in sustainability and corporate wellness practices throughout the Tampa Bay community and aviation industry.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Direct the research and analysis of the Airport's sustainability and wellness needs to determine program direction and goals; develop metric systems to monitor and assess progress towards achieving performance goals.
- Identify, review, and assess the Airport's current sustainability and wellness services and programs; assess sustainability and wellness goals and strategies to bring greater coordination within the enterprise organization; streamline identified opportunities for improvement.
- Develop a comprehensive policy and a strategic performance plan that encompasses current goals, best practices, and move the Airport towards a more environmentally and socially sustainable future.
- Collaborate with internal departments to develop and implement marketing and educational programs that inspire the Airport to embrace environmental sustainability and wellness practices which changes the thinking, behavior and practice of individuals, departments, organizations, and community.
- Partner with multiple departments to manage activities that accomplish all levels of conservation and sustainable development including green purchasing, energy conservation, solid waste recycling, green building, resource and water conservation, greenhouse gas reduction, renewable resources, and environmental reporting metrics.
- Oversee the sustainability opportunities in capital improvement projects in the built environment to ensure sustainability practices and goals are achieved; participate in budget development by providing justification and persuasive arguments for proposals or initiatives; develop cost/ benefit analysis to make informed decisions that focus on optimizing social and environmental impacts of sustainability program initiatives.
- Develop internal and external stakeholder partnerships and work with community members, organizations and other government agencies to enhance the Airport's sustainability and wellness programs, practices and engagement; collaborate with boards and commissions, committees, or other governing boards to develop strategic direction and integrate the Airport's sustainability and wellness policies and practices.

MINIMUM QUALIFICATIONS

A four-year degree from an accredited university in Sustainability, Planning, Environmental Management, Engineering, Architecture, or aviation-related field; and a minimum of 5 years of work experience in any of the disciplines listed. Work experience with sustainability and wellness program(s) preferred. The ideal candidate will have strong communication skills, leadership ability, exceptional organizational habits, and strong interpersonal skills. Must be proficient with the Microsoft Office Suite (Word, Excel, PowerPoint, and Outlook). A valid driver's license is required.

- Keep a schedule of all deadlines for campaigns and manage the projects from the creation through the design studio.
- Represent the Aviation Authority and Marketing department at industry and public meetings, functions and events.
- Develop, maintain and create opportunities and packages for community event awareness (i.e. silent auction, raffle, and donation items/experiences).
- Remain current with Aviation Marketing best practices and marketing techniques that can be adapted from other industries to better serve the guest experience.
- Develop budget, policies and procedures for areas of responsibility to ensure comprehensive implementation of the Aviation.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in this position are a Bachelor's Degree in Marketing, Communications, Public Relations, Business Administration or other related field and at least five years of increasingly responsible experience in marketing or a marketing-related field, project management and supervising creative individuals. Experience buying or selling media a plus.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

The Senior Manager, Risk and Insurance is responsible for managerial and administrative work in planning, organizing, directing, and coordinating an insurance and risk management program for the Hillsborough County Aviation Authority. The position identifies and assesses risk and exposure in all phases of the Authority's operations; reports findings on risk exposures to senior management; implements strategies to manage insurable and/or hazard risk; directs the purchase of insurance programs and policy renewal process; makes recommendations regarding insurance coverage and insurance requirements and language for tenant, construction, maintenance, consulting, vendor, and other agreements; manages loss control activities; prepares loss analyses; and manages the Authority's facility safety inspection program.

The Senior Manager, Insurance and Risk Management interacts with the Authority's insurance consultants, attorneys, insurance brokers, and claims adjusters as necessary to achieve objectives. The Senior Manager, Insurance and Risk Management will have considerable latitude for independent judgment as to the technical aspects of the insurance, risk, and safety program.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Review contracts, invitations to bid, requests for proposals, requests for qualifications, leases, and other agreements to verify/revise insurance language and establish threshold insurance limits with appropriate input.
- Oversee the contractor/vendor insurance certificate program. Review and approve all certificates of insurance of contractors, vendors, and consultants doing business with the Authority to ensure compliance with contract insurance language.
- Oversee the Authority's Owner Controlled Insurance Program (OCIP) and perform related duties.
- Oversee and review input of insurance data into the Propworks Database.
- Maintain claims log and monitor processing of general liability and auto liability and property and casualty insurance claims to ensure accurate and timely adjudication and settlement.
- Investigate incidents that could result in compensatory events with insurance companies.
- Research, evaluate, make recommendations, and produce data reports regarding risk management, loss control, and claims by analyzing causes, patterns, or trends of incidents and claims.
- Coordinate the annual insurance policy renewal process for over ten types of insurance coverage, including the application process and proposals evaluation. Make coverage recommendations.
- Perform risk evaluation and forecasting.
- Manage the risk management information system.
- Manage the administration of brokered excess coverage.
- Maintain property and vehicle inventories and valuations.
- Provide risk and safety guidance and oversight for all airport-sponsored and community events held at the airports and attend planning meetings as necessary.
- Establish safety inspection procedures, manage the facility safety inspection program, and perform airport safety inspections to identify potential hazards and prepare and recommend practical solutions to eliminate and prevent hazardous conditions.
- Serve as chair of the safety committee and coordinate with other departments to enhance Authority-wide awareness of safety issues.
- Assist with disaster mitigation and recovery.
- Develop employee safety training.
- Develop and implement risk and safety management goals and procedures.
- Prepare and administer risk and safety management budget.
- Manage, supervise, and train risk and safety management staff.
- Perform other related duties as required.

MINIMUM QUALIFICATIONS

Graduation from an accredited four-year degree granting college or university and five years of experience in risk management, development of insurance portfolios, evaluation of insurance needs, risk and loss control, safety, risk reduction, or an equivalent combination of experience. The ability to assess exposures as well as determine the applicable

insurance coverage needed to protect the Authority and process claim information to conclusion. Computer and other standard office equipment skills; planning and decision making skills; and oral and written communication skills are required. A valid Florida Driver's License (or the ability to readily obtain).
Airport and/or Florida governmental experience; course work in risk management and/or insurance; or certification by the Insurance Institute of America as an Associate in Risk Management (ARM) or Certified Property Casualty Underwriter (CPCU) is preferred. Experience in development of public sector insurance portfolios and large construction insurance, including OCIP, CCIP, or Builders Risk also is preferred.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Vice President of Operations, this position is responsible for the management of rules, regulations and operating directives of all Part 1542 regulatory compliance requirements as part of Tampa International Airport's Security Program. This position is responsible for the administrative, supervisory and technical aspects relating to the regulatory compliance issues of the Operations department. Other duties as assigned

POSITION OVERVIEW

The Vice President of Finance acts as the Chief Financial Officer of the Authority and is responsible for directing the financial activities of the Authority. The position reports to the Executive Vice President of Finance and Procurement.

POSITION ACCOUNTABILITIES

The Vice President of Finance provides leadership, direction and management in the preparation of the annual financial statements and the related external audit, budget to actual and other management financial reporting, completion of annual and amended budgets, calculation of rates and charges to the airlines, processing of payroll, payments to vendors and contractors, billing of airlines and concessionaires, collection of accounts receivable and passenger facility charges, project and fixed asset accounting and regulatory reporting. This position is responsible for the multiple funds of the Authority, and ensuring funds are used appropriately according to the statutory or trust agreement restrictions placed on their use.

The Vice President of Finance interacts with the Authority's trustees relating to the administration of existing debt. This position coordinates the issuance of debt, including refunding bond issues, construction bond issues and other types of financing for capital improvements. The Director of Finance serves on the Authority's Development Committee and recommends sources of funding for capital projects. This position assists the CEO, Executive Team, and others with various financial analyses.

The Vice President of Finance has three Senior Managers as direct reports and the Finance department is currently staffed with 25 FTEs.

MINIMUM QUALIFICATIONS

The recommended qualifications to perform successfully in the position include a Bachelor's degree in accounting or finance, at least eight years of experience managing a mid to large size accounting and/or finance department with exposure to multiple aspects of accounting and financial functions. Designation as a Certified Public Accountant is required.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

POSITION OVERVIEW

Reporting to the Executive Vice President of Operations & Customer Service, this position is responsible for directing the day-to-day activities and operations at Tampa International Airport involving the safety and convenience of persons using the airport.

The Vice President of Operations is responsible for assessing airport operations and implementing activities to meet those needs. The incumbent recommends improvements or expansions to the facility that would enhance the customer service experience and enhance the accommodations of the passengers and airlines.

The Vice President of Operations is responsible for enforcing the Operational Policies, Procedures, Rules, Regulations and Operating Directives. The Director recommends changes and additions to such procedures in order to increase the safety, security, and efficiency of the airport operation.

The Vice President serves as a liaison to the Airline Station Managers and other tenants to understand their needs and coordinate joint activities to their successful completion.

Acts as the Authority's coordinator for contracted aircraft rescue and firefighting services with the City of Tampa Fire Department. In coordination with the TFR Airport Fire Chief, coordinates emergency services equipment and procedures. Develops emergency plans with coordination of outside agencies.

The Vice President is responsible for airport airfield activity. Manages airports per-use facilities including programming, procedures, and documentation.

POSITION ACCOUNTIBILITIES

Note: The following duties are illustrative and not exhaustive. The omission of specific statements of duties does not exclude them from the position if the work is similar, related, or a logical assignment to the position. Depending on assigned area of responsibility, incumbents in the position may perform one or more of the activities described below.

- Creates, coordinates, and enforces operational procedures and directives to ensure compliance with Federal Aviation Administration and Transportation Security Administration regulations. Prepares and maintains the status of the Airport's Certification Manual and the Emergency Response Plan.
- Supervises the off-hour management staff for comprehensive 24-hour management resources.
- Monitors airport operations and directs operations staff to ensure safe and efficient service to airport users.
- Acts quickly and decisively in emergencies and unusual situations involving the operation of airports, taking such action as needed to move equipment, settle public unrest, and make judicial decisions in disputes - all to ensure smooth functioning of the airport.
- Acts for the Vice President of Operations & Customer Service in his/her absence to ensure consistent and smoother functioning of the airport.

Reporting directly to the Director of Operations are:

1. Operations Manager, Terminal Services Manager, and Parking and Ground Transportation Manager: Responsible for 24-hour comprehensive airport management presence and day-to-day operational activities. Performs specialized operational related projects.
2. Airport Operations Specialist: Management assistance and training program.

MINIMUM QUALIFICATIONS

The qualifications to perform successfully in this position are a Bachelor's degree or the equivalent in public or business administration, airport management, or a related field, plus at least five years of experience of a responsible nature supervising operations at a large or medium hub airport. This should include a thorough knowledge of federal and state regulations governing the use and operation of airports.

TPA MISSION STATEMENT

To be a major driver in the economic growth of the Tampa Bay Region. We will be leading edge innovators to create global access and extraordinary customer experiences through our people and facilities to build prosperity for our stakeholders and the region.

TPA VISION STATEMENT

To be a vibrant aviation gateway for Tampa Bay, providing access and economic opportunity for our stakeholders.

The Aviation Authority-Tampa International Airport provides equal employment opportunity to all persons, regardless of age, race, religion, color, national origin, sex, political affiliations, marital status, non-disqualifying physical or mental disability, age, sexual orientation, membership or non-membership in an employee organization, or on the basis of personal favoritism or other non-merit factors.

The Aviation Authority-Tampa International Airport welcomes and encourages applications from minorities, veterans, and persons with physical and mental disabilities, and will reasonably accommodate the needs of those persons in the application and testing process. The decision on granting reasonable accommodation requests will be on a case-by-case basis.

Tampa International Airport
