Dear CNC Participant,

During our Community Noise Consortium (CNC) meetings on March 8, 2018, we shared an upcoming taxiway project that will begin at the Airport next month (April). This particular project involves the removal and replacement of a large section of the Airport's primary west taxiway, immediately adjacent to the Airport's west runway, Taxiway W. This work has several phases and will take place over the next seven to eight months.

The work on this taxiway restricts aircraft from accessing one end of the west runway. As a result, **during various phases of this project, the following is likely:**

- An increase in departures on Runway 1R during north flow operations.
- An increase in arrivals on Runway 19L in south flow operations.
- Runway closure(s) of the west runway will be necessary during some phases of this project. Specific dates and durations are not currently known, but will be communicated by email and posted on the noise abatement section of the Airport's website (www.tampaairport.com/noise-abatement).

The work referenced above will be completed as quickly as possible over the coming months. As always, weather conditions and other factors will contribute to how quickly this work can be completed.

Sincerely,

A handwritten signature in blue ink, appearing to read "Lloyd Tillmann".

Lloyd Tillmann
Director of Operations
